

PRIMARY 6 CULTURAL AND CREATIVE ARTS SCHEME OF WORK

FIRST TERM

Week	Topic	Content
1	Introduction to Life Drawing I	Meaning of life drawing - drawing from real-life observation; Difference between life drawing and other forms of drawing; Benefits of life drawing - observation skills, proportion, realism; Materials needed - pencils, charcoal, paper, erasers; Setting up for life drawing - lighting, positioning, distance
2	Introduction to Life Drawing II	Basic principles of life drawing - observation, proportion, measurement; Human figure proportions - head as unit of measurement (7-8 heads tall); Gesture drawing - capturing movement and energy; Contour drawing - outline and edges; Shading and value - creating three-dimensional forms; Practice with still objects before moving to human subjects
3	Introduction to Life Drawing III	Drawing facial features - eyes, nose, mouth, ears; Portrait proportions and placement; Profile, three-quarter, and frontal views; Hands and feet drawing techniques; Drawing fabric and clothing; Common mistakes and corrections; Building confidence through practice; Creating a life drawing portfolio
4	Imaginative and Creative Drawing I	Meaning of imaginative drawing - creating from imagination not observation; Developing creativity and originality; Sources of inspiration - dreams, stories, nature, culture, emotions; Brainstorming and sketching ideas; Fantasy art and surrealism; Creating imaginary creatures, places, and scenarios; Combining real elements in new ways
5	MIDTERM EXAMINATION	Assessment of topics covered in weeks 1-4 - practical drawing tests and theory
6	MIDTERM BREAK	Rest and relaxation period
7	Imaginative and	Storyboard creation - visual storytelling; Character design -

	Creative Drawing II	creating unique personalities; Environment design - imaginary worlds; Composition in imaginative drawing - balance, focal point, flow; Color theory in creative expression - mood and emotion; Mixed media techniques - combining materials; Digital art introduction (if resources available)
8	Rhythmic Patterns I	Understanding rhythm in music and art; Elements of rhythm - beat, tempo, pattern, repetition; Clapping and body percussion; Creating simple rhythmic patterns; Nigerian traditional rhythms - Highlife, Afrobeat, Juju; Polyrhythm - multiple rhythms simultaneously; Rhythm notation basics; Cultural significance of rhythms
9	Rhythmic Patterns II	Complex rhythmic patterns; Call and response rhythms; Rhythm in dance - coordinating movement with beat; Using traditional instruments - talking drum, shekere, agogo, udu; Creating original rhythmic compositions; Group performances; Rhythm games and activities; Recording and performing rhythms
10	Care of Tools and Equipment in Arts I	Types of art tools - drawing instruments, painting supplies, sculpting tools; Proper handling and use; Cleaning procedures for different materials; Storage methods - organizing, protecting from damage; Maintenance routines - sharpening pencils, cleaning brushes, caring for paints; Preventing waste and damage; Responsibility and ownership
11	REVISION	Review of all topics covered; Drawing practice; Rhythm performance; Tool care demonstration; Portfolio preparation; Question and answer sessions
12	EXAMINATION	End of term assessment - theory and practical
13	CLOSING	Report card distribution; Vacation assignment; Art exhibition of student work

PRIMARY 6 CULTURAL AND CREATIVE ARTS LESSON NOTES

FIRST TERM

WEEK 1: INTRODUCTION TO LIFE DRAWING I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define life drawing in their own words.
2. Differentiate between life drawing and drawing from memory or imagination using clear examples.
3. List and describe at least three materials used for life drawing.
4. State and explain two benefits of practicing life drawing.

CONTENT

1. Meaning of Life Drawing

Life drawing is the art of drawing a real, living thing while you are looking at it. The subject (what you are drawing) is right there in front of you. It is like being a detective with your eyes, carefully copying exactly what you see onto your paper. You can draw people, animals like a goat or chicken, plants, or everyday objects like a water pot or a school bag. The most important rule is: **you must look at the real thing.**

2. Difference Between Life Drawing and Other Forms

There are many ways to draw. Life drawing is special because it needs a real model.

- **Drawing from Memory:** Drawing your mother's face when she is not there. You are using the picture in your mind.
- **Drawing from Imagination:** Creating a picture of a superhero flying over Lagos. You are making it up from your thoughts.
- **Drawing from a Photograph:** Copying a picture from a book or phone. The real subject is not with you.
- **Life Drawing:** Drawing your friend who is sitting still on a chair in front of you. You can see the light on their face and the folds in their clothes *right now*.

3. Materials Needed for Life Drawing

You do not need expensive things to start. Here are simple tools:

- **Pencils:** Different pencils make different marks.
 - **HB Pencil:** Good for drawing light, clean lines and outlines.
 - **2B or 4B Pencil:** Softer and darker. Perfect for **shading** (making shadows).
- **Drawing Paper/Sketchbook:** Any plain paper will do. A sketchbook keeps all your drawings together.
- **Eraser:** To gently correct lines and clean up mistakes. A kneaded eraser is soft and can be shaped.
- **Charcoal Sticks:** These make very dark, rich lines and are great for big, quick drawings.
- **Drawing Board:** A hard, flat surface (like plywood) to clip your paper onto. It keeps your paper steady.

4. Benefits of Life Drawing

Practicing life drawing makes you a better observer and artist.

- **Improves Observation Skills:** It trains your eyes to see small details you normally miss—like how the stem connects to a leaf, or how your ear is shaped. You learn to look carefully.

- **Teaches Proportion and Scale:** You learn how big one part is compared to another. For example, you learn that a real wrist is usually thinner than the forearm, so your drawing will look more real.
- **Understands Light and Shadow:** By looking at a real object, you see where the light from the window or sun hits it (bright areas) and where the shadows fall (dark areas). Shading these areas makes your drawing look solid, not flat.

EVALUATION

1. If you are drawing a real chicken in your compound, what type of drawing are you doing?
2. How is drawing your teacher from your memory different from drawing her while she stands in class?
3. Which pencil would you choose to make a light outline, and which would you use to make a dark shadow?
4. Why is an eraser an important tool for a life drawing artist?
5. How does life drawing help you understand the true size of an object's parts?
6. True or False: For life drawing, the subject must be alive and moving quickly.

ASSIGNMENT

1. **(Practical):** Place any object (e.g., a spoon, a key, a fruit) on a table in good light. Look at it carefully and draw its outline on a piece of paper.
2. **(Oral/Listing):** Tell your parent or guardian three objects in your home that would be good subjects for life drawing and explain why.
3. **(Written):** Write one or two sentences explaining what might happen to a paintbrush if you never wash it after painting.

WEEK 2: INTRODUCTION TO LIFE DRAWING II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define proportion in art using simple terms.
2. Explain and use the "head count" rule to measure a human figure.
3. Describe the purpose and method of gesture drawing.
4. Demonstrate basic shading to turn a flat circle into a looking 3D sphere.

CONTENT

1. Principles of Life Drawing: Proportion

Proportion means the correct size relationship between different parts of a whole. It answers the question: "Is this part too big or too small compared to that part?" If you draw a person with a head as big as their body, the proportion is wrong. Good proportion makes your drawing look believable.

2. Human Figure Proportions

Using the "Head Count" Artists use the head's length to measure the whole body. This is a simple trick!

- An average **adult** is about **7 to 8 heads tall**. This means if you could stack their head from bottom to top 7 or 8 times, you would reach their feet.
- A **primary school child** (like you!) is about **5 to 6 heads tall**. Children have bigger heads compared to their bodies than adults do.
- A **baby** is only about **3 to 4 heads tall**.

3. Gesture Drawing: Capturing the Action

Gesture drawing is a quick, simple sketch that captures the main action or movement of a pose. It is like taking a one-minute note with your pencil. Do not draw details like eyes or fingers.

- **How to do it:** Use loose, flowing lines. If someone is running, draw the line of their spine leaning forward and the angles of their legs.
- **Purpose:** It helps you get the feeling and energy of the pose right before you add details. It is the first step.

Step 1: Reference Photo

Step 2: Gesture Drawing

Step 3: Detailed Sketch

4. Shading and Form: From Flat to 3D Shading is the use of light and dark tones to make a flat shape look like a solid object with volume. Imagine a flat circle. With shading, it becomes a ball.

- **Highlight:** The brightest spot where light hits directly (leave this area white).
- **Mid-tone:** The main color of the object (use light pencil shading here).
- **Core Shadow:** The darkest area, usually opposite the highlight (use heavy pencil or your 4B pencil here).
- **Cast Shadow:** The dark shape the object throws on the ground or table.

Step 1: Draw a Circle

Step 2: Add Shading for Form (Sphere)

EVALUATION

1. What does "proportion" mean when you are drawing a person?
2. Roughly how many "heads tall" is a child your age?
3. What is the main goal of a gesture drawing? To show details or to show movement?
4. What do we call the technique of using light and dark areas to make a drawing look solid?
5. If you draw a picture where a person's hands reach their knees, what principle have you forgotten?
6. Should you draw the buttons on a shirt during the gesture drawing step? (Yes/No)

ASSIGNMENT

1. **(Practical):** Ask a family member to pose (e.g., reading a book) for 2 minutes. Do a quick gesture drawing of them using just 10 lines.
2. **(Practical):** Draw a simple circle on your paper. Use your pencil to shade it and turn it into a sphere. Show the cast shadow.
3. **(Oral/Measuring):** Use a string or paper strip to measure the height of your friend's head. Then use that same strip to see how many "heads tall" they are. Report the number.

WEEK 3: INTRODUCTION TO LIFE DRAWING III

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Identify and draw the correct placement of eyes, nose, and mouth on a face.
2. Differentiate between a frontal (front) view and a profile (side) view of a face.
3. Draw simple but recognizable versions of eyes, noses, and mouths.
4. Explain one common mistake in drawing portraits and how to avoid it.

CONTENT

1. Drawing Facial Features: Placement is Key

When drawing a face, where you put the features is more important than how perfectly you draw them. Follow these simple guides:

- **Eyes:** They are in the **middle** of the head, not near the top. The space between the two eyes is usually the width of one more eye.
- **Nose:** The bottom of the nose is about halfway between the eyes and the chin.
- **Mouth:** It sits about one-third of the way from the bottom of the nose to the chin.
- **Ears:** The top of the ear lines up with the eye. The bottom of the ear lines up with the bottom of the nose.

2. Portrait Views: Seeing the Face from Different Sides

- **Frontal View:** You are facing the person directly. You can see both eyes, both ears, and the full nose and mouth. It is like a passport photograph.
- **Profile View:** You are looking at the person from the side. You see only one eye, one side of the nose and mouth, and one ear. The shape of the forehead, nose, lips, and chin is very clear.
- **Three-Quarter View:** This is the most common view. The face is turned slightly, so you see more of one side than the other. It looks very natural.

3. Drawing Simple Features

Start with basic shapes, not details.

- **Eyes:** Draw an almond shape. Put a dark circle (pupil) inside.
- **Nose (Front):** Draw two small curved lines for nostrils.
- **Nose (Side):** Draw a simple "L" or gentle slope shape.
- **Mouth:** Draw a simple line, or a line with a softer line below it for the lower lip.

4. Common Mistakes and How to Fix Them

- **Mistake:** Putting the eyes too high on the forehead, making the forehead very small.
- **Fix:** Always draw a light guideline across the middle of your head oval first. Place the eyes on this line.
- **Mistake:** Drawing hair as many single strands, which looks messy.
- **Fix:** Draw the hair as one big shape first (like a helmet), then add a few lines to show texture and style.

EVALUATION

1. Where should you draw the eyes on a simple head shape?
2. Which portrait view shows only one side of the face?
3. If you draw a line from the top of your ear, which facial feature does it line up with?
4. What is a better way to start drawing hair instead of drawing many strands immediately?
5. In which view can you see both of the person's ears clearly?
6. Why is it helpful to draw light guidelines before drawing the eyes and nose?

ASSIGNMENT

1. **(Practical):** Look at your own eye in a mirror. Draw its simple shape (the almond shape and the circle inside).
2. **(Practical):** Draw the side view (profile) of your brother's, sister's, or friend's head.
3. **(Written Listing):** List the four main features we find on the face that an artist must draw.

WEEK 4: IMAGINATIVE AND CREATIVE DRAWING I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define imaginative drawing and contrast it with life drawing.
2. List three sources of inspiration for creative ideas.
3. Differentiate between a realistic drawing and a fantasy drawing.
4. Create a simple sketch of an original imaginary creature.

CONTENT

1. Meaning of Imaginative Drawing

Imaginative drawing is creating pictures from your own mind, ideas, and imagination. You are the boss of this world! You can draw things that are not real or combine real things in new ways. It is the opposite of life drawing, where you copy reality. Here, you invent reality.

2. Sources of Inspiration for Creativity

Where do ideas come from? Everywhere!

- **Stories & Folklore:** Nigerian tales about tortoise (Ijapa), mermaids (Mami Wata), or spirits can inspire drawings.
- **Dreams:** The strange things you see in your sleep.
- **Nature:** What if a tree could walk? What if a fish could sing?
- **Feelings:** Drawing what happiness, anger, or fear looks like as a creature or a place.
- **Everyday Objects:** Imagine if your school bus had wings or if a phone grew roots like a plant.

3. Fantasy Art vs. Realism

- **Realism:** Drawing things to look exactly as they do in real life. A drawing of a horse that looks like a photograph.
- **Fantasy Art:** Drawing things from magical, impossible worlds. A drawing of a horse with wings (a pegasus) or a horse with a single horn (a unicorn).

- **Surrealism:** A special type of imaginative art where things are mixed up in a dream-like way. For example, a clock melting over a tree branch, or a giant apple floating in the sky over a market.

REALISTIC DRAWING

FANTASY DRAWING

SURREAL DRAWING

4. Creating Imaginary Creatures: The "Mix-and-Match" Game A fun way to create is to combine two or more real animals.

1. Choose two animals (e.g., "Eagle" and "Lion").
2. Think of their parts: Eagle has wings, sharp beak, talons. Lion has a mane, four legs, tail.

3. Combine them: You could draw a lion's body with eagle wings and talons for front feet.
This creature is called a **griffin**.

EVALUATION

1. What is the main difference between imaginative drawing and life drawing?
2. Name two sources of inspiration for a creative drawing that come from Nigerian culture.
3. If you draw a picture of a house exactly like your own house, is that realism or fantasy?
4. What do we call art that shows magical worlds with creatures that do not exist?
5. You draw a car that can swim like a fish. What type of drawing is this?
6. Why is your imagination important in this type of drawing?

ASSIGNMENT

1. **(Practical):** Create your own "Mix-and-Match" creature. Combine your favorite animal with a bird. Draw it and give it a name.
2. **(Written):** Write three sentences describing your creature. Where does it live? What does it eat? What is special about it?
3. **(Oral/Listing):** Tell a family member about one dream you remember and describe one thing from it that would make a good drawing.

WEEK 5 & 6: MIDTERM EXAMINATION AND BREAK

WEEK 7: IMAGINATIVE AND CREATIVE DRAWING II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define a storyboard and state its use.
2. Explain how character design shows personality.
3. Create a simple background environment for a story.
4. Choose colors to express a specific mood (happy, sad, scary).

CONTENT

1. Storyboard Creation: Planning a Story with Pictures

A **storyboard** is a visual plan for a story, like a comic strip. It is a series of boxes (frames) that show the key moments of the story in order. Film makers and cartoonists use it to plan what will happen first, next, and last before they start the final work.

1. Girl picks up bucket.

2. Girl walks to river

3. Girl fills bucket.

4. Girl carries bucket home.

2. Character Design: Drawing Personality

Character design is about creating the look of the people or animals in your story. Their appearance tells us about them.

- **Hero/Heroine:** Often strong, upright posture. Bright, warm colors like red, yellow, or white. Open, friendly face.
- **Villain:** Might be hunched or have sharp angles. Dark, cool colors like black, purple, or dark green. Frowning face or scary features.
- **Funny Sidekick:** Could be round, silly shapes with exaggerated expressions.

3. Environment Design: Drawing the Setting

The **environment** or background is where the story happens. It sets the mood.

- Is it a **busy market** in Lagos (crowded, lots of stalls, bright sun)?
- Is it a **quiet village** at night (moon, huts, few lights)?
- Is it a **magical forest** (giant colorful mushrooms, glowing plants)? The environment should match the story. A scary story needs a dark forest, not a sunny playground.

4. Color and Mood: How Colors Make Us Feel

Colors are like feelings you can see.

- **Red, Orange, Yellow:** Feel warm, energetic, happy, or sometimes angry.
- **Blue, Green, Purple:** Feel cool, calm, sad, or magical.
- **Black, Grey, Brown:** Can feel serious, scary, dirty, or old.
- **White, Light Pink, Light Blue:** Can feel peaceful, clean, or innocent.

COLOR	MOOD/FEELING
	Anger / Love
	Sadness / Calm
	Happiness
	Nature / Peace
	Fear / Mystery
	Purity / Clean

EVALUATION

1. What is a storyboard used for?
2. Why would a hero character be drawn with bright colors and a straight back?
3. Which color is often associated with happiness and sunshine?
4. What do we call the drawing of the place where a story happens?
5. How is a storyboard similar to the pictures in your storybook?
6. What colors might you use to draw a calm, peaceful lake scene?

ASSIGNMENT

1. **(Practical):** Create a 4-panel storyboard telling a simple story: "A child helps an old woman carry her firewood."
2. **(Practical):** Design a "forest guardian" character who is kind and protects animals. Use colors that show they are good.
3. **(Written):** Explain in one sentence: Why is the background important in a drawing of a person running?

WEEK 8: RHYTHMIC PATTERNS I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define rhythm in the context of music and movement.
2. Identify and explain the basic elements of rhythm: beat and tempo.
3. Demonstrate a simple rhythmic pattern using body percussion (clapping, stomping).
4. Mention two Nigerian music genres known for their strong rhythms.

CONTENT

1. Understanding Rhythm: The Heartbeat of Music

Rhythm is the ordered pattern of sounds and silences in music. It is what makes you want to tap your foot, clap your hands, or dance. It is the timing of the music. In art, rhythm can be the repeating pattern of shapes or colors.

2. Elements of Rhythm

- **Beat:** The steady, regular pulse that you feel in the music. It is like the **heartbeat** of the song. You can count it: 1, 2, 3, 4... 1, 2, 3, 4...
- **Tempo:** This is the **speed** of the beat. Is the heartbeat fast or slow?
 - **Fast Tempo:** Makes music lively, for dancing (like **Afrobeats**).
 - **Slow Tempo:** Makes music calm or sad (like a **lullaby**).
- **Pattern:** The arrangement of long sounds and short sounds on top of the steady beat. For example: CLAP-clap-clap-rest. This creates the rhythm.

3. Body Percussion: Making Rhythm with Your Body

You are your own instrument! We can create rhythms using:

- **Clap** (hands together)
- **Stomp** (feet on ground)
- **Snap** (fingers)
- **Pat** (hands on thighs)
- **Chest Tap** (gently with fingertips)

Let's try a pattern: **Stomp - Pat - Clap - Rest** (Repeat).

4. Nigerian Traditional and Modern Rhythms

Nigeria is famous for its complex and beautiful rhythms.

- **Traditional:** Music from different ethnic groups, using drums like the **Gangan** (Talking Drum), **Bata**, and **Ogene** (metal gong).
- **Modern Genres:**
 - **Afrobeats:** Has a fast, danceable tempo and complex drum patterns.
 - **Highlife/Juju:** Uses guitars and percussion to create a swinging, happy rhythm.

EVALUATION

1. Rhythm in music is like a _____ for a song. (heartbeat)
2. What is the difference between *beat* and *tempo*?
3. Show me one way to make a sound for rhythm using a part of your body that is not your hands.
4. Name one Nigerian music genre that has a fast tempo.
5. If a song makes you want to sleep, is its tempo likely fast or slow?
6. Can you create rhythm by repeating shapes in a drawing? (Yes/No)

ASSIGNMENT

1. **(Practical):** Create your own 4-beat body percussion pattern (e.g., Clap, Snap, Stomp, Rest). Write it down using words or simple drawings.
2. **(Listing):** List three different body parts you can use to create percussion sounds.
3. **(Oral/Observation):** Listen to any song on the radio for one minute. Tell your teacher or parent whether the tempo was fast, medium, or slow.

WEEK 9: RHYTHMIC PATTERNS II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Explain the "Call and Response" pattern in African music.
2. Identify three traditional Nigerian musical instruments and describe their sound.
3. Describe the direct relationship between rhythm and dance movements.
4. Participate in a group rhythmic activity demonstrating call and response.

CONTENT

1. Call and Response: A Musical Conversation

This is a very common pattern in African and Nigerian music. It is like a conversation in music.

- **The Call:** A leader (singer or drummer) sings or plays a short musical phrase (a question or statement).
- **The Response:** The chorus or audience answers back with a set phrase. This creates unity and makes everyone feel part of the music.
 - *Example:* Leader: "Who is great?" Chorus: "Our school is great!"

2. Traditional Nigerian Rhythm Instruments

- **Talking Drum (Gangan):** An hourglass-shaped drum you squeeze under your arm. By squeezing, you can change the pitch to *mimic the tones of human speech*. It can "talk."
- **Shekere:** A dried gourd (like a large, hard fruit) covered with a net of beads or seeds. You shake it or slap it against your hand for a **shaking, scraping** sound.
- **Agogo (Bell):** A metal bell, usually two joined together. You strike it with a stick for a high, **"ting-ting"** sound that cuts through other drums.
- **Udu (Pot Drum):** A clay pot with a hole. You play it by tapping the surface with your hands for a deep, **hollow, "booming"** sound.

Talking Drum

Shekere

Agogo

Udu pot

3. Rhythm in Dance: Moving to the Beat

Dance is rhythm you can see. Every dance move matches the music's rhythm.

- If the drumbeat is **fast**, the dancer's feet move quickly, and their body is energetic.
- If the rhythm is **slow and graceful**, the dancer's movements will be slow and flowing.
- Dancers often listen for a special, strong beat (the **downbeat**) to start or change their movement.

4. Polyrhythm: Many Rhythms at Once

Polyrhythm is when two or more different rhythms are played at the same time. For example, one drummer is playing a fast pattern (ti-ka-ti-ka) while another plays a slow, steady beat (BOOM... BOOM...). This makes the music rich, complex, and very interesting. It is a key feature of much African music.

EVALUATION

1. In "Call and Response," what is the role of the *response* group?
2. Name two traditional instruments that you hit or strike to play.
3. How does the Talking Drum imitate human speech?
4. When the tempo of the music increases, what happens to the dancer's movements?
5. What is it called when you hear two different rhythms playing together in a song?
6. What is a Shekere made from? (A gourd and a net of beads).

ASSIGNMENT

1. **(Practical/Drawing):** Draw and color one traditional Nigerian musical instrument of your choice.
2. **(Written):** Create a simple "Call and Response" for your class. Write one line for the Call (Leader) and one line for the Response (Class).
3. **(Oral/Explanation):** Explain to a friend: Why can't you dance properly if there is no rhythm in the music?

WEEK 10: CARE OF TOOLS AND EQUIPMENT IN ARTS I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Identify tools used for drawing, painting, and sculpting.
2. Explain the correct steps to clean a paintbrush after using water-based paint.
3. Discuss the importance of proper storage for different art tools.
4. List two negative consequences of not taking care of art tools.

CONTENT

1. Types of Art Tools and Equipment

Artists use different tools for different jobs:

- **Drawing Tools:** Pencils, erasers, pencil sharpeners, rulers, charcoal, crayons.
- **Painting Supplies:** Brushes (different sizes), palette (for mixing colors), water container, rags, tubes or pots of paint (poster, watercolour).
- **Sculpting/Modelling Tools:** Clay, modelling tools (wooden or plastic sticks for shaping), a smooth board to work on.

2. Handling and Cleaning Your Tools

Taking care of tools makes them last longer and work better.

- **Cleaning Paint Brushes (for poster/watercolour paint):**
 - a. Rinse the brush in a container of clean water immediately after use.
 - b. Gently swirl it on the bottom to get paint out of the hairs near the metal part (ferrule).
 - c. Use mild soap and rub the bristles gently in your palm.
 - d. Rinse again until the water is clear.
 - e. Gently reshape the bristles with your fingers and lay it flat to dry.
- **Pencils and Sharpeners:** Sharpen pencils over a bin. Do not drop pencils, as the graphite (lead) inside can shatter. Empty pencil sharpeners regularly.

- **Palettes and Containers:** Wash palettes with water and a sponge after painting. Dry water containers to prevent mold.

1. Swirl brush in dirty water

2. Rub with soap in palm

3. Rinse in clean water

4. Reshape and lay flat to dry

3. Proper Storage Methods

- **Brushes:** Store them with the **bristles pointing UP** in a jar or roll them in a cloth. Never leave them standing on their bristles—they will bend and ruin.
- **Paper:** Keep drawing paper flat in a folder or under a book. Do not crumple it.

- **Paints and Tools:** Keep all tools in a box, kit, or bag. Store in a cool, dry place away from sun and small children.
- **Sharp Tools (e.g., sculpting tools):** Keep them covered or in a closed case for safety.

4. Responsibility and Consequences

Caring for tools is part of being a good artist. It shows responsibility.

- **Consequences of Poor Care:**
 - a. **Wasted Money:** Ruined brushes and dried-up paints must be replaced.
 - b. **Poor Results:** A dirty, hard brush will not make a good painting.
 - c. **Safety Hazards:** Left-out tools can be tripped over or cause cuts.

EVALUATION

1. Why must we wash paint brushes immediately after we finish painting?
2. How should you store your paintbrushes to keep their shape?
3. What can happen inside a pencil if you keep dropping it on the floor?
4. Name two tools you would need if you were going to paint a picture.
5. Why is it important to keep our art tools in one specific place?
6. What is one safety reason for putting away sharp tools after use?

ASSIGNMENT

1. **(Practical):** Make a simple tool holder from a recycled material (e.g., decorate an empty milk tin to hold pencils and brushes).
2. **(Written):** Write two important rules for everyone using the Art Corner in your classroom.
3. **(Oral/Procedure):** Explain to someone the steps you would take to clean a plastic palette after a painting lesson.

WEEK 11: REVISION

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Recall and contrast the definitions of life drawing and imaginative drawing.
2. Identify correct facial proportions and state the "head count" rule for body measurement.
3. Demonstrate understanding by creating a simple rhythmic pattern.
4. Discuss the importance of maintaining and storing art tools properly.

CONTENT

• Review of Drawing Concepts:

* **Life Drawing:** Drawing from a real subject in front of you. Uses observation, proportion (adult = 7-8 heads tall), and shading (highlights & shadows) to look 3D.

* **Imaginative Drawing:** Creating from your mind. Sources: stories, dreams, nature. Includes fantasy art and surrealism.

* **Portraits:** Eyes in the middle of the head. Profile view shows the side.

• Review of Creative Storytelling:

* **Storyboards** plan a story in pictures.

* **Character & Environment Design** create the who and where.

* **Colors show Mood** (Red=angry/excited, Blue=calm/sad).

• Review of Rhythm:

* **Rhythm** = pattern of sound/silence. **Beat** (pulse), **Tempo** (speed).

* **Body Percussion** uses the body to make rhythm.

* **Call & Response** is a musical conversation.

* **Nigerian Instruments:** Talking Drum, Shekere, Agogo.

• Review of Tool Care:

* Clean brushes with water and soap after use.

* Store brushes bristle-up.

* Care for tools to save money, get good results, and stay safe.

• **Practical Revision Activity:** The teacher will lead two quick activities: 1. *Drawing*: "Quickly draw the gesture of someone waving." 2. *Rhythm*: "As a class, perform this call and response clap pattern."

EVALUATION (Teacher will select and adapt questions from previous weeks, focusing on understanding. Examples:)

1. You want to draw a masquerade you saw at a festival. Which type of drawing will you do, and what materials will you need?
2. What is one common mistake in drawing a face, and how can you avoid it?
3. If you are creating a story about a brave farmer, what colors might you use in your drawing and why?
4. Clap the rhythm: Long, Short, Short (Clap, clap-clap).
5. Why should you never leave a paintbrush soaking in water for days?

ASSIGNMENT

1. **(Practical/Portfolio):** Collect your best three drawings from this term. Attach them together to make a small portfolio. Write your name and "Primary 6, First Term CCA" on the front.
2. **(Written Reflection):** Write three sentences about which topic you enjoyed the most this term (e.g., Life Drawing, Imaginative Drawing, or Rhythm). Explain why.
3. **(Study Preparation):** Review your notes and drawings from Weeks 1-10 to prepare for the end-of-term examination.

PRIMARY 6 CULTURAL AND CREATIVE ARTS SCHEME OF WORK

SECOND TERM

Week	Topic	Content
1	Fabric Decoration by Tie and Dye Methods I	History of tie and dye in Nigeria - Adire; Cultural significance; Materials needed - white fabric, dyes, rubber bands, strings, wax; Safety precautions with dyes; Basic tie and dye techniques - binding, knotting, folding, pleating; Understanding color theory in dyeing - primary colors, mixing, color wheel
2	Fabric Decoration by Tie and Dye Methods II	Advanced tying techniques - spiral, bull's eye, stripes, circles; Creating patterns and designs; Multiple color dyeing - layering colors; Batik basics - using wax resist; Shibori (Japanese tie-dye) introduction; Dyeing process - preparation, dyeing, rinsing, drying; Fixing colors; Creating functional items - t-shirts, bags, wall hangings
3	Fabric Decoration by Tie and Dye Methods III	Design planning - sketching intended patterns; Experimental techniques - marbling, ombre effects; Natural dyes vs synthetic dyes; Environmental considerations; Marketing tie and dye products; Entrepreneurship opportunities; Completing a tie and dye project; Display and evaluation; Cultural preservation through textile arts
4	Choral Singing I	Definition of choral singing - group singing in harmony; Types of choirs - children's choir, mixed choir, church choir; Voice parts - soprano, alto, tenor, bass (SATB); Finding your voice range; Vocal warm-ups and exercises; Breathing techniques; Posture for singing; Building vocal confidence
5	MIDTERM EXAMINATION	Assessment of topics covered in weeks 1-4
6	MIDTERM BREAK	Rest and relaxation period
7	Choral Singing II	Harmony singing - melody and parts; Reading simple choral music; Dynamics - loud, soft, crescendo, decrescendo; Tempo

		variations; Diction and articulation; Blend and balance in choir; Nigerian choral songs - traditional and contemporary; Patriotic songs and national anthem in harmony; Conducting basics - following the conductor
8	Choral Singing III	Repertoire building - learning multiple songs; Stage presence and performance; Choir discipline and etiquette; Dealing with stage fright; A cappella singing - singing without instruments; Microphone technique; Choir performances - formal and informal; Organizing a choral concert; Audience engagement; Recording choir performances
9	Theatrical Elements and Personnel	Elements of theatre - plot, character, theme, dialogue, spectacle, music; Theatre spaces - proscenium, thrust, arena, black box; Stage areas - upstage, downstage, stage left, stage right, center stage; Theatre personnel and their roles - director, producer, actors, stage manager, costume designer, set designer, lighting designer, sound engineer, makeup artist, props master
10	Care of Tools and Equipment in Performing Arts	Musical instruments care - cleaning, storage, maintenance; Theatre equipment - props, costumes, stage equipment; Sound and lighting equipment basics; Safety with electrical equipment; Proper storage of fabrics and costumes; Maintaining performance spaces; Responsibility and respect for shared resources; Equipment checklist and inventory
11	REVISION	Review of all topics covered; Tie and dye display; Choral performance practice; Theatre terminology review; Question and answer sessions
12	EXAMINATION	End of term assessment - theory and practical
13	CLOSING	Report card distribution; Vacation assignment; Choir performance; Art and craft exhibition

PRIMARY 6 CULTURAL AND CREATIVE ARTS LESSON NOTES

SECOND TERM

WEEK 1: FABRIC DECORATION BY TIE AND DYE METHODS I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define Tie and Dye in their own words.
2. Mention the local Nigerian name for tie and dye (Adire) and its cultural importance.
3. List and describe the use of four main materials needed for tie and dye.
4. Identify the three primary colours and demonstrate how to mix them to get secondary colours.

CONTENT

1. Meaning and History of Tie and Dye

Tie and Dye is a fun way of creating patterns on cloth by **preventing colour from reaching some parts**. You do this by tying, folding, or stitching the fabric very tightly before dipping it in dye. The tied parts stay white (or the original colour), while the loose parts soak up the dye, making beautiful designs.

- **Cultural Significance in Nigeria:** In Nigeria, especially among the Yoruba people, this art is famously called **Adire** (pronounced Ah-dee-reh). Adire cloth is more than just fabric; it is part of our culture. People wear specially designed Adire for important events like weddings, festivals (e.g., Eyo, New Yam festival), and naming ceremonies. It is a way of showing our beautiful heritage and skills.

1. Flat White Cloth

3. Dipped with String

2. Tied with String

4. Final Patterned Cloth

2. Materials Needed for Tie and Dye

You need simple, easy-to-find items:

- **Fabric:** **White 100% cotton cloth** is the best. Cotton is like a sponge; it sucks up the dye very well. An old white handkerchief, T-shirt, or pillowcase works perfectly.
- **Dye:** This is the coloured powder or liquid that gives the cloth its colour. We often use **reactive dyes** or **indigo** for Adire.
- **Resist Materials:** These are used to tie the cloth and block the dye. You can use:

- Raffia (from palm trees)
- Strong thread or twine
- Rubber bands (very easy for beginners)
- Small stones or seeds (wrapped inside the cloth)
- **Tools and Safety Gear:**
 - Plastic buckets or bowls (for mixing dye)
 - Hot water (usually handled by the teacher)
 - Stirring stick (like a wooden spoon)
 - **Plastic gloves** to protect your hands from stains.
 - **An apron or old clothes** to protect your uniform.

3. Safety Precautions (VERY IMPORTANT)

Working with dyes and hot water requires care.

1. **Always wear your gloves.** Dye can stain your skin for days.
2. **Do not put your face close to the dye powder.** It can be harmful if you breathe it in.
3. **Never touch or play with the hot water** used for mixing dye. Let your teacher handle it.
4. Work in a well-ventilated area or outside.

4. Basic Tying Techniques

There are many ways to tie. We will start with three simple ones:

- **Knotting:** Simply make a tight knot on a section of the cloth.
- **Pebbling:** Place a small stone or bean on the cloth, pull the fabric around it, and tie it tightly with string. This creates a circle.
- **Stripes:** Fold the cloth like a fan (accordion fold), then tie strings or rubber bands at different points along the fold.

5. Colour Theory: Creating All Colours

Artists know that just a few colours can make many others.

- **Primary Colours:** These are the **boss colours**. They cannot be created by mixing other colours. They are: **RED, YELLOW, and BLUE**.
- **Secondary Colours:** You make these by mixing two primary colours equally.
 - Red + Yellow = **ORANGE**
 - Yellow + Blue = **GREEN**
 - Blue + Red = **PURPLE (or VIOLET)**

EVALUATION

1. What is the main idea behind tie and dye? (To stop dye from reaching some parts of the cloth).
2. What is the Yoruba name for this art, and when do people wear it?
3. Why is a white cotton cloth better than a coloured nylon cloth for tie and dye?
4. Name two safe materials you can use to tie your cloth with.
5. If you mix yellow dye and blue dye, what new colour will you create?
6. Why must you wear gloves during the dyeing process?

ASSIGNMENT

1. **(Practical):** Bring a small, white cotton cloth (e.g., an old handkerchief) to the next class for our practical session.
2. **(Drawing):** Draw and colour a simple colour wheel. Label the three primary and three secondary colours.
3. **(Oral/Listing):** Look around your home and tell your parent three items you see that could be used as 'resist materials' for tying cloth (e.g., rubber band, strong thread from a sewing box).

WEEK 2: FABRIC DECORATION BY TIE AND DYE METHODS II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Demonstrate and describe how to create "Spiral" and "Bull's Eye" patterns.
2. Explain the key difference between Tie-Dye and Batik.
3. Describe the step-by-step process of dyeing fabric.
4. Create a simple tied pattern on their own piece of fabric.

CONTENT

1. Advanced Tying Techniques

Now, let's learn some popular patterns:

- **Spiral (Swirl Pattern):**
 - a. Lay your cloth flat on a table.
 - b. Pinch the very centre of the cloth with two fingers.
 - c. Start twisting the cloth around that centre point. Keep twisting until the whole cloth looks like a flat, round snail shell or a **swirled lollipop**.
 - d. Use 3 or 4 rubber bands to hold the shape, wrapping them around the spiral like slices of a pie.
- **Bull's Eye (Circle/Target Pattern):**
 - a. Pinch a point on the cloth and pull it up, like you are making a little fabric mountain.
 - b. Wrap a rubber band very tightly around the base of this "mountain". This will be the centre of your bull's eye.
 - c. Move down a little and wrap another rubber band. You can add more bands to create multiple circles.
- **Marbling (Crumple Technique):**
 - a. Simply crumple the entire cloth into a loose, random ball.

- b. Tie a few rubber bands around it in different directions. This creates random, stone-like patterns.

2. Introduction to Batik

Tie-Dye is not the only way to make patterns on cloth. **Batik** is another important method.

- **Main Difference:** In Batik, melted **wax** (not string) is used to block the dye. The artist uses a tool called a *tjanting* to draw with hot wax on the cloth. When the cloth is dyed, the waxed areas resist the colour. The wax is later removed with hot water or ironing.

3. The Dyeing Process: Step-by-Step

Here is what we will do in our practical class:

1. **Prepare the Fabric:** Wash your white cloth to remove any dirt or starch. This helps the dye soak in evenly.
2. **Tie Your Design:** Use your chosen technique (spiral, bull's eye, etc.) and tie it **very tightly**. If it's loose, dye will sneak in and spoil the pattern.
3. **Mix the Dye Bath:** (Teacher will do this). The dye powder is mixed with hot water and a fixative chemical (like Hydrosulphite) so the colour stays on the cloth.
4. **Dye the Cloth:** Wearing gloves, gently place your tied cloth into the dye bath. Push it down so it's fully covered. Leave it for 15-20 minutes.
5. **Rinse:** Take the cloth out and rinse it in a bucket of cold water until the water runs clear (not coloured). This removes excess dye.
6. **Untie and Dry:** Carefully cut the rubber bands or strings. Be amazed at your pattern! Open the cloth and hang it to dry in a **shady place**. Direct sun can fade the bright colours.

EVALUATION

1. To make a spiral pattern, what do you do after pinching the centre of the cloth?
2. What is used to resist the dye in Batik: wax or rubber bands?
3. Why is the first step to wash the fabric before dyeing it?
4. What should you do with the dyed cloth immediately after taking it out of the dye bath?
5. Why is it important to tie the string or rubber band very, very tight?

ASSIGNMENT

1. **(Practical):** Use the white cloth you brought. Practice creating a "Spiral" pattern on it using rubber bands. (We will dye it next week).
2. **(Listing):** List three useful items that can be made from tie-dyed fabric (e.g., head tie, pillow cover, tote bag).
3. **(Written):** In one sentence, explain why we rinse the fabric in cold water after dyeing.

WEEK 3: FABRIC DECORATION BY TIE AND DYE METHODS III

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Explain the importance of planning a design before starting.
2. Differentiate between Natural dyes and Synthetic dyes with examples.
3. Discuss simple ways to market and sell tie and dye products.
4. Display and discuss their finished tie and dye project.

CONTENT

1. Design Planning: Think Before You Tie!

A good artist plans. Before you tie your cloth, it is helpful to **sketch your idea** on paper.

- Ask yourself: Do I want circles (bull's eye)? Swirls (spiral)? Stripes?
- Which colours will I use? One colour? Two colours?
- Planning helps you avoid a messy, muddy-looking cloth and creates a beautiful, intentional design.

2. Natural Dyes vs. Synthetic Dyes

Dyes can come from nature or from a factory.

- **Natural Dyes:** Made from plants, fruits, vegetables, and even insects!
 - **Examples:** Turmeric or onion skins (yellow/brown), indigo leaves (blue), hibiscus flowers (red/pink), avocado pits (pink).
 - **Advantages:** They are environmentally friendly and safe.
 - **Disadvantages:** Colours are often softer and can fade faster with washing and sun.
- **Synthetic Dyes:** Made from chemicals in a laboratory.
 - **Examples:** The bright dye powders we often use in class (e.g., Procion MX dyes).
 - **Advantages:** They give very **bright, strong colours** that last a long time.
 - **Disadvantages:** The waste water can harm rivers and soil if not disposed of properly.

NATURAL VS. SYNTHETIC DYES	
NATURAL DYES	SYNTETIC DYES
 Indigo (Blue)  Turmeric (Yellow)  Hibicus (Red)	 Chemical Production  Bright, Bold Colors

3. Entrepreneurship: Turning Art into Business Tie and Dye is not just art; it can be a **small business** (entrepreneurship). You can create and sell items to make money.

- **Products to Sell:** Trendy backpacks, customised school T-shirts for clubs, table runners, wrappers (iro), and shirts.
- **How to Market (Advertise):**
 - Show your best work to friends and family.
 - Display items at school events or local markets.
 - Take clear, good pictures of your products.

- **Pricing:** The price should cover the cost of your cloth, dye, and time, plus a little extra as profit.

4. Project Completion and Display

Today, we will complete our dyeing process! After untying and drying your cloth, you can iron it to make it smooth and neat. We will then have a **class exhibition** where everyone displays their work. Look at your friends' designs—see how creative they are!

EVALUATION

1. Why is it a good idea to draw your design on paper first?
2. Name one plant in Nigeria that can be used to make a natural dye.
3. Which type of dye gives the brightest, longest-lasting colours: natural or synthetic?
4. If you made a beautiful tie-dye head tie, who are two groups of people you could try to sell it to?
5. Why shouldn't we pour leftover synthetic dye water down the kitchen sink?

ASSIGNMENT

1. **(Drawing/Design):** Draw a sketch of a simple T-shirt. On it, sketch the tie-dye pattern you would like to create one day.
2. **(Written - Advertisement):** Write a short, catchy advertisement for your imaginary tie-dye business. E.g., "Brighten your day with Unique Handmade Adire! Get yours now!"
3. **(Listing):** List two reasons why synthetic dyes are popular for tie and dye projects.

WEEK 4: CHORAL SINGING I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define choral singing and contrast it with solo singing.
2. List and describe the four main voice parts in a choir (SATB).
3. Demonstrate the correct standing and breathing posture for singing.
4. Perform simple breathing exercises to support the voice.

CONTENT

1. What is Choral Singing?

Choral singing is when a group of singers, called a **choir**, performs music together. The key word is **together**. It is not about one person being the loudest; it is about blending voices to create one beautiful, harmonious sound. You must learn to listen to others while you sing.

2. Types of Choirs Choirs can be formed in different ways:

- **Children's Choir:** Made up of boys and girls. Their voices are often called **treble** voices.
- **Mixed Choir:** The most common type. It has both male and female singers.
- **Male Voice Choir:** Only men and boys.
- **Female Voice Choir:** Only women and girls.

3. Voice Parts in a Mixed Choir (SATB)

In a mixed choir, voices are grouped into four parts based on their **pitch** (how high or low they sing). We use the short form **SATB**.

- **Soprano (S):** The highest female voice. They often sing the **melody** (the main tune you remember).
- **Alto (A):** The lower female voice. They sing the **harmony** that supports and enriches the melody.
- **Tenor (T):** The higher male voice. They also sing harmony, usually above the basses.
- **Bass (B):** The lowest male voice. They sing the foundation notes, like the deep roots of a tree.

4. Posture and Breathing: The Singer's Foundation

To sing well, you need to stand well and breathe correctly.

- **Correct Singing Posture:**
 - a. Stand with your feet shoulder-width apart, one slightly in front of the other for balance.
 - b. Knees should be relaxed, not locked.

- c. Stand tall, like a string is pulling your head up. Shoulders should be down and relaxed.
- d. Look forward. Imagine you are singing to someone at the back of the room.
- **Breathing from the Diaphragm:** Good singers don't just breathe with their chests. They use their **diaphragm** (a muscle below your lungs).
 - **Exercise:** Place your hands on your tummy. Breathe in deeply through your nose and feel your tummy push your hands out. Breathe out slowly with a "ssss" sound. Your shoulders should not go up and down.

EVALUATION

1. What is the main difference between singing in a choir and singing alone?
2. What does "SATB" stand for?
3. Which voice part usually sings the highest notes in a mixed choir?
4. Which voice part sings the lowest, foundational notes?
5. Show me the correct standing posture for singing.
6. Where should you feel your breath moving when you breathe correctly for singing?
(Your tummy).

ASSIGNMENT

1. **(Practical):** Stand in front of a mirror at home. Practice your singing posture for one minute. Say your name out loud while maintaining the posture.
2. **(Listening/Oral):** Listen to any choral music (e.g., a church choir on the radio). Try to identify if you can hear high voices (sopranos) and low voices (basses).
3. **(Written):** Write down the four voice parts of a choir and write one sentence to describe the Alto voice.

WEEK: 5 & 6: MIDTERM EXAMINATION AND BREAK

WEEK 7: CHORAL SINGING II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define harmony and differentiate it from melody.
2. Explain the terms Dynamics, Crescendo, and Decrescendo.
3. Demonstrate clear diction (pronunciation) while singing a familiar song.
4. Follow simple basic hand signals from a conductor.

CONTENT

1. Harmony: Singing Together Beautifully

Harmony is the combination of different musical notes sung or played at the same time. It is what makes choir music sound rich and full.

- **Melody:** This is the main tune, the part you whistle. In a choir, the Sopranos often sing this.
- **Harmony:** These are the other notes that the Altos, Tenors, and Basses sing. They fit under, over, and around the melody like a musical puzzle, making it sound wonderful.

2. Dynamics: The Volume of Music

Dynamics tell us how **loud** (forte) or **soft** (piano) to sing. Changing dynamics makes music exciting!

- **Forte (f):** Means "loud." Sing with strong, full voices.
- **Piano (p):** Means "soft." Sing gently and quietly.
- **Crescendo (<):** A gradual increase in volume. Start soft and get louder, like an approaching train.
- **Decrescendo (>):** A gradual decrease in volume. Start loud and get softer, like a train moving away.

3. Diction and Articulation: Singing Clearly

Diction means pronouncing words clearly so the audience can understand the song's story or message.

- Open your mouth wider than when you talk.
- Pay special attention to the **end of words** (like "sing" not "sin").
- **Articulation** is about making consonants crisp (T, D, P, B, K). For example, sing "Praise" with a strong "P" sound.

4. The Conductor: The Leader of the Choir

The **conductor** uses hand gestures and facial expressions to lead the choir.

- **The Prep Beat:** The conductor raises their hands to tell you to get ready and breathe in.
- **The Downbeat:** The first downward motion tells you when to start singing.
- **Cut-Off:** A closing or pulling-in motion of the hand tells you when to stop.
- **Dynamics:** Hands open wide for loud (forte), hands close together for soft (piano).

EVALUATION

1. If the Altos are singing different notes from the Sopranos but it sounds good, what are they creating?
2. What is the musical word for getting gradually louder?
3. Why is it important for a choir to have good diction?
4. Who uses hand signals to lead the choir's volume and timing?
5. Sing the first line of "Nigeria, We Hail Thee" first piano (softly), then forte (loudly).

ASSIGNMENT

1. **(Written):** Write the definitions for: 1. **Piano** (in music). 2. **Forte** (in music).

2. **(Practical):** Practice singing the first stanza of the National Anthem. Focus on opening your mouth wide and pronouncing every word clearly. Record yourself if possible.
3. **(Drawing):** Draw a simple sketch of a conductor showing the choir to sing softly.

WEEK 8: CHORAL SINGING III

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define "A Cappella" singing.
2. List three important rules of choir etiquette and discipline.
3. Suggest two ways to overcome stage fright.
4. Describe how to hold and use a microphone properly.

CONTENT

1. Repertoire and Stage Presence

- **Repertoire:** This is the collection of songs a choir has learned and is ready to perform. A good choir has a varied repertoire—fast songs, slow songs, songs in different languages.
- **Stage Presence:** This is how you look and act while performing. It includes:
 - **Smiling** (when appropriate).
 - **Standing still** and not fidgeting.
 - **Making eye contact** with the audience or the conductor.
 - Looking confident and enjoying the music.

2. A Cappella Singing

A Cappella (pronounced ah-kah-pel-ah) is singing **without any instrumental accompaniment**—no piano, no drums, no guitar. The choir provides all the music and rhythm with their voices alone. This requires excellent listening skills and teamwork to stay perfectly in tune and in time.

3. Choir Discipline and Etiquette

A choir is a team. Good discipline makes rehearsals productive and performances successful.

1. **Be Punctual:** Arrive early for practice. Latecomers disturb everyone.
2. **Be Silent:** Do not talk when the conductor or another section is working. Listen.
3. **Pay Attention:** Keep your eyes on the conductor. Follow instructions quickly.
4. **Be Prepared:** Bring your music (if you have it) and a pencil to mark instructions.

5. **Be Respectful:** Respect your conductor, the pianist, and fellow choir members.

4. Managing Stage Fright and Using a Microphone

- **Stage Fright:** It is normal to feel nervous before performing.
 - **How to cope:** Take slow, deep breaths. Be very well-prepared (know your parts). Focus on sharing the message of the song with the audience, not on your fear.
- **Microphone Technique:** If you use a mic, do it correctly.
 - Hold the mic by its **handle**. Never cover the head (top) with your hand.
 - Hold it about a **fist's distance** from your mouth.
 - Speak or sing **normally**; do not shout. The microphone will make you loud.
 - If the mic is on a stand, adjust the stand to your height before you start.

EVALUATION

1. What does "A Cappella" mean?
2. What is one important rule about timekeeping for a choir member?
3. Why should choir members keep their eyes on the conductor during a performance?
4. What is one thing you can do backstage to calm your nerves before singing?
5. If you are singing with a handheld microphone, how far should it be from your mouth?

ASSIGNMENT

1. **(Listing):** List three songs you think would be good for your class choir to learn and sing. They can be folk songs, patriotic songs, or school songs.
2. **(Written):** Write a short paragraph (3-4 sentences) on why discipline and teamwork are important for a choir's success.
3. **(Observation/Oral):** If you can, watch a video of a choir performance (online or on TV). Tell your teacher one thing you noticed about their stage presence or discipline.

WEEK 9: THEATRICAL ELEMENTS AND PERSONNEL

OBJECTIVES By the end of the lesson, pupils should be able to:

1. List and describe four key elements of drama/theatre.
2. Identify different areas on a stage (Upstage, Downstage, Center Stage).
3. Differentiate between the roles of a Director and a Producer.
4. Mention the role of a Costume Designer and a Set Designer.

CONTENT

1. Key Elements of Theatre (Drama)

A good play is built on these important parts:

- **Plot:** The **storyline**. What happens first, next, and last? It is the sequence of events.
- **Character:** The **people (or animals/things)** in the story. They have personalities, feelings, and goals.
- **Dialogue:** The **words spoken** by the characters. This is how they talk to each other and tell the story.
- **Spectacle:** Everything the audience **sees**—the visual parts. This includes costumes, makeup, sets, lighting, and special effects. It makes the play exciting to watch!

2. Stage Areas: Knowing Where to Go

The stage is divided into areas so the director can tell actors where to move. Imagine the stage as a big square.

- **Center Stage:** The very middle. This is a strong, important spot.
- **Downstage:** The area **closest to the audience**. When you are here, the audience can see your face clearly.
- **Upstage:** The area **farthest from the audience** (towards the back wall).
- **Stage Left & Stage Right:** These are from the **actor's point of view** when they are facing the audience. *Your* left is **Stage Left**.

3. Theatre Personnel: The Production Team

Putting on a play is a team effort. Many people have special jobs:

- **Playwright:** The writer. They create the script (the written play).
- **Director:** The **creative leader**. They interpret the script, guide the actors on how to speak and move, and work with all designers to create the overall vision.
- **Producer:** The **business and money manager**. They find the money to pay for the play, rent the theatre, and handle tickets and advertising.

- **Stage Manager:** The **organizer during the show**. They call for lights and sound cues, make sure actors are ready, and solve any backstage problems.
- **Costume Designer:** Decides what each character will wear to show their personality, job, and the time period of the play.
- **Set Designer:** Designs and builds the **scenery and background**—the rooms, forests, or streets where the action happens.

EVALUATION

1. Which element of theatre refers to the order of events in the story?
2. If your teacher tells you to move "Downstage," should you move towards the audience or away from them?
3. Who is the person who writes the script for the play?
4. What is the main job of the Costume Designer?
5. Who is in charge of the creative side of the play, telling actors how to perform?

ASSIGNMENT

1. **(Drawing):** Draw a simple diagram of a stage and label these three areas: **Center Stage, Downstage, Upstage**.
2. **(Written Reflection):** If your class were to perform a play, which backstage role (e.g., Director, Costume Designer, Stage Manager) would you be most interested in and why? (2-3 sentences).
3. **(Practical/Writing):** Write a short, 4-line dialogue between two characters. One is a buyer at a market, the other is a seller arguing about the price of bananas.

WEEK 10: CARE OF TOOLS AND EQUIPMENT IN PERFORMING ARTS

OBJECTIVES By the end of the lesson, pupils should be able to:

1. List three different categories of equipment used in performing arts.
2. Explain how to properly care for and store costumes.
3. State two important safety rules for handling electrical equipment (lights, microphones).
4. Discuss the importance of respecting shared tools and resources.

CONTENT

1. Types of Performing Arts Equipment

Performing arts use many special tools:

- **Musical Instruments:** Drums (like the conga or talking drum), keyboards, recorders, guitars.
- **Costumes:** The special clothing worn by actors and dancers for performances.
- **Props (Properties):** Objects that actors use on stage—a king's crown, a letter, a basket, a fake sword.
- **Technical Equipment:** This makes the show look and sound good. Includes microphones, speakers, amplifiers, stage lights, and their cables.

2. Care and Maintenance of Equipment

Taking care of equipment shows you are a responsible performer and saves the school money.

- **Musical Instruments:**
 - Handle them gently. Do not bang drums unnecessarily.
 - Keep them in their cases or covered when not in use to protect from dust and damage.
 - Report any broken strings or parts to the teacher immediately.
- **Costumes:**
 - Handle them carefully to avoid tears.

- After use, they should be **hung up properly** on hangers, not thrown on the floor. This prevents wrinkles and keeps them neat for the next performer.
- Some costumes may need to be washed or dry-cleaned.
- **Props:**
 - Use props only for their intended purpose during the play.
 - After the scene, return them immediately to the **props table** or box. Do not take them home or play with them as toys.

3. Safety with Electrical Equipment

Electricity can be dangerous if not respected.

1. **Never touch plugs, sockets, or cables with wet hands.**
2. **Do not pull a plug out by yanking the cable.** Always pull by the sturdy plug head.
3. Make sure cables are taped down or out of walkways so no one trips over them.
4. Turn off amplifiers and mixers when not in use to prevent overheating.

4. Responsibility for Shared Resources

School equipment is for **everyone** to use. If you break a microphone because you were playing with it, the next class cannot use it for their performance. Taking care of shared tools is part of being a good member of the school community. It ensures that everyone gets a chance to create and perform.

EVALUATION

1. What is the difference between a *costume* and a *prop*? Give one example of each.
2. How should you store a fragile instrument like a recorder after using it?
3. Why is it important to hang up costumes instead of folding them in a bag?
4. What is the safe way to unplug an electrical device?
5. Why should we all take care of school performance equipment even if we didn't personally buy it?

ASSIGNMENT

1. **(Practical/Planning):** Create a short "Closing Checklist" for the drama club. List three things that must be done after every rehearsal (e.g., 1. Hang all costumes. 2. Put props in the box. 3. Turn off and unplug the amplifier.)
2. **(Drawing):** Draw your favourite musical instrument. Around it, draw its case or show how it should be stored safely.
3. **(Written - Rule Making):** Write one clear rule for the "Costume Room" that would help keep the costumes in good condition for everyone.

WEEK 11: REVISION

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Recall key terms, definitions, and processes from Tie-Dye, Choral Singing, and Theatre.
2. Demonstrate a practical skill learned this term (e.g., explaining a tying technique or demonstrating singing posture).
3. Answer application-based questions confidently in preparation for the terminal examination.

CONTENT

- **Review of Tie and Dye (Adire):**
 - Meaning and cultural importance.
 - Materials and **safety precautions**.
 - Techniques: Spiral, Bull's Eye, Marbling.
 - The dyeing process steps (Tie > Dye > Rinse > Untie > Dry).
 - Natural vs. Synthetic dyes.
 - Entrepreneurship ideas.
- **Review of Choral Singing:**
 - Definition and types of choirs.
 - Voice parts (**SATB**).
 - Correct posture and diaphragm breathing.
 - **Harmony** vs. Melody.
 - **Dynamics** (Forte, Piano, Crescendo, Decrescendo).
 - The role of the Conductor.
 - Choir discipline and stage fright management.
- **Review of Theatre (Drama):**
 - Key elements: Plot, Character, Dialogue, Spectacle.
 - **Stage areas** (Upstage, Downstage, Centre Stage).

- Key personnel: Playwright, Director, Producer, Stage Manager, Designers.
- **Review of Tool Care:**
 - Care for costumes, props, instruments, and electrical gear.
 - Importance of responsibility for shared resources.
- **Practical Revision Session:** The teacher will lead quick, interactive activities:
 - a. *Tie-Dye Quiz*: "Show me with your hands how you would create a bull's eye pattern."
 - b. *Singing Drill*: Practice breathing from the diaphragm together.
 - c. *Theatre Game*: Point to different areas of an imaginary stage when the teacher calls them out.

EVALUATION (The teacher will select and adapt questions from Weeks 1-10, focusing on understanding and application. Examples:)

1. You want to create a tie-dye cloth with green circles. What two primary colours will you need to mix, and what tying technique will you use?
2. In a choir, if the Sopranos are singing the main tune, what are the Altos most likely singing?
3. During a play, an actor needs to pick up a letter from a table. Is that letter a costume or a prop?
4. Why should a microphone cable be taped to the floor backstage?
5. If you are on stage and the conductor makes a wide opening gesture with their arms, what are they likely telling you to do? (Sing louder/forte).

ASSIGNMENT

1. **(Study Preparation):** Organize your notes from this term. Read through them carefully to prepare for the end-of-term examination.
2. **(Practical/Portfolio):** Ensure your finished and dried tie-dye cloth is neatly pressed (ironed with help) and ready to be submitted for final assessment.

3. **(Written Reflection):** Write down which area you enjoyed most this term: **Fabric Decoration (Visual Art)** or **Choral Singing/Theatre (Performing Art)**. Give two reasons for your choice.

PRIMARY 6 CULTURAL AND CREATIVE ARTS SCHEME OF WORK

THIRD TERM

Week	Topic	Content
1	Casting and Rehearsal I	Meaning of casting - selecting actors for roles; Audition process - preparation, performance, evaluation; Character analysis for auditions; Types of roles - lead, supporting, ensemble; Casting considerations - suitability, ability, commitment; Callbacks and final casting; Dealing with rejection; Ensemble building and team work
2	Casting and Rehearsal II	The rehearsal process; Types of rehearsals - table reading, blocking, run-through, dress rehearsal; Director's role in rehearsals; Learning lines and memorization techniques; Blocking - stage movement and positioning; Character development through rehearsal; Rehearsal etiquette and discipline; Problem-solving during rehearsals; Technical rehearsals
3	Introduction to Play Production I	Stages of play production - pre-production, production, post-production; Selecting or writing a play; Script analysis; Production team formation and roles; Budgeting and resource allocation; Creating production timeline; Publicity and marketing - posters, programs, announcements; Ticket sales and audience building
4	Introduction to Play Production II	Set design and construction; Costume design and creation; Props collection and management; Lighting design basics; Sound design - music and effects; Makeup design for stage; Program design; Front of house operations; Stage management during performance; Post-production - evaluation, documentation, celebration
5	MIDTERM EXAMINATION	Assessment of topics covered in weeks 1-4

6	MIDTERM BREAK	Rest and relaxation period
7	Forms of Dance I	Categories of dance - social, ceremonial, recreational, theatrical; Traditional Nigerian dances - examples from different ethnic groups (Bata, Swange, Nkwa, Atilogwu, Ekombi); Dance elements - body, space, time, energy, relationship; Dance movements - locomotor and non-locomotor; Creating simple choreography; Cultural significance of dances
8	Forms of Dance II	Modern dance forms - contemporary, hip-hop, jazz, ballet basics; Fusion dance - combining traditional and modern; Dance notation basics; Group formations and patterns; Dance improvisation; Storytelling through dance; Music and dance integration; Costume in dance; Performance spaces for dance
9	Forms of Dance III & Dance Performance Project	Dance performance preparation; Warm-up and conditioning; Synchronization in group dance; Facial expressions and gestures; Dance and cultural identity; Creating a dance performance - choreography, music selection, costume, rehearsal, performance; Dance documentation - video recording; Evaluating dance performances; Dance as career option
10	Recycling in Arts and Crafts	Meaning and importance of recycling; Environmental benefits; Types of recyclable materials - paper, plastic, metal, fabric, glass; Safety in handling recyclable materials; Cleaning and preparing materials; Creative uses of recycled materials - sculptures, jewelry, decorative items, functional objects, costumes and props; Nigerian artists using recycled materials; Upcycling vs recycling
11	Comprehensive Review and Final Projects	Integration of all topics learned; Creating a comprehensive arts portfolio; Preparing final performances - choir, dance, drama; Exhibition preparation - displaying visual arts; Reflection on learning journey; Arts in secondary school - what to expect;

		Career opportunities in arts - fine artist, graphic designer, fashion designer, musician, dancer, actor, director, art teacher; Life skills from CCA - creativity, teamwork, confidence, cultural awareness
12	EXAMINATION	End of term and final primary school assessment - comprehensive theory and practical
13	CLOSING	Graduation ceremony; Final arts exhibition and performance showcase; Report cards; Awards for outstanding arts achievements; Celebration of creativity; Secondary school preparation

PRIMARY 6 CULTURAL AND CREATIVE ARTS LESSON NOTES

THIRD TERM

WEEK 1: CASTING AND REHEARSAL I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define the term ‘casting’ in drama and relate it to a familiar activity.
2. Explain the purpose and process of an audition.
3. Identify and describe the different types of roles in a play (Lead, Supporting, Ensemble).
4. List three important qualities directors look for during casting.

CONTENT

1. Meaning of Casting

Casting is the process of selecting actors to play the different characters in a play or drama. It is like a football coach choosing who will be the goalkeeper, defender, or striker. The director must find the right person whose look, voice, and ability match the character in the story. Good casting makes the play believable and exciting to watch.

2. The Audition Process: The Actor’s ‘Interview’

An **audition** is how actors try out for a role. It is like a special test or interview.

- **What happens:** An actor is given a short piece of the script (called ‘sides’) to read. They perform it in front of the director, sometimes with other actors.
- **Purpose:** The director watches to see:
 - Can the actor speak clearly and loudly?
 - Can they show feelings (happy, sad, angry) with their face and voice?
 - Do they look and sound like the character? (For example, a tall, strong person might be cast as a warrior).
- It is normal to feel nervous, but being prepared is the key!

The Audition Process

3. Types of Roles in a Play

Every character in a play has a job to do in telling the story.

- **Lead Role (Main Character):** This is the most important character. The whole story revolves around them. Examples: the hero who saves the village, the princess in a fairy tale, or the clever child who solves a problem.
- **Supporting Role:** These characters help or challenge the main character. They are very important for the plot.

- **Example:** The main character's best friend who gives advice.
- **Example:** The villain who causes trouble.
- **Ensemble (Crowd or Chorus):** These are the group characters who make the world of the play feel real. They might be villagers at a market, soldiers in an army, or students in a school play. Even without speaking lines, their presence is crucial.

4. What Directors Look For During Casting

The director does not just pick their friends. They look for specific qualities:

1. **Suitability:** Does the actor fit the character's age, personality, and look described in the script?
2. **Talent and Ability:** Can the actor perform well? This includes clear speech (articulation), good memory for lines, and the ability to express emotions.
3. **Commitment and Discipline:** Will the actor come to all rehearsals on time? Will they learn their lines and follow the director's instructions? A reliable actor is very valuable.

EVALUATION

1. If you were directing a play about a wise king, what is the process of choosing an actor to play the king called?
2. Why is an audition important for both the actor and the director?
3. In a story about a brave farmer, who would be the 'Lead Role'?
4. What do we call the group of actors who play the villagers celebrating at the farmer's wedding?
5. If two actors are equally good at acting, why might a director choose the one who is always on time for practice?

ASSIGNMENT

1. **(Written):** Imagine you are a character in a play. Write a short description of yourself (e.g., "I am a playful market trader who loves to tell jokes").
2. **(Oral/Listing):** Tell a family member three things you should do to prepare for an audition (e.g., practice reading aloud, learn the lines, dress neatly).
3. **(Written):** In one or two sentences, explain why 'commitment' is just as important as 'talent' for an actor in a school play.

WEEK 2: CASTING AND REHEARSAL II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define rehearsal and state its main goal.
2. Differentiate between a 'Table Reading' and a 'Dress Rehearsal.'
3. Explain the term 'Blocking' and its importance.
4. State two essential rules of rehearsal etiquette (discipline).

CONTENT

1. The Rehearsal Process: Practicing to Perfect

A **rehearsal** is a practice session where actors, under the director's guidance, prepare the play for performance. It is where you make mistakes, learn from them, and polish the show until it shines. The goal is to be so prepared that you can perform confidently for an audience.

2. Types of Rehearsals: Step-by-Step

Rehearsals happen in stages, from simple to complex:

- **Table Reading:** The **first meeting**. Actors sit around a table with the director and read the entire script aloud. No acting yet! The focus is on understanding the story, your character, and how your lines sound.
- **Blocking Rehearsal:** This is when **movement is added**. The director tells each actor exactly where to stand, sit, walk, and enter/exit on the stage. This planning prevents collisions and ensures the audience can see everything important.
- **Run-Through:** Actors perform the entire play (or a large section) **without stopping**, just like the real show. This helps with building stamina and seeing how all the parts flow together.
- **Dress Rehearsal:** The **final practice**. Actors wear full costumes and makeup, use all props and real lighting/sound effects. It is a complete simulation of the performance to fix any last problems.

1. Table Reading

2. Blocking

3. Run-Through

4. Dress Rehearsal

3. Understanding 'Blocking': Stage Traffic Rules

Blocking is the detailed plan of all actors' movements on stage. Think of it as a map or choreography for actors instead of dancers.

- **Why it's important:** It ensures actors are not blocking each other from the audience's view. It helps create meaningful pictures that tell the story. The director might say, "On this line, you cross downstage left to the chair."

4. Rehearsal Etiquette: The Rules of the Room

Good behaviour during rehearsal shows respect for everyone's time and hard work.

1. **Punctuality:** Arrive early and be ready to start. Being late holds up the whole team.
2. **Focus and Silence:** When you are not on stage, be quiet. Listen to the director and watch others rehearse. Do not play or chat at the back.
3. **Respect:** Follow the director's instructions. Be supportive of your fellow actors. Bring a pencil to note your blocking in your script.

EVALUATION

1. What is the main purpose of holding many rehearsals before a play?
2. During which type of rehearsal do actors first hear how the whole story sounds?

3. What makes a Dress Rehearsal different from a normal Run-Through?
4. What does the term 'blocking' refer to in drama?
5. Why is it disruptive to talk while other actors are practicing their scene?

ASSIGNMENT

1. **(Drawing):** Draw a simple diagram of a stage (a rectangle). Mark with an 'X' where an actor playing a teacher standing at a blackboard might be positioned (Centre Stage).
2. **(Written):** Write down two examples of bad rehearsal habits (e.g., forgetting your script, using a phone during practice).
3. **(Oral/Explanation):** Explain to someone why actors must know all their lines *before* the Dress Rehearsal.

WEEK 3: INTRODUCTION TO PLAY PRODUCTION I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. List and describe the three main stages of play production.
2. Explain the key activities that happen during the 'Pre-production' stage.
3. Identify the role of the Playwright and the Producer.
4. Mention two creative ways to market or publicize a school play.

CONTENT

1. The Three Stages of Play Production

Putting on a play is a big project that happens in three clear phases:

- **Pre-production:** The **PLANNING** stage (everything before rehearsals start).
- **Production:** The **DOING** stage (rehearsals and the actual performances).
- **Post-production:** The **WRAPPING UP** stage (what happens after the final show).

2. Pre-Production: The Foundation

This is the most important planning phase. If pre-production is weak, the whole play can suffer.

- **Selecting a Script:** Choosing the right story. Is it interesting? Do we have enough actors? Is it suitable for our audience (school children, parents)?
- **Script Analysis:** The director and team read the play deeply to understand its message (theme), characters, and setting.
- **Budgeting:** Calculating all costs. How much money is needed for costumes, set materials (wood, paint), makeup, posters, and hall rental? The producer finds this money.
- **Assembling the Team:** Choosing the director, costume designer, set designer, and stage manager.
- **Casting:** Holding auditions to select the actors.

3. Key Production Team Roles

- **Playwright:** The **writer**. They create the blueprint—the script—with all the dialogue and basic instructions.
- **Producer:** The **manager and financier**. They handle the business side: budget, fundraising, booking the venue, printing tickets, and solving practical problems.
- **Director:** The **creative leader**. They bring the script to life by guiding the actors' performances and unifying the work of all designers (set, costume, light).

Theatre Production Hierarchy

4. Publicity and Marketing: Filling the Seats!

A great play needs an audience. Marketing is how we tell people about it.

- **Posters:** Colourful, eye-catching posters placed on school noticeboards, in the market, or at local shops.
- **Announcements:** Making announcements during school assembly or at local community gatherings.
- **Social Media:** If allowed, sharing information on parent WhatsApp groups or community pages.
- **Printed Programmes:** A small booklet given to the audience with the cast list, scene order, and thank-you notes.

EVALUATION

1. Name the three stages of play production in order.

2. During which stage would you calculate how much paint to buy for the scenery?
3. Whose job is it to write the original story and dialogue for the play?
4. If there is no money to buy costume fabric, which member of the team is responsible for solving that problem?
5. Besides telling your family, what is one way to advertise your school play to the local community?

ASSIGNMENT

1. **(Practical/Design):** Design a colourful A4 poster for a school play titled “**The Lost Treasure of Amina.**” Include the date, time, venue (School Hall), and an exciting visual.
2. **(Listing):** List three items or services you might need to spend money on when producing a simple play (e.g., fabric for costumes, wood for the set, sound equipment rental).
3. **(Written):** Write one clear sentence that describes the difference between a Playwright and a Director.

WEEK 4: INTRODUCTION TO PLAY PRODUCTION II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define Set Design and Costume Design and explain their purposes.
2. Explain the function of Props and how they differ from costumes.
3. Describe the crucial role of the Stage Manager during a performance.
4. List two important activities done during the Post-production stage.

CONTENT

1. Design Elements: Creating the World of the Play

Designers make the play visually believable.

- **Set Design:** This is creating the **physical environment** where the action happens. A set designer uses materials like wood, cardboard, and paint to build scenery that looks like a palace, a forest, a modern house, or a village square.
- **Costume Design:** This involves planning and creating the **clothing and accessories** worn by the actors. Costumes instantly tell us about a character's job, personality, social status, and the time period. A king wears a crown and rich robes; a farmer wears simple, rough clothes.
- **Props (Properties):** These are **objects that actors handle** on stage. They can be **hand props** (a sword, a letter, a mobile phone) or **set props** (a chair, a table, a lamp). Props are different from costumes because actors hold or use them; they don't wear them.

2. The Power of Lighting and Sound

- **Lighting Design:** Lights do more than help us see. They show the time of day (bright for day, blue for night), create mood (bright colours for happiness, shadows for fear), and highlight important characters.
- **Sound Design and Music:** This includes sound effects (rain, thunder, doorbell) and music. Music sets the emotional tone and can signal the start of a scene or the end of the play.

3. The Stage Manager: The Backstage Captain

The Stage Manager (SM) is in charge of everything backstage **during the performance**.

- **They call the cues:** Using a headset, they tell the light and sound operators when to go.
- **They manage actors:** They ensure actors are quiet, in costume, and ready for their entrances.
- **They solve problems:** If a prop breaks or an actor is late, the SM finds a solution quickly. The show must go on!

4. Post-Production: Closing the Show

After the final curtain call, the work is not finished.

1. **Strike the Set:** Carefully take apart and remove all scenery, lights, and equipment from the stage.
2. **Clean and Store:** Clean and repair costumes for storage. Sort and box all props. Return any borrowed items.
3. **Evaluation Meeting:** The team meets to discuss what went well and what could be improved for next time. This is a learning moment.

EVALUATION

1. What is the difference between a 'set' and a 'costume'?
2. If an actor uses a walking stick on stage, is that a costume or a prop?
3. How does a costume help the audience understand a character immediately?
4. During the show, who is responsible for telling an actor hiding backstage that it is time for them to enter?
5. Why is it important to have an evaluation meeting after the play is over?

ASSIGNMENT

1. **(Drawing):** Draw the costume for a **"Village Storyteller."** Label the different parts (e.g., colourful hat, patterned gown, beads).
2. **(Listing):** List three props you would need for a play scene set in a **modern classroom**.
3. **(Written):** In one sentence, explain why lighting is important in a play (besides letting the audience see).

WEEK: 5 & 6: MIDTERM EXAMINATION AND BREAK

WEEK 7: FORMS OF DANCE I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Identify and give examples of the two main categories of dance.
2. List three traditional Nigerian dances and name their ethnic group of origin.
3. Mention and briefly explain the five basic elements of dance.
4. Differentiate between locomotor and non-locomotor movements with examples.

CONTENT

1. Categories of Dance: Why Do We Dance?

People dance for different reasons, which gives us two main categories:

- **Traditional/Ceremonial Dance:** Connected to **culture, religion, and rituals**. Performed during festivals, weddings, funerals, or to honour gods and ancestors. Examples: Masquerade dances, war dances, harvest dances.
- **Social/Recreational Dance:** Done for **fun, entertainment, and socializing**. This includes dancing at parties, weddings, clubs, and in contemporary music videos.

2. A Tour of Nigerian Traditional Dances

Nigeria is rich with diverse traditional dances, each with unique style, rhythm, and costume.

- **Bata Dance (Yoruba):** A vigorous, acrobatic dance often performed for the Sango deity. It involves fast footwork and is accompanied by the Bata drum.
- **Atilogwu Dance (Igbo):** Known as the “Acrobatic Dance.” It involves high jumps, flips, and very fast, energetic movements. It displays strength and agility.
- **Swange Dance (Tiv):** A graceful, fluid dance with circular hip movements. Dancers seem to glide. It is a social dance for enjoyment.
- **Ekombi Dance (Efik/Ibibio):** A graceful dance mimicking the movement of ocean waves. Dancers use flowing hand and body movements.
- **Koroso Dance (Hausa/Fulani):** Dancers wear rattles (*koroso*) on their ankles and perform sharp, rhythmic steps that create a percussive sound.

3. The Five Elements of Dance (The Dance Alphabet)

Every dance, no matter the style, is built using these five elements:

1. **Body:** *What* is moving? (Arms, legs, head, whole body).
2. **Space:** *Where* are you moving? (Forward, backward, in a circle, high, low).
3. **Time:** *When* are you moving? (Fast, slow, to the beat, pausing).
4. **Energy:** *How* are you moving? (Strong/powerful, light/gentle, smooth, sharp).
5. **Relationship:** Who are you moving *with* or *near*? (Alone, in a pair, in a group, mirroring someone).

4. Types of Movement

- **Locomotor Movements:** Travel through space. You move **from one place to another**.
 - *Examples:* Walking, running, jumping, hopping, skipping, galloping, sliding.
- **Non-Locomotor (Axial) Movements:** Performed in one spot, around the body's axis.
 - *Examples:* Bending, stretching, twisting, turning, swinging, shaking.

EVALUATION

1. Is a dance performed at a New Yam festival likely a Ceremonial or Social dance?

2. Which traditional Nigerian dance is famous for its acrobatic jumps and flips, and which ethnic group does it come from?
3. The Swange dance, known for its graceful hip movements, comes from which people?
4. Which element of dance answers the question “Are you moving quickly or slowly?”
5. Is ‘spinning on the spot’ a locomotor or non-locomotor movement?

ASSIGNMENT

1. **(Oral Research):** Ask an elder in your family or community: “What is the name of a traditional dance from our own area or state?” Write down the name.
2. **(Practical Listing):** List four different locomotor movements. Practice each one safely in an open space at home.
3. **(Drawing):** Draw a dancer wearing the traditional beads and attire you might see in a Nigerian cultural dance.

WEEK 8: FORMS OF DANCE II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. List three modern or contemporary dance forms.
2. Explain the meaning of 'Fusion Dance' and give a simple example.
3. Describe common group formations used in dance.
4. Discuss how dance movements and expressions can be used to tell a story.

CONTENT

1. Modern and Contemporary Dance Forms

These are dance styles that have developed more recently, often for stage or media.

- **Contemporary Dance:** A style that combines elements of modern dance, jazz, and ballet. It focuses on **expressing emotions** and often uses **natural, fluid movements** and contact with the floor.
- **Hip-Hop Dance:** A high-energy **street dance style** that emerged with hip-hop music. It includes styles like breaking (breakdance), popping, locking, and krumping.
- **Ballet:** A highly technical, formal dance style that originated in Europe. It tells stories through precise, graceful movements, pointed toes (en pointe), and is often performed to classical music.
- **Jazz Dance:** Energetic and sharp, featuring **isolations** (moving one body part separately), leaps, and turns. It is often seen in musical theatre.

2. Fusion Dance: Mixing Styles

Fusion dance is when choreographers creatively **mix two or more different dance styles** to create something new. For example:

- Mixing traditional **Bata** footwork with **Hip-Hop** upper body movements.
- Combining **Ballet** leaps with **Afrobeat** rhythms. This shows how art can grow and change, respecting tradition while being modern.

3. Group Formations: The Dance Picture

When dancing in a group, how you arrange yourselves is important. Common formations include:

- **Lines (Linear):** Dancers stand in straight rows. This looks neat and is good for synchronized moves.
- **Circle:** Dancers stand in a ring. This can feel inclusive and is common in traditional dances.
- **V-Shape:** Dancers form a 'V' like flying geese. This gives a sense of direction and allows a front dancer to be highlighted.
- **Staggered/Scattered:** Dancers are placed at different points on the stage. This looks more natural and modern.

4. Dance as Storytelling

Long before writing, people used dance to tell stories. This is called **narrative dance**.

- **Pantomime:** Using gestures and facial expressions to represent actions (e.g., pulling a rope, looking for something, showing fear).
- **Emotional Expression:** The energy and quality of movement can show happiness (light, bouncy), sadness (slow, heavy), or anger (strong, sharp).
- **Example:** A dance can tell the story of a hunt, a love story, or a historical event without a single spoken word.

EVALUATION

1. Name two dance styles that are considered ‘modern’ or ‘contemporary’.
2. What do we call a dance that mixes traditional African steps with street dance like hip-hop?
3. If a dance group wants to highlight one main dancer in the centre, which formation (V-shape or circle) might they use?
4. Can a dance tell a story without any words or songs? How?
5. What is a key feature of Jazz dance? (Sharp movements, isolations).

ASSIGNMENT

1. **(Observation/Oral):** Watch a music video or cultural performance on TV. Tell your teacher or parent whether the dancers were mostly in a straight line, a circle, or a scattered formation.
2. **(Creative/Practical):** Create and name one simple dance move that expresses the feeling of “joy.” Describe how you would do it (e.g., “A big jump with arms stretched high”).
3. **(Written Comparison):** List two clear differences between **Ballet** and a Nigerian **traditional dance** like Atilogwu (e.g., type of music, footwork, typical costume).

WEEK 9: FORMS OF DANCE III & DANCE PERFORMANCE PROJECT

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define 'Choreography' and identify the 'Choreographer.'
2. Explain why warming up is a non-negotiable part of dance practice.
3. Demonstrate simple facial expressions suitable for different dance moods.
4. Collaborate to plan a short, simple group dance presentation.

CONTENT

1. Creating a Dance: The Role of the Choreographer

Choreography is the art of designing and arranging the movements, steps, and patterns of a dance. The person who does this is the **choreographer**. They are like the 'writer' or 'architect' of the dance.

- **The Process:**
 - a. **Choose a Concept/Theme:** What is the dance about? (A feeling, a story, an idea).
 - b. **Select Music:** Find music that fits the theme and has a clear beat.
 - c. **Create Movements:** Invent steps that match the rhythm and express the theme.
 - d. **Teach and Arrange:** Teach the steps to the dancers and decide the formation (where they stand).

2. The Importance of Warm-Up and Cool-Down

- **Warm-Up:** Gentle exercises (jogging, stretching) done **before** dancing.
 - **Purpose:** It slowly increases your heart rate, warms your muscles, and makes them more flexible. This **prevents injuries** like sprains, strains, or tears. Never dance with "cold" muscles!
- **Cool-Down:** Slow, gentle stretching **after** dancing.
 - **Purpose:** It helps your heart rate return to normal and reduces muscle soreness the next day.

3. Essential Performance Skills

- **Synchronization:** In group dance, all dancers must perform the **same move at the exact same time** and with the same energy. This requires practice and listening carefully to the music's beat.
- **Facial Expression:** Your face tells half the story! If the dance is joyful, **smile**. If it is a warrior dance, look **strong and fierce**. Match your face to the mood.
- **Projection and Focus:** Dance with confidence as if you are filling the whole space. Know where to look—at the audience, at another dancer, or into the distance.

4. Documenting Dance

Recording a dance on **video** is very useful. Dancers can watch themselves to correct mistakes. It also preserves the choreography so others can learn it later, keeping our dance heritage alive.

EVALUATION

1. Who is the person responsible for creating and arranging the steps of a dance?
2. What is the main reason we must always warm up before we start dancing?
3. What does it mean for a dance group to be 'in sync'?
4. If you are performing a sad, slow dance, what kind of facial expression should you avoid?
5. Why is it a good idea to video record a dance rehearsal?

ASSIGNMENT

1. **(Creative Planning):** Choose a favourite song (30 seconds). On paper, list or draw three dance moves you would include in a routine for it.
2. **(Practical):** At home, in a safe space, practice a 1-minute dance routine that includes two locomotor and two non-locomotor movements.
3. **(Written Explanation):** Explain in one sentence why it looks bad if one dancer in a group is much faster than everyone else.

WEEK 10: RECYCLING IN ARTS AND CRAFTS

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define recycling in the context of arts and crafts.
2. List four common recyclable materials found in Nigerian homes.
3. State two environmental benefits of recycling.
4. Suggest two creative ‘upcycled’ uses for old plastic bottles.

CONTENT

1. Meaning of Recycling in Arts

Recycling in art means collecting used or waste materials and transforming them into new, useful, or decorative art objects. Instead of seeing something as ‘trash,’ an artist sees it as **free raw material**. This is also called ‘**upcycling**’ when the new item is of higher value or quality than the original waste.

2. Common Recyclable Materials Around Us

Look around your home—art materials are everywhere!

- **Plastic:** Water/soda bottles, bottle caps, yoghurt cups, disposable spoons, plastic bags.
- **Paper & Cardboard:** Old newspapers, magazines, cardboard boxes (e.g., cereal, toothpaste), egg cartons, toilet paper rolls.
- **Fabric & Textiles:** Old clothes, socks, rags, pieces of thread, buttons, zippers.
- **Metal:** Tin cans (milk, tomato), aluminium foil, bottle tops from soft drinks.
- **Natural:** Dry leaves, twigs, seeds, shells.

3. Creative Projects from Recycled Materials

Let your imagination turn trash into treasure!

- **Sculptures & Models:** Use wire, cans, and bottles to build animals, cars, or abstract art.
- **Functional Crafts:**
 - *Pen Holder:* Decorate a tin can or plastic bottle.
 - *Toy Car:* Use bottle caps for wheels and a cardboard box for the body.
 - *Flower Vase:* Cut and paint a plastic bottle.
- **Jewellery and Accessories:** Make beads from rolled paper or bottle caps. Create bracelets from plastic strips.
- **Costumes and Masks:** Use cardboard, newspaper, and plastic bags to create dramatic outfits for plays.

4. Benefits of Recycling in Art

- **Environmental Protection:** Reduces the amount of waste in our **drainage systems, streets, and landfills**. Helps keep our communities clean and healthy.
- **Cost-Effective:** Art materials can be expensive. Recycling provides them for **free**, making art accessible to everyone.
- **Boosts Creativity:** It challenges you to think innovatively. What can this bottle become? A rocket? A bird feeder? A musical instrument?

EVALUATION

1. What does it mean to 'recycle' an old newspaper in an art class?
2. Name three types of waste from your kitchen that could be used for an art project.
3. What useful item could you make for your desk using an empty tomato paste tin?
4. How does using waste for art help our environment in Nigeria?
5. What is the special term for turning waste into an item of better quality? (Upcycling).

ASSIGNMENT

1. **(Practical/Collection):** Collect and bring to school **5 clean plastic bottle caps** of different colours/sizes.
2. **(Hands-On Project):** Create one simple useful or decorative item from waste. Examples: A pencil holder from a toilet roll core decorated with paper, or a small drum from a tin can and balloon.
3. **(Home Audit):** Look in your waste bin at home (with permission). List two items you usually throw away that could be saved for an art project.

WEEK 11: COMPREHENSIVE REVIEW AND FINAL PROJECTS

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Review and recall key concepts from Drama, Dance, and Recycled Crafts.
2. Discuss various career opportunities linked to Cultural and Creative Arts.
3. Identify important life skills gained from participating in CCA.
4. Organise and present a final portfolio or performance plan.

CONTENT

1. Major Topic Review Let's revisit the big ideas from this term:

- **Drama & Play Production:** Casting, auditions, rehearsal types (table read, dress rehearsal), stage roles (director, stage manager), and design (set, costume, props).
- **Dance:** Categories (traditional/ceremonial vs. social), examples of Nigerian dances (Bata, Atilogwu, etc.), elements of dance (Body, Space, Time, Energy, Relationship), choreography.
- **Recycled Crafts:** The concept of upcycling, common materials (plastic, paper, fabric), environmental and creative benefits.

2. Career Opportunities in Creative Arts Studying CCA is not just a subject; it opens doors to many exciting professions in Nigeria's growing creative industry:

- **Performing Arts:** Actor (Nollywood/theatre), Dancer, Choreographer, Theatre Director, Stage Manager, Film Producer.
- **Visual Arts & Design:** Fashion Designer, Graphic Designer, Illustrator, Painter/Studio Artist, Sculptor, Set/Costume Designer for film/TV.
- **Arts Management:** Museum/Gallery Curator, Arts Teacher, Event Planner, Cultural Officer.

3. Life Skills Developed Through CCA

The value of CCA goes beyond the classroom. It builds character and skills for life:

- **Confidence and Public Speaking:** Performing on stage reduces fear of public speaking.

- **Teamwork and Collaboration:** Working on a play or group dance teaches cooperation, listening, and respecting others' roles.
- **Creativity and Problem-Solving:** Figuring out how to make a costume from old clothes or design a set on a small budget.
- **Discipline and Perseverance:** The commitment needed to rehearse until perfect or complete an art project.

4. Final Preparation and Presentation

This is a time to showcase your learning:

- **Portfolio Assembly:** Gather your best work from the term—scripts, design sketches, photos of crafts, dance choreography notes. Organise them neatly in a folder.
- **Performance Planning:** In groups, discuss how you would stage a short performance combining what you've learned (e.g., a 5-minute play with a recycled prop, followed by a 1-minute fusion dance).

EVALUATION (Teacher will select and adapt application questions from Weeks 1-10.

Examples:)

1. You are the director. An actor keeps forgetting their blocking. What type of rehearsal should you spend more time on?
2. You want to create a dance about a flowing river. Which Nigerian traditional dance style might inspire your movements, and which element of dance (Energy/Space) would you focus on?
3. Why is a Stage Manager's job considered so important during the actual performance?
4. Instead of buying new beads, you use painted bottle caps for a necklace. What are two benefits of this choice?

ASSIGNMENT

1. **(Reflective Writing):** Write a short paragraph (4-5 sentences) on the topic: **“My Favourite Topic in CCA This Year and What I Learned.”**

2. **(Career Exploration):** List three interesting jobs you could pursue if you continue to study and practice Creative Arts.
3. **(Portfolio Submission):** Prepare your term's artwork, notes, and project photos in a neat folder or scrapbook for final assessment by your teacher.
