

PRIMARY 6 NIGERIAN HISTORY SCHEME OF WORK

FIRST TERM

Week	Topic	Content
1	Advanced Geography and Environment	Nigeria's position in Africa and the world; Latitude and longitude; Nigeria's six geopolitical zones; Characteristics of each zone
2	Political Developments in Nigeria I	Overview of Nigeria's political history; Colonial period to independence; First Republic to Fourth Republic; Major political events timeline
3	Political Developments in Nigeria II	Presidential system of government; Functions of the President; The National Assembly; The Judiciary; Checks and balances
4	Political Developments in Nigeria III	Electoral system in Nigeria; INEC and its functions; Voting process; Political parties; Rights and responsibilities of citizens
5	MIDTERM EXAMINATION	Assessment of topics covered in weeks 1-4
6	MIDTERM BREAK	Rest and relaxation period
7	The Federal Structure of Nigeria	Federalism and its advantages; Federal government powers; State government powers; Concurrent list; Residual powers
8	Revenue Allocation in Nigeria	Sources of government revenue; Federal allocation; Derivation principle; Revenue sharing formula; Resource control debate
9	Inter-Ethnic Relations in Nigeria	Unity in diversity; Managing ethnic diversity; Inter-ethnic marriages; National integration efforts; Peace and conflict resolution
10	Nigeria and International Relations	Nigeria in Africa - ECOWAS, African Union; Nigeria and the United Nations; Nigeria's foreign policy; Nigeria's

		leadership role; International cooperation
11	REVISION	Review of all topics covered; Practice exercises; Question and answer sessions
12	EXAMINATION	End of term assessment
13	CLOSING	Report card distribution; Vacation assignment

PRIMARY 6 NIGERIAN HISTORY LESSON NOTES

FIRST TERM

WEEK 1: ADVANCED GEOGRAPHY AND ENVIRONMENT

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Describe Nigeria's position on the map of Africa and the world.
2. Define latitude and longitude simply and locate Nigeria using them.
3. List the six geopolitical zones in Nigeria.
4. Mention one characteristic or state found in each zone.

CONTENT

1. Nigeria's Position in Africa and the World

Nigeria is a country located on the continent of Africa. Specifically, it is in the western part of Africa, so we say it is in West Africa. On a world map, Africa is like a big shape, and Nigeria sits near the "bulge" of Africa, right beside the Atlantic Ocean. Because Nigeria has more people than any other country in Africa, it is often called the "Giant of Africa."

Imagine your school compound. If your classroom is Nigeria, the other classes around you are the neighbouring countries. Nigeria shares its borders with four countries and one big ocean:

- To the North: Niger Republic. (Think of sharing a fence with a neighbour).
- To the West: Benin Republic.
- To the East: Cameroon and a small part of Chad.
- To the South: The Atlantic Ocean (this part is also called the Gulf of Guinea). This is not a land border but a water border. This ocean is very important for fishing and bringing goods into Nigeria by ship.

2. Latitude and Longitude

Have you ever played a game where you have to find a hidden toy by following clues like "three steps forward, two steps left"? Latitude and Longitude are like the Earth's address system. They are imaginary lines drawn on maps and globes to help us find any place in the world exactly.

- **Latitude:** These are lines that run horizontally (like the rungs of a ladder) around the Earth from East to West. The most important latitude line is the Equator (0°). It is like a belt around the middle of the Earth, dividing it into the Northern Hemisphere and the Southern Hemisphere.
 - Latitude measures how far North or South a place is from the Equator.
 - Nigeria is located between latitudes 4°N and 14°N . This means all of Nigeria is in the Northern Hemisphere, north of the Equator. The number (4, 14) tells us the distance in degrees.
- **Longitude:** These are lines that run vertically (up and down) from the North Pole to the South Pole. The most important longitude line is the Prime Meridian (0°), which passes through Greenwich in England.
 - Longitude measures how far East or West a place is from the Prime Meridian.

- Nigeria is located between longitudes 3°E and 15°E. This means Nigeria is east of the Prime Meridian.

3. The Six Geopolitical Zones

Nigeria is a big country with 36 states and the Federal Capital Territory (Abuja). To make administration and planning easier, these states are grouped into six (6) geopolitical zones. Each zone has states that are close to each other and often share similar cultures or ways of life.

Here are the six zones and some key facts:

Geopolitical Zone	States in the Zone	One Key Characteristic
1. North Central	Plateau, Benue, Kogi, Kwara, Nasarawa, Niger, FCT (Abuja)	Known as the "Middle Belt." Rich in agriculture (yams, cereals) and solid minerals. Abuja, our capital, is here.

Geopolitical Zone	States in the Zone	One Key Characteristic
2. North East	Borno, Yobe, Adamawa, Bauchi, Gombe, Taraba	Known for large-scale livestock rearing (cattle, goats) and farming like beans and maize.
3. North West	Kano, Kaduna, Sokoto, Katsina, Kebbi, Zamfara, Jigawa	Has a very large population. Known for historical cities, trade, and farming (sorghum, millet).
4. South East	Enugu, Anambra, Imo, Abia, Ebonyi	People are known for entrepreneurship, trading, and industry (e.g., manufacturing).
5. South South	Rivers, Delta, Akwa Ibom, Bayelsa, Cross River, Edo	Known as the Niger Delta region. This is the main oil and gas producing area of Nigeria.
6. South West	Lagos, Oyo, Ogun, Osun, Ondo, Ekiti	Known for commerce, education, and culture. Lagos is the major commercial city.

[INSERT IMAGE: A clear map of Nigeria divided into six colourful sections, each labeled with the name of a geopolitical zone and illustrated with a small icon (e.g., an oil rig for South South, a book for South West, a cow for North East).]

EVALUATION

1. Name the country that shares a border with Nigeria to the West.
2. What large body of water is to the South of Nigeria?
3. Latitude lines measure distance North and _____ of the Equator.
4. What are the six geopolitical zones of Nigeria?
5. Which zone is Abuja, the Federal Capital Territory, located in?
6. If a state is known for producing most of Nigeria's oil, which geopolitical zone is it likely in?
7. True or False: All of Nigeria is located south of the Equator.

ASSIGNMENT

1. **(Oral/Drawing)** Draw a simple outline map of Nigeria in your notebook. Colour the area where the Atlantic Ocean would be blue and label it.
2. **(Written)** In one sentence, write down the name of the geopolitical zone where your state is located.
3. **(Practical)** From the South West zone, list any three states and draw one common fruit or product that comes from that region (e.g., cocoa for Ondo).

WEEK 2: POLITICAL DEVELOPMENTS IN NIGERIA I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Mention the date Nigeria gained independence.
2. Identify the period known as the First Republic.
3. Differentiate between military rule and civilian rule.
4. Create a simple timeline of major political events.

CONTENT

1. Overview of Nigeria's Political History

Nigeria's political journey is like a story with different chapters.

- **Colonial Period (Before 1960):** For many years, Nigeria was not ruling itself. It was a colony of Britain. This means the British government made the laws, appointed our leaders, and controlled our resources. Nigerians could not freely choose their own leaders.
- **Independence (1960):** This is the most important chapter! After years of asking and struggling for freedom, Nigeria became independent on October 1, 1960. "Independence" means we became free to rule ourselves, make our own laws, and control our own affairs. On this day, the British flag (the Union Jack) was lowered, and the Green-White-Green Nigerian flag was raised.

The first leaders of independent Nigeria were:

* Dr. Nnamdi Azikiwe (often called "Zik"): He was the first Governor-General and later became the first President.

* Sir Abubakar Tafawa Balewa: He was the first Prime Minister (the head of government who runs the day-to-day affairs).

2. The Republics and Military Rule

After independence, Nigeria decided to become a Republic. A republic is a country where the people elect their leaders; it is not ruled by a king or queen from another country. Nigeria became a republic on October 1, 1963.

- **The First Republic (1963–1966):** This was Nigeria's first try at ruling itself as a republic with elected leaders. Unfortunately, this period had many political problems and arguments between regions. It ended suddenly in January 1966 when some army soldiers took over the government. This is called a military coup (pronounced "koo").
- **Military Rule:** After the 1966 coup, the army generals took control of the country. This is called military rule. Under military rule:
 - The country is led by a Military Head of State (a senior soldier like a General).
 - Soldiers are not elected by the people; they take power by force.
 - There is no National Assembly to make laws; the Head of State makes laws by decree.
 - Examples of Military Heads of State are General Yakubu Gowon and General Murtala Muhammed.
- **Return to Civilian Rule (The Republics):** Sometimes, the military hands over power back to elected civilians. Each time this happens, a new republic starts.
 - **Second Republic (1979–1983):** Led by a civilian President, Alhaji Shehu Shagari. It ended with another military coup.
 - **Third Republic (1993):** This was supposed to be a return to democracy, but the presidential election was annulled (cancelled) by the military, so it never properly took off.
 - **Fourth Republic (1999–Present):** This is our current chapter! It began on May 29, 1999, when the military ruler, General Abdulsalami Abubakar, handed over power to the elected civilian President, Chief Olusegun Obasanjo. We have had elections every four years since then.

EVALUATION

1. On what exact date did Nigeria gain independence from Britain?
2. Who was Nigeria's first Prime Minister?
3. What major event happened in 1966 that ended the First Republic?
4. In a military rule, how does a person become the leader of the country?
5. Which Republic are we in now, and when did it start?
6. True or False: During the Colonial Period, Nigerians freely elected all their leaders.

ASSIGNMENT

1. **(Drawing/Written)** In your notebook, draw a straight timeline. Mark and label these four years: 1960 (Independence), 1963 (Republic), 1966 (First Coup), 1999 (Fourth Republic Start).
2. **(Oral)** Ask an adult at home: "What is the name of the current President of Nigeria?" Write it down.
3. **(Written)** Write one clear difference between military rule and civilian rule. (Hint: Think about how leaders come to power).

WEEK 3: POLITICAL DEVELOPMENTS IN NIGERIA II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define the Presidential system of government.
2. List three functions of the President.
3. Explain the role of the National Assembly.
4. Define "Checks and Balances" simply.

CONTENT

1. Presidential System of Government

Nigeria uses a Presidential system of government. This means the President is both the Head of State (the symbol of the nation) and the Head of Government (the person who runs the government). The President is elected directly by all adult citizens of Nigeria in a general election.

2. The Three Arms of Government

To prevent one person or group from having too much power, the work of government is divided into three separate arms. They are like three different legs that hold a tripod pot steady.

- **A. The Executive Arm**

- **Led by:** The President (and his team, including the Vice President and Ministers).
- **Main Job:** To execute or carry out the laws of the country. They run the day-to-day business of Nigeria.
- **Functions of the President:**
 - i. **Chief Executive:** He appoints Ministers (like the Minister of Education, Health) to help him govern.
 - ii. **Commander-in-Chief:** He is the overall boss of the Nigerian Armed Forces (Army, Navy, Air Force).
 - iii. **Signs Bills into Law:** When the National Assembly passes a new law (bill), the President must sign it before it can take effect.

- iv. **Represents Nigeria:** He travels to other countries to meet their leaders and build relationships for Nigeria.

- **B. The Legislative Arm**

- **Called:** The National Assembly. It is bicameral, meaning it has two houses (like a building with two chambers).
- **Main Job:** To make laws for the peace and good governance of Nigeria. They are the lawmakers.
- **The Two Houses:**
 - i. **The Senate:** This is the upper house. Each of Nigeria's 36 states has 3 Senators. The FCT has 1. So, there are 109 Senators in total. They are led by the Senate President.
 - ii. **The House of Representatives:** This is the lower house. The number of members from each state depends on its population. There are 360 members in total. They are led by the Speaker.

[INSERT IMAGE: A diagram showing the National Assembly building splitting into two boxes: one labeled "SENATE (109 Members)" and the other "HOUSE OF REPRESENTATIVES (360 Members)". An icon of a gavel (for making laws) is above the building.]

- **C. The Judicial Arm**

- **Made up of:** All the courts and judges in Nigeria.
- **Main Job:** To interpret the laws and settle disputes. They decide what the law means and punish people who break the law.
- **Highest Court:** The Supreme Court of Nigeria, located in Abuja. It is the final court of appeal.

3. Checks and Balances

This is a very important idea! "Checks and Balances" means that each arm of government has some control over the others. They "check" each other to make sure no one arm becomes too powerful or misbehaves. It's like three friends on a see-saw making sure no one is lifted too high.

Examples:

- **Executive checks Legislature:** The President can refuse to sign a bill from the National Assembly (this is called a veto).
- **Legislature checks Executive:** The National Assembly must approve the President's choice of Ministers. They can also investigate how the President is spending money.
- **Judiciary checks Both:** The courts can declare a law made by the National Assembly or an action by the President as unconstitutional (against the rules of the constitution).

EVALUATION

1. Who is the head of the Executive arm of the Nigerian government?
2. What is the main duty of the Legislative arm?
3. Name the two houses that make up the National Assembly.
4. If two people have a serious legal disagreement, which arm of government will finally settle it?
5. Give a simple example of "Checks and Balances." (Hint: Think about how a Minister is appointed).

ASSIGNMENT

1. **(Written)** Write down the names of the three arms of government and one word that describes the main job of each.
2. **(Oral/Research)** Find out and write down the name of the current Senate President of Nigeria.
3. **(Drawing)** Draw a large triangle. Label each corner with one arm of government. Draw an arrow going from the Legislature to the Executive and write "Approves Ministers" on it.

WEEK 4: POLITICAL DEVELOPMENTS IN NIGERIA III

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define INEC.
2. Explain the function of INEC.
3. Describe the voting process simply.
4. Mention two rights and two responsibilities of a citizen during elections.

CONTENT

1. The Electoral System

An election is a process where citizens choose their leaders by voting (casting their ballot). In Nigeria, we hold major elections every four years to elect the President, Governors, and members of the National and State Assemblies.

2. INEC – The Election Organizer

INEC stands for the Independent National Electoral Commission. It is an independent body created by the constitution to organize all elections in Nigeria. Think of INEC as the referee in a football match—it sets the rules, manages the game, and declares the winner fairly.

- **Key Functions of INEC:**

- a. **Voter Registration:** They register all eligible Nigerians (18 years and above) and give them a Permanent Voter's Card (PVC). Your PVC is your ticket to vote.
- b. **Register Political Parties:** They approve and keep a list of all political parties that can contest elections (like APC, PDP, Labour Party, etc.).
- c. **Organize Elections:** They set the election date, provide ballot papers and boxes, train officials, and set up polling units (voting centres) across the country.
- d. **Count Votes and Announce Results:** After voting, INEC officials count the votes at the polling unit in the open (this is called open-secret ballot) and announce the results.

3. Political Parties

A political party is an organized group of people who share similar ideas about how to govern the country. They work together to win elections. Each party has a name, logo, slogan, and manifesto (a list of what they promise to do).

4. The Voting Process – Step by Step

Let's follow Ahmed, who is 20 years old, on election day:

1. **Step 1: Registration (Done before election day):** Ahmed went to an INEC registration centre, gave his details, and got his PVC.
2. **Step 2: Go to Polling Unit:** On election day, Ahmed goes to his assigned polling unit (often a nearby school or public square).
3. **Step 3: Accreditation:** An INEC official checks Ahmed's PVC and uses a scanner to confirm his fingerprint. His name is ticked on the register. This proves he is who he says he is and hasn't voted before.
4. **Step 4: Voting:** Ahmed goes into a polling booth (a private screen). He receives a ballot paper with the names and logos of the parties/contestants. He makes a single thumbprint or mark (✓) in the box next to his preferred candidate.
5. **Step 5: Cast Ballot:** He folds his ballot paper and drops it into the transparent ballot box in front of everyone.

6. **Step 6: Counting:** At the close of voting (usually 2 pm), the INEC official opens the ballot box in front of all voters, counts the votes for each party, and writes the result on a sheet (Result Form). Everyone can see the counting.

A 6-step picture sequence showing: 1. A person holding a PVC. 2. Fingerprint being checked. 3. Person entering a booth. 4. Marking a ballot paper. 5. Dropping paper in a box. 6. Officials counting papers in the open.

5. Rights and Responsibilities of a Citizen

- **Rights (What you are entitled to do):**

- a. The right to vote if you are 18 or above.
- b. The right to contest for an election if you qualify.
- c. The right to a free and fair election process.

- **Responsibilities (What you should do):**

- a. **Vote wisely:** Choose a leader based on their character and plans, not just because they give you money or belong to your tribe.
- b. **Be peaceful:** Do not fight, cause trouble, or intimidate others at the polling unit.

- c. **Protect your vote:** Stay back to watch the counting and make sure the results are written correctly. Do not sell your vote for money or gifts—it is your power for four years!

EVALUATION

1. What does the abbreviation INEC stand for?
2. What is the name of the card you must have before you can vote?
3. What is the minimum age for voting in Nigeria?
4. Mention two of INEC's jobs.
5. Why is it wrong to sell your vote or accept money before voting?
6. Name two political parties in Nigeria.

ASSIGNMENT

1. **(Creative)** Design a logo and a name for a make-believe political party in your notebook. What is one thing your party promises to do for children?
2. **(Written)** List the three main steps a voter takes on election day (from arrival at the polling unit to leaving).
3. **(Oral/Practical)** Ask your parent or guardian to show you their Permanent Voter's Card (PVC). Describe what you see on it (colours, details, chip) in two sentences.

WEEK 7: THE FEDERAL STRUCTURE OF NIGERIA *(Note: Weeks 5 & 6 are Midterm Exam and Break)*

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define Federalism.
2. Differentiate between Federal and State powers.
3. List items on the Exclusive List.
4. List items on the Concurrent List.

CONTENT

1. Meaning of Federalism

Nigeria is a federal state. Federalism is a system of government where power to govern is shared between one strong central (national) government and smaller regional governments (States). It is like a family: the father (Federal Government) handles big family issues, while the mother and older children (State and Local Governments) handle matters in their specific areas. We practice federalism because Nigeria is large and has many different people with different needs; this system allows for unity while respecting differences.

2. The Three Legislative Lists: Sharing Powers

The Nigerian Constitution clearly states which level of government can do what. These powers are divided into three lists.

- **A. Exclusive Legislative List**

- **Meaning:** Matters on this list are for the Federal Government alone. Only the National Assembly in Abuja can make laws about them.
- **Examples (Why these are federal matters):**
 - i. **Defence:** The Army, Navy, Air Force, and Police (for now). We need one unified army to protect the whole country.
 - ii. **Currency:** Printing of Naira notes and coins. If every state printed its own money, it would cause chaos.

- iii. **Foreign Affairs:** Dealing with other countries, passports, and international treaties. Nigeria must speak with one voice to the world.
- iv. **Aviation:** Airports and control of airspace. Planes fly across states, so one authority is needed for safety.

- **B. Concurrent Legislative List**

- **Meaning:** Matters on this list can be handled by BOTH the Federal Government and State Governments. They share responsibility.
- **Examples:**
 - i. **Education:** The Federal Government can build universities (e.g., University of Lagos), while a State Government can build its own university (e.g., Lagos State University) and primary schools.
 - ii. **Health:** Both can build and run hospitals.
 - iii. **Roads:** The Federal Government builds and maintains trunk A roads (major highways connecting states), while states build state roads within their boundaries.
 - iv. **Agriculture:** Both can support farmers and provide fertilizers.

- **C. Residual List**

- **Meaning:** These are matters not mentioned in the Exclusive or Concurrent lists. They are automatically left for the State Governments and Local Governments.
- **Examples:** The naming of streets, maintenance of local markets, chieftaincy titles, and local sewage systems.

3. Why Federalism is Good for Nigeria

- It brings government closer to the people: Your state government in your capital understands your local problems better than leaders in faraway Abuja.
- It allows for experimentation: One state can try a new policy (e.g., free school meals). If it works, other states can copy it.
- It promotes unity in diversity: Different states can manage their unique cultures and traditions while still being part of one strong Nigeria.

EVALUATION

1. What is federalism in simple words?
2. Who has the power to make laws about the Nigerian Army and printing money—Federal or State Government?
3. Can a State Government build a university? (Yes/No). Which list allows this?
4. Give two examples of items on the Exclusive List.
5. If your Local Government wants to repair a motor park in your area, which list is that power likely under?

ASSIGNMENT

1. **(Written)** Write down one important thing the Federal Government does for all Nigerians and one important thing your State Government does for people in your state.
2. **(Reasoning)** In two sentences, explain why having one Nigerian Police Force (on the Exclusive List) is better than having a different police force for each state.
3. **(Drawing/Organization)** Draw a simple table with two columns. Label them "Federal Powers" and "Shared Powers." List two items under each column.

WEEK 8: REVENUE ALLOCATION IN NIGERIA

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define revenue.
2. List three sources of government revenue.
3. Explain the concept of Federal Allocation.
4. Explain the "Derivation Principle" simply.

CONTENT

1. What is Revenue?

Revenue is all the money that the government earns or collects. Just like your parents need money to buy food, pay school fees, and fix the house, the government needs money to build roads, schools, hospitals, pay teachers, doctors, and provide security. Without revenue, the government cannot work.

2. Sources of Government Revenue

Where does the Nigerian government get its money from?

- **Oil and Gas (Petroleum):** This is Nigeria's biggest source of money. We sell crude oil to other countries. The money from these sales forms a large part of our national income. However, relying too much on oil is risky if oil prices fall.
- **Taxes:** This is money that citizens and businesses are obliged by law to pay to the government.
 - Personal Income Tax: Paid by people who work in offices and businesses.
 - Company Tax: Paid by big companies like Dangote, MTN, etc.
 - Value Added Tax (VAT): A small charge added to the price of goods and services you buy.
- **Customs and Excise Duties:** These are charges paid on goods imported into Nigeria (brought in from other countries) like cars, rice, or phones. It makes imported goods more expensive to encourage buying Nigerian-made goods.

- **Other Sources:** Money from agriculture (exporting cocoa, cashew), solid minerals (like gold), and fees paid for government services (like passport fees).

A pie chart or simple graphic showing major revenue sources: A large slice for "Oil & Gas," a medium slice for "Taxes," and smaller slices for "Customs" and "Others."

3. Revenue Sharing (Federal Allocation)

All the money collected from these sources (especially oil and taxes) goes into a special account called the Federation Account. It is like a big national pot of money. Every month, this money is shared (allocated) among the three levels of government:

1. Federal Government (Abuja)
2. 36 State Governments
3. 774 Local Governments

A special committee called the Revenue Mobilisation Allocation and Fiscal Commission (RMAFC) recommends the sharing formula. A common formula is: Federal Government (52.68%), State Governments (26.72%), Local Governments (20.60%). This sharing is called Federal Allocation or Monthly Allocation.

4. The Derivation Principle

This is a special fairness rule in revenue sharing. The Derivation Principle states that a state where a natural resource (like oil, minerals) is produced should get an extra percentage of the money from that resource. This is to compensate them for the environmental damage and to help develop their area.

- Currently, the derivation share is 13%. This means that from the money made from oil, 13% is given back to the oil-producing states.
- Examples of oil-producing states that benefit from this 13% include: Rivers, Delta, Akwa Ibom, Bayelsa.
- Why is this important? Oil exploration can pollute water, destroy farmland, and cause other problems. The 13% derivation fund helps these states clean up their environment and build infrastructure.

EVALUATION

1. What is the meaning of government revenue?
2. Mention two non-oil sources of government revenue.
3. What is the name of the account where all national revenue is first paid into?
4. The Derivation Principle is mainly for which group of states?
5. Give one reason why oil-producing states get an extra 13% allocation.

ASSIGNMENT

1. **(Creative/Reasoning)** If you were to share 100 Naira from the Federation Account among Federal, State, and Local governments, how many naira would you give to each and why? (You decide the fair shares).
2. **(Written)** List three things your Local Government Council could use its share of the revenue to do in your community.
3. **(Research)** Find out from a textbook, parent, or the internet: Is your state an oil-producing state? Write Yes or No.

WEEK 9: INTER-ETHNIC RELATIONS IN NIGERIA

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define "Unity in Diversity".
2. Mention three major ethnic groups in Nigeria.
3. List two ways to promote national unity.
4. Explain the importance of inter-ethnic marriage.

CONTENT

1. Unity in Diversity

Nigeria is a country of many, many peoples. We have over 250 different ethnic groups, each with its own language, culture, food, music, and traditions. This variety is our diversity. "Unity in Diversity" means that despite all these differences, we are one nation—we are all Nigerians who should live together in peace, respect each other, and work together for the progress of our country. Our national motto is "Unity and Faith, Peace and Progress."

- **Three Largest Ethnic Groups:**
 - a. **Hausa-Fulani:** Predominantly in the North. Major languages are Hausa and Fulfulde. Known for farming, cattle rearing, and rich history (like the Sokoto Caliphate).
 - b. **Yoruba:** Predominantly in the South West. Language is Yoruba. Known for commerce, education, and vibrant arts and culture (like the Alaafin of Oyo).
 - c. **Igbo:** Predominantly in the South East. Language is Igbo. Known for entrepreneurship, trade, and technology.
- **Other Prominent Groups:** Ijaw, Tiv, Kanuri, Ibibio, Edo, Nupe, Urhobo, and many more.

2. How Nigeria Promotes Unity

The government has created ways to help Nigerians from different backgrounds mix, understand each other, and feel like one family.

- **NYSC (National Youth Service Corps):** After university, graduates are posted to serve for one year in a state different from their state of origin. A Yoruba graduate may serve in Borno, and an Igbo graduate may serve in Sokoto. They live and work there, learning the local culture and making friends. This breaks down tribal barriers.
- **Federal Character Principle:** This is a policy that ensures that when hiring people for federal government jobs or admitting students into federal schools, all states and ethnic groups are fairly represented. It prevents one region from dominating others.
- **Unity Schools:** These are Federal Government Colleges spread across the country. Students from all states live, learn, and play together in boarding houses. They build lifelong friendships across ethnic lines.

3. Inter-Ethnic Marriages

This is when a man and a woman from different ethnic groups get married. For example, a Hausa man marrying an Igbo woman, or a Yoruba woman marrying an Ijaw man.

- **Benefits to National Unity:**

- a. **Builds Bridges:** It connects two families from different backgrounds, turning "them" into "us."
- b. **Raises Tolerant Children:** The children from such marriages grow up speaking multiple languages, understanding different customs, and seeing themselves simply as Nigerians first.
- c. **Reduces Prejudice:** When families are connected by marriage, it becomes harder to hold negative stereotypes or hatred against that tribe.

4. Conflict Resolution and Respect

Sometimes, misunderstandings or competition between groups can lead to conflict. As good citizens, we must:

- Use dialogue (peaceful talking) to solve problems, not violence.
- Respect other people's religions, festivals (like Eid, Christmas, Eyo), and traditional rulers.
- Focus on what unites us (our shared nationality, love for football, jollof rice) rather than what divides us.

EVALUATION

1. What does the phrase "Unity in Diversity" mean for Nigeria?
2. Name the three largest ethnic groups in Nigeria.
3. What is the main purpose of the NYSC program?
4. How does an inter-ethnic marriage help to make Nigeria more united?
5. True or False: The Federal Character Principle means only people from one ethnic group should get government jobs.

ASSIGNMENT

1. **(Creative Writing)** Write a short story (5-7 sentences) about two best friends in school: one is Igbo and loves ji (yam), the other is Hausa and loves tuwo. Describe how they share their food and help each other.

2. **(Drawing/Symbolism)** Draw the Nigerian flag (Green-White-Green). Under it, write what the two green stripes and the white stripe symbolize. (Hint: Green for agriculture/wealth, White for peace/unity).
3. **(Oral/Research)** Ask your parents or guardian: "What is one traditional food from an ethnic group different from ours that you enjoy?" Write down the name of the food and the tribe it comes from.

WEEK 10: NIGERIA AND INTERNATIONAL RELATIONS

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Identify Nigeria's role in West Africa (ECOWAS).
2. Mention two international organizations Nigeria belongs to.
3. Explain Nigeria's "Big Brother" role in Africa.
4. State one benefit of international cooperation.

CONTENT

1. Nigeria in Africa – A Leader

Nigeria is not just big in size and population; it is also a leader on the African continent. Other African countries often look up to Nigeria.

- **ECOWAS (Economic Community of West African States):**
 - This is an organization of 15 West African countries. Nigeria was a founder and is its most powerful member.
 - **Headquarters:** Abuja, Nigeria.
 - **Main Goals:** To promote economic cooperation (trade among members), free movement of people, and peace in the region. For example, with an ECOWAS passport, Nigerians can travel to Ghana or Senegal more easily.
- **Peacekeeping – The "Big Brother" Role:** Nigeria has often sent its soldiers, as part of United Nations or African Union missions, to help stop wars and keep peace in other African countries. We did this in Liberia, Sierra Leone, Sudan, and others. This is like a big brother in a family stepping in to stop a fight between younger siblings. This has earned Nigeria the nickname "Big Brother of Africa." It shows leadership and a commitment to African peace.

2. Major International Organizations Nigeria Belongs To

Nigeria is a member of important global clubs. This gives us a voice in world affairs.

- **The United Nations (UN):** A worldwide organization of almost all countries. Nigeria is a founding member. The UN works for world peace, security, and development. Nigeria contributes soldiers to UN peacekeeping missions.
- **The African Union (AU):** An organization of all 55 countries in Africa. It works for Africa's political and economic integration. Its goal is a united, peaceful, and prosperous Africa.
- **The Commonwealth of Nations:** A group of countries, most of which were formerly part of the British Empire. They cooperate on democracy, education, and sports (like the Commonwealth Games).
- **OPEC (Organization of Petroleum Exporting Countries):** A group of countries that produce and sell oil. Nigeria is a member. OPEC tries to agree on oil production levels and prices in the world market.

3. Nigeria's Foreign Policy

Foreign policy is a country's plan for dealing with other nations. Nigeria's foreign policy is based on:

- **Afro-centrism:** Putting Africa's interests first. Nigeria stands up for Africa in world meetings.

- **Good Neighbourliness:** Being friendly and cooperative with countries that share borders with us (like Niger, Cameroon).
- **Respect for International Law:** Following global rules and treaties.

4. Benefits of International Cooperation

Why is it good for Nigeria to have friends and belong to these organizations?

- **Economic Benefits:** We can trade our oil, cocoa, and other products easily. We can also get foreign investment (money from other countries to build businesses here).
- **Security Help:** Other countries can help us fight problems like terrorism, piracy, and disease outbreaks (e.g., other countries sent help during the Ebola virus outbreak).
- **Education and Culture:** Nigerian students can get scholarships to study abroad. Our music (Afrobeats), movies (Nollywood), and fashion are celebrated worldwide because of these connections.

EVALUATION

1. What does ECOWAS stand for, and where is its headquarters?
2. Why is Nigeria often called the "Big Brother of Africa"?
3. Name two international organizations that Nigeria is a member of.
4. What is one major benefit Nigeria gets from being a member of OPEC?
5. True or False: Nigeria's foreign policy says we should ignore other African countries and focus only on ourselves.

ASSIGNMENT

1. **(Drawing/Research)** Draw the logo of the United Nations (a world map surrounded by olive branches) OR describe it in detail in your notebook.
2. **(Written)** List three other West African countries that are members of ECOWAS (besides Nigeria). (Hint: Think of Ghana, Benin, Senegal...)
3. **(Reasoning)** In one complete sentence, explain why it is important for Nigeria to send soldiers to help keep peace in another African country.

WEEK 11: REVISION

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Recall key facts about Nigeria's geography and history.
2. Explain the political structure and voting process.
3. Discuss revenue allocation and national unity.
4. Answer questions confidently for the upcoming examination.

CONTENT

This week is for revision. We will go over all the major topics from Weeks 1 to 10 to prepare for your examination. Let's summarize:

- **Geography (Week 1):** Nigeria in West Africa. Latitude (4°N-14°N) & Longitude (3°E-15°E). The Six Geopolitical Zones (North Central, North East, North West, South East, South South, South West) and their features.
- **Political History (Weeks 2 & 3):** Independence: October 1, 1960. First Prime Minister: Tafawa Balewa. First President: Nnamdi Azikiwe. Republics and Military Rule. The Three Arms of Government (Executive, Legislature, Judiciary) and Checks and Balances.
- **Electoral Process (Week 4):** Role of INEC. Steps in voting. Importance of PVC. Rights and responsibilities of voters.
- **Government Structure (Week 7):** Federalism. The Exclusive List (Federal only), Concurrent List (Shared), and Residual List (State/Local).
- **Economy (Week 8):** Revenue meaning. Sources (Oil, Taxes, Customs). Federation Account and Monthly Allocation. The 13% Derivation Principle for oil-producing states.
- **National Unity (Week 9):** "Unity in Diversity." Major ethnic groups (Hausa-Fulani, Yoruba, Igbo). Promoting unity through NYSC, Federal Character, Unity Schools. Importance of inter-ethnic marriage and respect.
- **Global Affairs (Week 10):** Nigeria's role in ECOWAS (HQ in Abuja) and as "Big Brother." Membership in UN, AU, Commonwealth, OPEC. Benefits of international cooperation.

Interactive Session: The teacher will conduct a class quiz, group discussion, and Q&A session on these topics. We will also discuss simple current affairs related to these themes (e.g., a recent election, a government project, a cultural festival).

EVALUATION (Teacher will select from a pool of questions covering all weeks, for example:)

1. What is the capital city of Nigeria and which geopolitical zone is it in?
2. Who is the current Commander-in-Chief of the Armed Forces of Nigeria?
3. What is the main duty of the National Assembly?
4. Why should a voter not sell his or her vote?
5. Give one example of a power on the Concurrent List.
6. What does the "13% Derivation" mean?
7. How does the NYSC program help to unite Nigeria?
8. Name one international organization that has its headquarters in Nigeria.

ASSIGNMENT

1. **(Study)** Review all your notes from Weeks 1-10 for the First Term Examination.
2. **(Creative Writing)** Write a short essay (about 10 lines) titled: "My Vision for a Better Nigeria." What one thing would you change or improve to make Nigeria greater?
3. **(Memorization/Civic)** Practice and memorize the Nigerian National Pledge. Write it out in your notebook without looking.

PRIMARY 6 NIGERIAN HISTORY SCHEME OF WORK

SECOND TERM

Week	Topic	Content
1	Historical Features and Sites in Nigeria I	Nigerian UNESCO World Heritage Sites; Sukur Cultural Landscape; Osun-Osogbo Sacred Grove; Importance of world heritage status
2	Historical Features and Sites in Nigeria II	National monuments and museums; Slave history sites - Badagry, Calabar; Colonial buildings in Lagos and other cities; Archaeological sites
3	Historical Features and Sites in Nigeria III	Historical palaces - Oba's Palace Benin, Oba's Palace Ife, Shehu's Palace Sokoto; Ancient city walls; Historical battlegrounds; Preservation efforts
4	Nigerian Economy Through History	Pre-colonial economy; Colonial economy; Cash crops; Oil discovery; Modern Nigerian economy
5	MIDTERM EXAMINATION	Assessment of topics covered in weeks 1-4
6	MIDTERM BREAK	Rest and relaxation period
7	Nigeria's Natural Resources	Petroleum resources and oil-producing states; Solid minerals - tin, coal, limestone; Agricultural resources; Renewable resources; Resource management
8	Environmental Challenges in Nigeria	Deforestation and desertification; Oil spillage in Niger Delta; Erosion problems; Flooding; Climate change effects; Environmental protection
9	Nigeria's Industrial Development	Manufacturing industries; Industrial centers - Lagos, Kano, Port Harcourt; Agro-allied industries; Technology and innovation; Challenges and prospects
10	Transportation and Communication Development	Evolution of transport - roads, rail, air, water; Major highways and bridges; Communication systems; Digital transformation; Infrastructure development
11	REVISION	Review of all topics covered; Practice exercises;

		Question and answer sessions
12	EXAMINATION	End of term assessment
13	CLOSING	Report card distribution; Vacation assignment

PRIMARY 6 NIGERIAN HISTORY LESSON NOTES

SECOND TERM

WEEK 1: HISTORICAL FEATURES AND SITES IN NIGERIA I

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define "World Heritage Site."
2. Identify the two UNESCO World Heritage Sites in Nigeria.
3. Describe the Sukur Cultural Landscape.
4. Describe the Osun-Osogbo Sacred Grove.

CONTENT

1. What is a World Heritage Site?

A World Heritage Site is a very special place anywhere in the world that is so important that all people should help to protect it. It can be a beautiful forest, an ancient city, a mountain, or a great building. An organization called UNESCO (United Nations Educational, Scientific and Cultural Organization) chooses these sites. They are like the world's most precious treasures. Once a site becomes a World Heritage Site, the government promises to take extra care of it so that our children and grandchildren can also see and learn from it.

2. Sukur Cultural Landscape

- **Location:** This site is in Madagali, Adamawa State, in North-East Nigeria. It is built on top of a flat mountain called a plateau.
- **Features:** It is an ancient kingdom that shows how people lived cleverly on a mountain long, long ago.
 - **The Chief's Palace (Hidi's Palace):** The ruler of Sukur, called the Hidi, lived here.
 - **Stone-Paved Walkways:** Paths made with flat stones, connecting different parts of the settlement.
 - **Terraced Fields:** The people cut flat steps into the mountain slopes to farm. This prevented the rain from washing their soil away.
 - **Sacred Places:** There are special stones and symbols that were important for their culture and religion.
- **Significance:** Sukur is famous for its ancient iron-smelting tradition. People there were expert blacksmiths who made tools and weapons from iron. The whole landscape shows a perfect harmony between people, their culture, and their environment.

3. Osun-Osogbo Sacred Grove

- **Location:** This is a thick forest along the Osun River in Osogbo, Osun State, South-West Nigeria.
- **Features:** It is not just a forest; it is a sacred home dedicated to Osun, the Yoruba goddess of fertility, love, and water.
 - **Shrines and Sculptures:** Inside the forest, there are many beautiful statues, carvings, and artworks made to honour the goddess and other spirits. These were created by famous artists like Susanne Wenger.
 - **The River:** The Osun River flows through it. People believe the river has healing powers.
 - **Annual Festival:** Every year in August, the Osun-Osogbo Festival takes place. Thousands of people, including the king (the Ataoja) and priests, come to pray, make offerings, and celebrate with music and dance.
- **Significance:** This grove is one of the last sacred forests of the Yoruba people. It is a living museum of Yoruba religion, art, and tradition. It shows how people respected nature and their gods.

A drawing of a dense forest with a river flowing through it. Within the forest, show simple drawings of a sculpture face, a shrine, and people in procession. Label: Sacred Forest, Osun River, Sculptures.

4. Importance of Heritage Status

Why is it a big deal for Nigeria to have World Heritage Sites?

- **Protection:** It helps to stop people from destroying the site by building houses, cutting trees, or mining.
- **Tourism:** People from all over the world come to visit. These tourists spend money on hotels, food, and guides, which helps the local community and Nigeria earn money.
- **Education and Pride:** It teaches Nigerians, especially young people like you, about the amazing history and culture of our land. It makes us proud of who we are.

EVALUATION

1. What is the main job of UNESCO concerning special places?
2. In which state can you find the Sukur Cultural Landscape?
3. Name two things you would find inside the Osun-Osogbo Sacred Grove.
4. What do we call the flat-step farms built on the mountain in Sukur?
5. Give one reason why being a World Heritage Site helps a place.

ASSIGNMENT

1. **(Research/Written)** Find out and write down the name of the capital city of Osun State.
2. **(Drawing)** Draw a large, strong tree with roots. Around it, draw things you might find in a sacred grove (e.g., a small shrine, a river, a sculpture). Title it "The Sacred Grove".
3. **(Reasoning)** In one sentence, explain why people should not cut down trees or build houses inside a place like the Osun-Osogbo Sacred Grove.

WEEK 2: HISTORICAL FEATURES AND SITES IN NIGERIA II

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Differentiate between a monument and a museum.
2. Mention two important sites related to the history of the slave trade in Nigeria.
3. Identify cities known for colonial architecture.
4. Define an archaeological site.

CONTENT

1. Monuments and Museums

Let's learn the difference:

- **Museum:** This is a building or a place where old and important objects are kept safe and shown to the public. Think of it as a treasure house of history. You can see and sometimes touch things like ancient pots, old coins, traditional clothes, and royal stools.
Example: The National Museum in Lagos, The Jos Museum.
- **Monument:** This is a statue, building, or structure built to help us remember a very important person or a great event. It is like a giant reminder made of stone or metal.
Examples: The National War Memorial in Abuja (remembers soldiers), Tafawa Balewa Square (TBS) in Lagos (named after our first Prime Minister).

2. Slave History Sites

These are places that tell the painful story of the Trans-Atlantic Slave Trade, when millions of Africans were captured and taken away to work in foreign lands.

- **Badagry, Lagos State:**
 - **"Point of No Return":** This is a spot on the beach at Badagry. It marks where captured people were forced onto ships. The name tells us that once they stepped there, they could never come back home.
 - **Slave Relics Museum:** Here you can see the actual chains, handcuffs, and canoes used to transport slaves. It helps us understand how cruel the trade was.
 - **First Storey Building in Nigeria:** A two-floor building built in 1845. It was used by early missionaries and also connects to that period of history.
- **Calabar, Cross River State:** This was another major slave port.
 - The Slave History Museum at the Marina Resort shows the history of the trade in that region.

3. Colonial Buildings

These are old buildings built during the time the British ruled Nigeria (colonial period). They have a European style that looks different from our traditional mud or thatch houses.

- **Lagos Island:** You can find many old government offices and houses with large windows and wooden frames.
- **Lokoja, Kogi State:** This was the first administrative capital of Nigeria. You can see the old house where Lord Lugard (a British governor) lived and ruled from.
- **Calabar, Cross River State:** The Old Residency Museum is a beautiful colonial building that is now a museum.

4. Archaeological Sites

An archaeological site is a place where scientists called archaeologists dig carefully into the ground to find very, very old objects left behind by people who lived thousands of years ago. It is like being a detective of ancient history.

- **Nok, Kaduna State:** Famous for Nok Terracotta. These are human and animal figures made from baked clay (terracotta). They are over 2,000 years old and show that ancient Nigerians were great artists.
- **Igbo-Ukwu, Anambra State:** Famous for ancient bronze objects—beautiful pots, crowns, and ornaments made with a special metal-working technique long before European contact.

EVALUATION

1. If you wanted to see an ancient clay pot, would you go to a Museum or a Monument?
2. What sad historical event does the "Point of No Return" in Badagry remind us of?
3. Name one Nigerian city where you can find many old British-style (colonial) buildings.
4. What amazing things were discovered by archaeologists at Igbo-Ukwu?
5. What do we call a scientist who digs up old objects from the ground to study history?

ASSIGNMENT

1. **(Research/Written)** Find out and write down the name of one museum in Nigeria (it can be in your state or any other state you know).

2. **(Drawing)** Draw a simple picture of a clay pot or vase to represent the kind of artefacts found at archaeological sites.
3. **(Reasoning)** In two sentences, explain why it is important for Nigerians to remember and learn about the history of the slave trade, even though it is a sad story.

WEEK 3: HISTORICAL FEATURES AND SITES IN NIGERIA III

OBJECTIVES By the end of the lesson, pupils should be able to:

1. List three historical palaces in Nigeria.
2. Describe the significance of ancient city walls.
3. Explain why we must preserve historical sites.
4. Identify the Kano City Walls.

CONTENT

1. Historical Palaces

A palace is the official home and office of a traditional ruler like a King, Oba, Emir, or Sultan. These palaces are not just houses; they are living centers of history, culture, and administration for their people.

- **The Oba's Palace, Benin City (Edo State):** This is the home of the Oba of Benin. It is famous for its history linked to the powerful Benin Kingdom. The palace walls have famous bronze plaques that tell stories of kings, battles, and ceremonies. The Benin bronzes are known all over the world.
- **The Ooni's Palace, Ile-Ife (Osun State):** This is the home of the Ooni of Ife. The Yoruba people believe that Ile-Ife is where the world was created. This palace is therefore seen as a very sacred and ancestral home for all Yoruba people.
- **The Shehu's Palace (or Sultan's Palace), Sokoto (Sokoto State):** This is the home of the Sultan of Sokoto, the spiritual leader of Muslims in Nigeria. It is connected to the history of the Sokoto Caliphate, a very large Islamic empire founded by Usman dan Fodio.
- **The Emir's Palace, Kano (Kano State):** A beautiful and large palace made with traditional mud (adobe) architecture. It has high walls and is the seat of the Emir of Kano.

2. Ancient City Walls and Moats

Long ago, before modern armies, cities built strong walls and moats (deep ditches filled with water) around themselves for defense and protection.

- **Kano City Walls:** Built about 800 years ago! These were massive walls made of mud and clay that surrounded the ancient city of Kano. They were so thick and high that they could stop enemy attacks. The walls had several gates (Kofar) for people to enter and leave.
- **The Benin Moat (Iya):** The people of the ancient Benin Kingdom dug a huge ditch (moat) around their city. It is one of the largest man-made earthworks in the world, even longer than the Great Wall of China! It served as a defensive barrier and also showed the great engineering skills of the Benin people.

3. Why We Must Preserve These Sites

These old palaces and walls are falling apart because of:

- **Weather:** Heavy rain and sun slowly wash away mud walls.
- **Neglect:** Sometimes people forget their importance.

- **Modern Development:** People sometimes break old walls or buildings to construct new roads or houses.

We must preserve them because:

- They are our history books made of mud and stone. They teach us about the greatness of our ancestors.
- They bring pride and tourism. People pay to see them, creating jobs.
- The **National Commission for Museums and Monuments (NCMM)** is the government agency responsible for protecting and restoring these places. They need our support and respect.

EVALUATION

1. Which palace is the home of the Oba of Benin?
2. What was the main purpose of building high walls around ancient cities like Kano?
3. What are the Kano City Walls made of?
4. The huge ditch around Benin City is called a _____.
5. What does the abbreviation NCMM stand for?

ASSIGNMENT

1. **(Research/Written)** What is the title of the traditional ruler who lives in the palace at Ile-Ife? (e.g., Oba, Ooni, Emir).
2. **(Drawing)** Draw a simple diagram of an ancient city. Show a square for the palace in the middle, and draw a thick wall with a gate around the entire city.
3. **(Reasoning)** List two natural things (like weather) that can cause an old mud building to collapse over time.

WEEK 4: NIGERIAN ECONOMY THROUGH HISTORY

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Describe the pre-colonial economy (Trade by Barter).
2. Identify the main cash crops of the colonial economy.
3. State when and where oil was first discovered in commercial quantity.
4. Compare the past economy with the modern economy.

CONTENT

1. Pre-Colonial Economy (Before the 1900s)

Before Europeans came, Nigerians had their own successful ways of making a living.

- **Agriculture and Fishing:** Almost every family farmed. They grew food like yams, cassava, maize, and beans. People living near rivers and the coast were expert fishermen.
- **Craft and Industry:** People were skilled in weaving (making clothes like Akwete and Aso-Oke), pottery (making clay pots for cooking), blacksmithing (making tools and weapons from iron), and bronze-casting (like in Benin and Igbo-Ukwu).
- **Trade by Barter:** There was no paper Naira or coins. To get something you needed, you exchanged it for something else you had.
 - **Example:** A farmer with extra yams could exchange them with a fisherman for fish. A weaver could exchange a cloth for a pot from a potter.
 - **Later, Commodity Money:** Items like cowrie shells, manillas (bracelet-shaped metals), and salt became commonly accepted for trade because they were valuable, durable, and easy to carry.

2. Colonial Economy (During British Rule, early 1900s – 1960)

The British wanted resources to send to their factories in Europe. They encouraged Nigerians to grow **Cash Crops**—crops grown not to eat, but to sell for money.

- **Groundnut (North):** Giant pyramids of groundnut sacks were stacked in Kano! This showed how much was being produced for export.

- **Cocoa (West):** Western Nigeria became famous for its high-quality cocoa.
- **Palm Oil and Kernel (East):** Palm oil was used to make soap and other products in Europe.
- **Mining:** The British also mined coal in Enugu and tin in Jos.

The economy changed from producing a bit of everything for yourself to focusing on a few crops and minerals for export.

3. Oil Discovery – A Major Change

- **When and Where?** In 1956, crude oil was discovered in large, commercial quantity in a village called **Oloibiri**, in present-day Bayelsa State.
- **The Big Shift:** After independence, oil became Nigeria's "black gold." It started bringing in a lot more money than agriculture. The government began to depend more on oil money and paid less attention to farming. Nigeria became a major oil-exporting country.

4. Modern Nigerian Economy

- **Still Oil-Dependent:** Today, selling crude oil is still the biggest source of money for the Nigerian government.

- **The Problem:** Relying on one thing is risky. When global oil prices fall, Nigeria faces economic problems.
- **Diversification:** This means developing many sources of income. The government is now trying to go "Back to Agriculture" and also develop other sectors like:
 - **Technology:** "Tech Hubs" in Lagos and Abuja.
 - **Entertainment:** Nollywood (movies) and Afrobeats (music) are now famous worldwide and can create jobs and wealth.

EVALUATION

1. What does "Trade by Barter" mean? Give a simple example.
2. What were the giant stacks of groundnut sacks in the North called?
3. In what year and village was oil first discovered in Nigeria in large quantity?
4. Which region (North, West, or East) was famous for producing cocoa during colonial times?
5. What does "diversification of the economy" mean? (Hint: Not putting all eggs in one basket).

ASSIGNMENT

1. **(Oral History)** Ask an older family member (parent, grandparent, aunt/uncle): "What could you buy with 1 Naira or 10 Kobo when you were a child?" Write down their answer.
2. **(Drawing)** Draw a simple pyramid shape and label it "Groundnut Pyramid".
3. **(Written)** List three different jobs or crafts that Nigerians did to make a living before the Europeans arrived (e.g., farming, blacksmithing, weaving).

WEEK 7: NIGERIA'S NATURAL RESOURCES *(Note: Weeks 5 & 6 are Midterm Exam and Break)*

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define natural resources.
2. List three oil-producing states.
3. Identify locations of solid minerals (Coal, Tin, Limestone).
4. Mention two renewable resources.

CONTENT

1. What are Natural Resources?

Natural resources are valuable gifts from nature that God has given us in our land, water, and air. They are not made by people. We use them to create things we need, to build our country, and to make money. They can be under the ground, on the ground, or in the water.

2. Types of Natural Resources

A. Mineral Resources (Non-Renewable) These are resources dug from under the ground. They take millions of years to form, so once we use them up, they are gone forever.

- **Petroleum (Crude Oil):** A thick, black liquid found deep underground. It is refined to make petrol (fuel for cars), kerosene, diesel, and plastic.
 - **Oil-Producing States:** Mainly in the Niger Delta/South-South region. **Examples:** Rivers, Delta, Akwa Ibom, Bayelsa. Also some in Ondo, Imo, Abia.
- **Solid Minerals:**
 - **Coal:** Found in Enugu State (which is why Enugu is called the "Coal City"). It was used to power trains and generate electricity.
 - **Tin and Columbite:** Found on the Jos Plateau (Plateau State). Tin was a major export during colonial times.
 - **Limestone:** Found in Ewekoro (Ogun State), Benue, and Kogi. It is the main raw material for making cement (used for building houses and roads).

- **Gold:** Found in Zamfara State and Ilesha (Osun State). Gold is used for jewellery and is very valuable.

B. Agricultural Resources (Renewable) These come from the soil and living things. If we manage them well, they can regrow or be produced again and again.

- **Crops:** Nigeria's fertile soil grows many things.
 - **North:** Grains like millet, sorghum, and cash crops like cotton (for making cloth).
 - **South:** Cocoa, Rubber, Oil Palm, Kolanuts.
- **Livestock:** Cattle, goats, sheep, and poultry are reared, especially in the northern regions.
- **Forest Resources:** Timber (wood) from our forests is used for furniture and building.

C. Renewable Energy Resources These are sources of power that never finish.

- **Solar Energy:** From the sun. We can use solar panels to get electricity.
- **Hydropower:** From flowing water. Dams like Kainji Dam on the River Niger use water to generate electricity.
- **Wind Energy:** From the wind. Wind turbines can convert wind to power.

EVALUATION

1. What do we call valuable things found in nature that we can use?
2. Name three states in Nigeria where crude oil is produced.
3. Which solid mineral is Enugu State famous for?
4. What is the main use of Limestone?
5. Give one example of a renewable resource (it can be energy or agricultural).

ASSIGNMENT

1. **(Mapping/Drawing)** Draw a rough outline of Nigeria in your notebook. Mark where your state is with a star. Write one natural resource (crop or mineral) that your state is known for next to the star.
2. **(Written)** List five different food crops that are grown in Nigeria (e.g., yam, rice, maize).
3. **(Reasoning)** What is the key difference between a renewable resource (like sunlight) and a non-renewable resource (like crude oil)?

WEEK 8: ENVIRONMENTAL CHALLENGES IN NIGERIA

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define deforestation and desertification.
2. Explain the problem of oil spillage in the Niger Delta.
3. Identify the causes of erosion and flooding.
4. Suggest one way to protect the environment.

CONTENT

1. Deforestation

- **What is it?** This is the large-scale cutting down of trees in forests without planting new ones to replace them.
- **Causes:** People cut trees for firewood, timber (wood for building), and to clear land for farming or building houses.
- **Effects:** It destroys the homes of animals (loss of biodiversity). It leads to soil erosion because tree roots can no longer hold the soil together. It also affects rainfall patterns and makes the air less clean.

2. Desertification

- **What is it?** This is the process where fertile land slowly turns into a desert—dry, sandy, and unable to grow crops.
- **Where?** This is a major problem in Northern Nigeria (e.g., states like Sokoto, Kano, Borno). The Sahara Desert is slowly expanding southwards.
- **Causes:** Overgrazing (too many cattle eating all the grass), deforestation for firewood, and climate change (less rainfall).
- **Effect:** Farmers can no longer grow food, leading to poverty and hunger. It can also force people to move from their homes.

3. Oil Spillage in the Niger Delta

- **What happens?** Crude oil leaks from broken pipelines or is spilled during illegal bunkering (oil theft) into rivers, creeks, and farmlands.
- **Effects:**
 - **Water Pollution:** The oil covers the water, killing fish and other aquatic life. Fishermen cannot catch fish.
 - **Land Pollution:** It makes the soil poisonous. Farmers cannot grow crops on their land.
 - **Health Problems:** People who drink or use the polluted water can get sick.
- **Why is it hard to stop?** The pipelines are old and not well maintained. Also, some people illegally damage them to steal oil.

4. Erosion and Flooding

- **Erosion:** This is when soil and sand are washed away by water or wind.
 - **Gully Erosion:** This is a severe form where rainwater cuts deep, wide channels into the earth. It is a huge problem in Anambra, Imo, and Enugu States. It can destroy roads, houses, and farmlands.

- **Flooding:** This is when water overflows and covers dry land.
 - **Causes:** Very heavy rainfall, blocked drainage systems (gutters filled with plastic waste), and building houses on water channels.
 - **Effects:** It destroys properties, spreads diseases, and can make people homeless.

5. What Can We Do? (Environmental Protection)

- **Afforestation/Reforestation:** Plant trees! Trees hold the soil and bring rain.
- **Proper Waste Disposal:** Do not throw plastic bags or waste into gutters. Use designated bins.
- **Report Problems:** Tell an adult or teacher if you see a broken pipe or someone damaging the environment.
- **Government Action:** Agencies like **NESREA (National Environmental Standards and Regulations Enforcement Agency)** work to protect our environment.

EVALUATION

1. What is the difference between deforestation and desertification?
2. Which major geographical region of Nigeria is most affected by desertification?
3. How does oil spillage affect a fisherman's job in the Niger Delta?
4. Name one human activity that can cause flooding in a city.
5. What is one simple thing you can do in your school to help the environment?

ASSIGNMENT

1. **(Drawing)** Draw a picture showing the bad effect of cutting trees. Show a tree being cut and a sad animal next to its fallen home.
2. **(Practical/Written)** Write down two specific things you and your classmates can do this week to keep your school compound clean and green (e.g., pick up litter, water a plant).
3. **(Reasoning)** Imagine you are a farmer in the Niger Delta. In two sentences, explain why an oil spill on your land would be a disaster for you.

WEEK 9: NIGERIA'S INDUSTRIAL DEVELOPMENT

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define manufacturing industry.
2. List three major industrial centers in Nigeria.
3. Explain what agro-allied industries are.
4. Mention one challenge facing industries in Nigeria.

CONTENT

1. What is a Manufacturing Industry?

A manufacturing industry is a factory or a place where raw materials are processed and turned into finished goods that people can use. Instead of selling raw groundnuts, a factory turns them into groundnut oil or peanut butter. This adds value and creates jobs.

2. Major Industrial Centers in Nigeria

These are cities with many factories and industries.

- **Lagos State:** The biggest industrial hub in Nigeria and West Africa. Areas like Ikeja, Apapa, and Igando have thousands of factories producing everything from drinks and food to medicines and plastics.
- **Kano State:** Historically known for textile (cloth making) and leather industries. Kano is a major commercial center for the northern region.
- **Port Harcourt, Rivers State:** The heart of the oil and gas industry. Many factories here refine crude oil or make products from petroleum. It is also a major port city.
- **Aba, Abia State:** Known as the "Japan of Africa" because of its spirit of entrepreneurship. Aba is famous for small and medium-scale industries producing shoes, bags, clothes, and cosmetics.
- **Nnewi, Anambra State:** Known as the "Automobile Hub." Companies like Innoson Vehicle Manufacturing (IVM) assemble cars and produce vehicle parts here.

3. Agro-Allied Industries

"Agro" means related to agriculture. So, agro-allied industries are factories that use farm products (agricultural produce) as their main raw materials.

- **Examples:**

- **Flour Mills:** They grind wheat, maize, or cassava into flour for making bread, biscuits, and garri.
- **Fruit Juice/Beverage Companies:** They process oranges, pineapples, and other fruits into packaged juice.
- **Textile Mills:** They turn cotton from farms into threads and then into cloth.
- **Furniture Companies:** They use timber (wood) from forests to make chairs, tables, and beds. These industries are very important because they encourage farming and reduce waste.

4. Challenges Facing Nigerian Industries

Why are some factories finding it hard to work or even closing down?

- **Unstable Power Supply (Electricity):** Factories need constant electricity to run machines. Since power from the national grid is not steady, they have to spend a lot of money on diesel generators, which makes production very expensive.
- **Poor Infrastructure:** Bad roads make it difficult and costly to transport raw materials to the factory and finished goods to the market.
- **Competition from Imported Goods:** Sometimes, foreign-made goods (like clothes, shoes, or electronics) are cheaper to import than it is to produce them here, because of the challenges above. This makes people buy foreign products instead of "Made in Nigeria" goods.

EVALUATION

1. What happens in a manufacturing industry?
2. Name two cities in Nigeria that are known as major industrial centers.
3. If a factory uses cassava to produce garri and starch, what type of industry is it?
4. What is the biggest problem related to power that Nigerian factories face?
5. Which Nigerian city is famous for producing vehicles and car parts?

ASSIGNMENT

1. **(Investigation)** Look at the packaging of any snack, drink, or item at home. Find where it says "Made in..." or "Product of...". Write down the name of the product and where it was made.
2. **(Written)** List three different products that are "Made in Nigeria" which you or your family use (e.g., Indomie noodles, Dangote cement, Hypo bleach).
3. **(Reasoning)** Why is constant electricity so important for a factory that produces bottled water? (Think about the machines needed).

WEEK 10: TRANSPORTATION AND COMMUNICATION DEVELOPMENT

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Trace the evolution of transport from animals to modern vehicles.
2. List the four major modes of transportation.
3. Describe the development of communication in Nigeria.
4. Identify key infrastructure (bridges, railways).

CONTENT

1. Evolution of Transport in Nigeria

- **The Past (Pre-colonial & Colonial):**
 - **Walking (Trekking):** People walked long distances.
 - **Animal Power:** They used horses, donkeys, and camels (especially in the North) to carry people and goods.
 - **Water Transport:** People used canoes and boats on rivers like the Niger and Benue.
- **The Present:**
 - We now have motor vehicles (cars, buses, trucks), trains, airplanes, and modern ships. This evolution has made travel faster, easier, and able to carry much more.

2. The Four Major Modes of Transportation

A. Road Transport: This is the most common mode. We use cars, buses ("Danfo"), motorcycles ("Okada"), and tricycles ("Keke Napep").

* **Important Infrastructure:** Bridges are crucial. Examples:

* **Niger Bridge (Onitsha):** Connects the East and West across the River Niger.

* **Third Mainland Bridge (Lagos):** One of the longest bridges in Africa, connecting Lagos Island to the mainland.

B. Rail Transport:

* **Old (Colonial) Rail:** The British built narrow-gauge railway lines (e.g., Lagos to Kano) which were slow.

* **Modern Rail:** Nigeria is now building modern standard-gauge railways that are faster and more comfortable. Examples: Abuja-Kaduna Rail Line, Lagos-Ibadan Rail Line.

C. Air Transport: This is the fastest mode for long distances.

* **Major Airports:** Murtala Muhammed International Airport (Lagos), Nnamdi Azikiwe International Airport (Abuja), Port Harcourt International Airport.

D. Water Transport: This is important for moving heavy goods.

* **Major Seaports:** Apapa Port and Tin Can Island Port (Lagos), Onne Port and Port Harcourt Port (Rivers State). Ships bring goods into Nigeria and take our exports (like oil) out.

3. Development of Communication

Communication is how we share information and ideas.

- **The Past:**

- **Town Crier:** A person who walked around beating a gong or drum to announce news to the village.

- **Postal Services (NIPOST):** People wrote letters that were carried by postmen and could take days or weeks to arrive.
- **Landline Telephones (NITEL):** Only a few offices and rich homes had telephones connected by wires.
- **The Present (Digital Age):**
 - **GSM (Mobile Phones):** In 2001, Nigeria got GSM (Global System for Mobile communications). Suddenly, almost everyone could afford a mobile phone. This was a communication revolution!
 - **Internet and Social Media:** Now, with smartphones, we can send messages instantly via WhatsApp, make video calls, send emails, and get news from social media platforms. The world is now connected.

EVALUATION

1. What animals were commonly used for transport in Northern Nigeria in the past?
2. Name the four major modes of transportation we have today.
3. Which famous bridge connects Onitsha in Anambra State to Asaba in Delta State?
4. What major change happened in Nigeria's communication in the year 2001?
5. What is the name of the international airport located in Abuja?

ASSIGNMENT

1. **(Drawing)** Draw the outline of a mobile phone. Inside the screen, draw symbols for three things you can use it for (e.g., a phone icon, a message bubble, a camera).
2. **(Oral History)** Ask your parents or an older sibling: "How did you send a message or talk to a friend who lived far away before you had a mobile phone?" Write down their answer.
3. **(Observation/Written)** On your way home from school, look at the road. List three different types of vehicles you see (e.g., bus, motorcycle, truck).

WEEK 11: REVISION

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Recall key facts about Nigerian historical sites.
2. Summarize the economic history of Nigeria.
3. Identify environmental challenges and solutions.
4. Discuss industrial and transport developments.

CONTENT

This week is for revision of all topics from Weeks 1 to 10. Let's summarize key points:

- **Historical Sites (Weeks 1-3):**
 - **UNESCO Sites:** Sukur Cultural Landscape (Adamawa) and Osun-Osogbo Sacred Grove (Osun).
 - **Museums vs. Monuments.**
 - **Slave History Sites:** Badagry and Calabar.
 - **Ancient Palaces and Walls:** Benin, Ife, Sokoto, Kano.
- **Economy Through History (Week 4 & 7):**
 - **Pre-colonial:** Trade by Barter, Crafts.
 - **Colonial:** Cash Crops (Cocoa, Groundnut, Palm Oil).
 - **1956:** Oil discovery in Oloibiri, Bayelsa.
 - **Modern:** Oil-dependent, need for diversification.
- **Natural Resources & Environment (Weeks 7 & 8):**
 - **Resources:** Oil, Coal, Tin, Limestone, Gold, Crops.
 - **Challenges:** Deforestation, Desertification, Oil Spillage, Erosion, Flooding.
 - **Solutions:** Planting trees, proper waste disposal.
- **Development (Weeks 9 & 10):**
 - **Industries:** Manufacturing and Agro-allied industries in Lagos, Kano, Aba, etc.

- **Challenges:** Bad electricity, poor roads.
- **Transport:** Road, Rail, Air, Water – evolution from trekking to modern systems.
- **Communication:** From town criers to GSM and internet.

Interactive Session: The teacher will conduct a class quiz, group discussions, and quick fire Q&A on these topics. We will also talk about how these histories affect our lives today.

EVALUATION (Teacher will select questions from topics covered, for example:)

1. Which World Heritage Site is a sacred forest in Osogbo?
2. What was used for trade before the invention of money?
3. Name one solid mineral found in Jos.
4. What environmental problem is causing farmland in the North to turn to sand?
5. Why do many factories in Nigeria rely on generators?
6. What year did GSM mobile phones launch in Nigeria?
7. Which city is known as the "Japan of Africa" for its industries?

ASSIGNMENT

1. **(Study)** Review all your notes from Weeks 1-10 to prepare for the Second Term Examination.
2. **(Creative Writing)** Write a short paragraph (5-7 sentences) about which historical site in Nigeria you would most like to visit and why. (Is it a palace, a sacred grove, or a museum?).
3. **(Reflection)** List five (5) new or important things you have learned about Nigeria's history, economy, or environment this term.

PRIMARY 6 NIGERIAN HISTORY SCHEME OF WORK

THIRD TERM

Week	Topic	Content
1	Nigerian Legal System	Sources of law in Nigeria; Customary law; Islamic law; Common law; Court system hierarchy; Rule of law
2	Human Rights and Fundamental Freedoms	Nigerian Constitution; Fundamental human rights; Rights of the child; Responsibilities accompanying rights; Human rights violations
3	Democracy and Good Governance	Principles of democracy; Democratic institutions; Free and fair elections; Accountability and transparency; Role of citizens in democracy
4	Youth and Nation Building	Role of youth in development; Education and skill acquisition; Youth empowerment programs; Avoiding social vices; Leadership preparation
5	MIDTERM EXAMINATION	Assessment of topics covered in weeks 1-4
6	MIDTERM BREAK	Rest and relaxation period
7	Contemporary Issues in Nigeria	Security challenges; Economic development; Education system; Healthcare; Corruption and anti-corruption efforts
8	Science, Technology and Innovation	Nigerian scientists and inventors; Technology hubs in Nigeria; Space program; Innovation in agriculture; Digital economy
9	Nigeria's Cultural Diversity as Strength	Over 250 ethnic groups; Multiple languages; Religious tolerance; National integration policies; Celebrating diversity
10	Preparing for Secondary School and Citizenship	Transition to secondary school; Being responsible citizens; National service and patriotism; Vision for Nigeria's future; Personal role in national development
11	REVISION	Comprehensive review; Practice examinations;

		Clarification of concepts; Preparation for transition
12	EXAMINATION	End of term and final primary school assessment
13	CLOSING	Graduation ceremony; Report cards; Secondary school preparation

PRIMARY 6 NIGERIAN HISTORY LESSON NOTES

THIRD TERM

WEEK 1: NIGERIAN LEGAL SYSTEM

OBJECTIVES By the end of the lesson, pupils should be able to:

1. List three sources of law in Nigeria.
2. Differentiate between Customary, Islamic, and Common law.
3. Arrange the Nigerian courts in order of hierarchy (importance).
4. Define the "Rule of Law."

CONTENT

1. Sources of Law in Nigeria

Laws are the official rules of a country that guide how people should behave. They are like the rules of a game that everyone must follow so that society can be peaceful and fair. In Nigeria, our laws come from different places.

- **The Constitution:** This is the supreme law of Nigeria. It is the most important rule book for the entire country. Every other law must agree with it. If any other law disagrees with the Constitution, the Constitution wins. It contains our fundamental human rights and the structure of government.
- **Common Law (English Law):** These are laws we inherited from Britain after colonization. They are written down in law books and used in most of our big courts today for cases like contracts, theft, and land disputes. Think of it as the general law used in cities and for national matters.
- **Customary Law:** These are the traditional rules and practices of Nigeria's many ethnic groups. They are usually not fully written down but are known by the elders. They govern things like:
 - **Marriage:** How a bride price is paid.
 - **Inheritance:** How family property is shared when someone dies.

- **Chieftaincy:** How a traditional ruler is chosen. Customary law is different for the Yoruba, Igbo, Hausa, and every other ethnic group.
- **Islamic Law (Sharia):** This is law based on the teachings of the Quran and the Hadith (sayings of Prophet Mohammed). It is used mainly in Northern Nigeria for Muslims in matters of personal life, such as marriage, divorce, inheritance, and some minor criminal cases.

2. The Court System (Hierarchy)

Courts are special places where judges listen to arguments and make decisions on cases.

Nigerian courts are arranged in a hierarchy—a order of importance, like steps on a ladder. A case can start at a lower court and move up if someone is not satisfied.

From Highest to Lowest:

1. **Supreme Court:** The final court. It is in Abuja. If the Supreme Court makes a decision, no other court can change it. It is like the headteacher's final decision in a school matter.
2. **Court of Appeal:** If someone loses a case at the High Court and believes a mistake was made, they can appeal (take the case to) the Court of Appeal.

3. **Federal High Court / State High Court:** These handle serious cases like murder, armed robbery, large amounts of money, and disputes between states and the federal government.
4. **Magistrate Courts / District Courts / Customary Courts / Sharia Courts:** These are lower courts. They handle smaller, everyday cases in local areas, like small debts, quarrels between neighbours, or traffic offences. Magistrate Courts use Common Law, while Customary and Sharia Courts use their respective laws.

[INSERT IMAGE: A pyramid or ladder diagram. At the top: "Supreme Court (Final)". Below: "Court of Appeal". Below: "Federal/State High Courts". At the base: "Magistrate/Customary/Sharia Courts". An arrow on the side shows "Appeal Upwards".]

3. The Rule of Law

This is a very powerful principle that is the foundation of justice. The Rule of Law means:

- **No one is above the law:** Not the President, not a governor, not a rich businessman. Everyone must obey the same laws.
- **Equality before the law:** The law treats the poor and the rich, the powerful and the ordinary person, in the same way.
- **Fair Hearing:** If you are accused of breaking a law, you have the right to be heard in a court, to have a lawyer, and to defend yourself before any punishment.
- **Laws must be clear and known:** The government cannot punish people for breaking a secret rule.

It means Nigeria is governed by laws, not by the whims of powerful people.

EVALUATION

1. Which document is the supreme law of Nigeria?
2. If a case involves how family land is shared according to Igbo tradition, which type of law is being used?
3. Where is the Supreme Court of Nigeria located?
4. What does the Rule of Law say about the President and the laws of the land?

5. If you are unhappy with a judgment from a State High Court, which court do you go to next?

ASSIGNMENT

1. **(Drawing)** Draw a simple pyramid showing the hierarchy of courts. Label the four levels from top to bottom.
2. **(Oral/Research)** Ask your parents or an elder: “What is one traditional rule (customary law) from our ethnic group about how to show respect to elders?” Write it down.
3. **(Reasoning)** In one complete sentence, explain why a country needs laws. (Hint: Think about what would happen if there were no rules at all).

WEEK 2: HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define Human Rights.
2. List four fundamental human rights found in the Nigerian Constitution.
3. Mention three rights of a Nigerian child.
4. Explain the difference between a right and a responsibility.

CONTENT

1. What are Human Rights?

Human Rights are the basic freedoms and protections that belong to every single person from birth, simply because they are human. They are not given by the government; the government's job is to protect them. In Nigeria, these rights are written in Chapter IV of the Nigerian Constitution so that everyone knows them and no leader can easily take them away.

2. Fundamental Human Rights (From the Constitution)

Here are some of the most important rights every Nigerian has:

- **Right to Life:** This is the most important right. No one has the right to unlawfully kill another person.
- **Right to Dignity of Human Person:** You cannot be tortured, enslaved, or treated in a cruel or inhuman way.
- **Right to Personal Liberty:** You cannot be arrested and kept in prison without a good reason. If you are arrested, you must be brought before a court quickly.
- **Freedom of Thought, Conscience and Religion:** You are free to believe what you want, to practice any religion (Christianity, Islam, Traditional), or to have no religion.
- **Freedom of Expression and the Press:** You have the right to say what you think, write it, or publish it, as long as it is not a lie that harms someone else.
- **Freedom of Movement:** You can live, work, and travel to any part of Nigeria you wish.

3. Rights of the Child

Children need extra care and protection. Nigeria has a Child's Rights Act. Some key rights for you are:

- **Right to Survival and Development:** This includes good food, healthcare, and a safe home.
- **Right to a Name and Nationality:** Every child has the right to be given a name at birth and to be registered as a Nigerian.
- **Right to Education:** Every child has the right to free and compulsory basic education (up to JSS3).
- **Right to Protection:** Children must be protected from all forms of abuse, violence, neglect, and from being used for hard labour (child labour).
- **Right to Play and Rest:** Children have the right to relax, play, and take part in cultural and artistic activities.

4. Rights vs. Responsibilities

Rights do not mean you can do anything you like. For every right, there is a matching responsibility to others and to the society.

- **Your Right:** Freedom of Expression. **Your Responsibility:** To use your words kindly. Do not spread lies, gossip, or insult people.
- **Your Right:** Right to Education. **Your Responsibility:** To go to school regularly, respect your teachers, and do your homework.
- **Your Right:** Freedom of Movement. **Your Responsibility:** To obey traffic rules when crossing the road and not to trespass on someone else's private property.

EVALUATION

1. What are Human Rights?
2. Name two fundamental rights guaranteed by the Nigerian Constitution.
3. According to the Child's Rights Act, what type of education should a child get for free?
4. If you have the right to freedom of expression, what is your responsibility when talking about others?
5. True or False: A child can be forced to work all day in a factory instead of going to school.

ASSIGNMENT

1. **(Reflection/Written)** List three rights you enjoy as a pupil in your school (e.g., right to drink clean water, right to be heard by the teacher).
2. **(Creative Writing)** Write a short story (5-7 sentences) about a child named Amina who was stopped from going to school by her parents. Describe how this violates her rights and what could be done to help her.
3. **(Reasoning)** Why is the Freedom of Movement important for a trader who lives in Kano but buys goods from Lagos?

WEEK 3: DEMOCRACY AND GOOD GOVERNANCE

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Define Democracy.
2. List three principles of democracy.
3. Explain the meaning of "Free and Fair Elections."
4. Describe the role of a citizen in a democracy.

CONTENT

1. Meaning of Democracy

Democracy is a system of government where the power to rule comes from the people. A famous definition is: **"Government of the people, by the people, and for the people."**

- **"Of the people":** The government belongs to the citizens.
- **"By the people":** The people choose their leaders through elections.
- **"For the people":** The government should work to improve the lives of the citizens.

This is the opposite of a system where one person (like a dictator) or a group of soldiers (military rule) takes power by force.

2. Key Principles of Democracy

For democracy to work well, it stands on certain important principles:

- **Rule of Law:** As we learned, the law is supreme. Everyone, including leaders, must follow it.
- **Majority Rule and Minority Rights:** The candidate or idea with the most votes wins (majority rule). However, the rights and opinions of those who did not win (the minority) must still be respected and protected. They should not be silenced or bullied.
- **Free and Fair Elections:** Leaders are chosen through periodic elections where every vote counts.

- **Accountability and Transparency:** Leaders must explain their actions and how they spend public money. They are answerable to the people. Government business should be open, not secret.
- **Political Tolerance:** People and parties with different views must tolerate and respect each other. There should be no violence because of political differences.

3. Free and Fair Elections

An election is the heart of democracy. For it to be legitimate, it must be:

- **Free:** Citizens can decide without fear or pressure who to vote for. They are not forced, threatened, or bribed.
- **Fair:** The playing field is level for all contestants. The electoral body (INEC) is neutral. There is no rigging, ballot box snatching, or falsification of results. The process is transparent.

4. The Role of Citizens in a Democracy

Democracy is not a spectator sport. Citizens have active duties:

- **Vote Wisely:** Register, get your PVC, and vote during elections. Choose leaders based on their character and plans, not on tribe or money.
- **Obey Laws:** Follow the rules and regulations of the country.
- **Pay Taxes:** Contribute your fair share to help the government provide services like roads and schools.
- **Hold Leaders Accountable:** Ask questions about government projects in your community. Attend town hall meetings if you can.
- **Participate Peacefully:** Join peaceful protests or write letters to newspapers about issues, but never engage in violence.
- **Be Informed:** Read news from reliable sources to understand what is happening in your country.

[INSERT IMAGE: A circular diagram. Center: "ACTIVE CITIZEN". Around it, in segments: "Votes", "Obeys Laws", "Pays Taxes", "Asks Questions", "Stays Informed".]

EVALUATION

1. What is the popular three-part definition of democracy?
2. How do citizens choose their leaders in a democracy?
3. What does "accountability" mean for a government leader?
4. In an election, who wins—the majority or the minority?
5. Besides voting, mention one other important duty of a citizen in a democracy.

ASSIGNMENT

1. **(Creative)** Design a simple poster with the slogan "Your Vote, Your Future - Vote in Peace". Use bright colours.
2. **(Reflection/Written)** Imagine you are electing a Class Monitor. Write down three qualities you would look for in a good candidate (e.g., honest, fair, hardworking).
3. **(Oral/Discussion)** Ask your parents or guardians: "What is one thing you think makes a democracy work well, and one challenge we face with democracy in Nigeria?" Briefly write down their points.

WEEK 4: YOUTH AND NATION BUILDING

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Identify who a "Youth" is.
2. Explain the importance of education and skills for youths.
3. List three social vices youths should avoid.
4. Discuss how youths can contribute to nation-building.

CONTENT

1. Who is a Youth?

A youth is a young person between childhood and full adulthood. In Nigeria, this is often considered to be a person between the ages of 18 and 35 years. Youths are the backbone and the future of any nation. They are full of energy, fresh ideas, creativity, and strength. This is why they are often called the **"Leaders of Tomorrow."**

2. Education and Skill Acquisition

For youths to build Nigeria, they need the right tools. The two most important tools are:

- **Formal Education:** Going to school (secondary school, university, polytechnic) is crucial. Education teaches you how to read, write, calculate, think critically, and solve problems. It opens your mind to the world.

- **Skill Acquisition (Vocational Training):** Not every youth will go to university.

Learning a practical skill is equally powerful and can lead to self-employment. **Examples:**

- **Technology:** Computer programming, graphic design, digital marketing.
- **Trades:** Plumbing, electrical work, tailoring, fashion design, catering.
- **Agriculture:** Modern farming techniques, fishery, poultry. Having a skill means you can create a job for yourself and even employ others.

3. Social Vices to Avoid

Social vices are bad behaviours that destroy individuals and harm society. Youths must stay far away from:

- **Cultism/Gangsterism:** Joining secret, violent groups in schools or communities. It leads to killings, fear, and ruins futures.
- **Drug and Substance Abuse:** Using illegal drugs like cannabis, cocaine, or abusing prescription medicines. It destroys health, the brain, and leads to crime.
- **Cybercrime (Yahoo-Yahoo):** Using the internet to scam or steal money from people. It is a crime that can lead to long prison sentences and ruins Nigeria's reputation.
- **Political Thuggery:** Being paid by politicians to intimidate opponents, snatch ballot boxes, or cause violence during elections. It is a waste of youth potential.
- **Examination Malpractice:** Cheating in exams. It gives you a certificate you didn't earn and you won't have the real knowledge to do the job.

4. How Youths Can Build the Nation

You are not just the future; you can start contributing now:

- **Be a Patriot:** Love Nigeria. Speak well of her. Obey her laws. Respect her symbols (flag, anthem).
- **Excel in Your Studies:** Be the best student you can be. A educated youth is an asset.
- **Be Innovative:** Use your brain to solve small problems around you. Can you design a better tool? Start a small business selling something useful?
- **Community Service:** Volunteer. Help clean your street, visit an orphanage, tutor younger pupils in your area.
- **Be a Role Model:** Live a life of honesty and hard work. Influence your peers positively.

SEVALUATION

1. Why are young people called the "Leaders of Tomorrow"?
2. Give an example of a practical skill a youth can learn instead of going to university.
3. What is political thuggery and why is it bad?
4. How does excellence in education help in nation-building?
5. What is one simple act of community service a Primary 6 pupil can do?

ASSIGNMENT

1. **(Vision/Writing)** Write a short paragraph titled: "My Future Career for Nigeria." What do you want to be when you grow up (e.g., doctor, engineer, farmer, programmer) and how will your work help to build Nigeria?
2. **(Observation)** Look around your community. List three different skilled jobs or trades you see people doing (e.g., mechanic, hair stylist, baker).
3. **(Creative)** Create a short, catchy slogan or poster message against Cultism in Schools. (e.g., "Books, Not Gangs – Your Future is Bright!").

WEEK 7: CONTEMPORARY ISSUES IN NIGERIA *(Note: Weeks 5 & 6 are Midterm Exam and Break)*

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Identify two major security challenges in Nigeria.
2. Discuss the importance of a good healthcare system.
3. Define corruption.
4. Mention one agency fighting corruption in Nigeria.

CONTENT

1. Security Challenges

Security means being safe and protected. Nigeria faces some serious security problems that affect the lives of citizens.

- **Insurgency/Terrorism (North-East):** Groups like **Boko Haram** use violence, bombings, and kidnappings to cause fear. They attack villages, schools, and markets. The Nigerian Military is fighting to stop them and protect citizens.
- **Banditry and Kidnapping (North-West & Central):** Armed groups, often called bandits, attack villages, steal cattle, and kidnap people from schools, farms, and roads to demand huge ransom money.
- **Effects:** These problems make people afraid to farm, travel, or go to school. They destroy lives and properties.

2. The Need for Economic Development

Economic development means improving the wealth and well-being of all citizens. Nigeria is working to:

- **Diversify the Economy:** This means not depending only on oil money. We are trying to grow other sectors like Agriculture (to grow our own food), Manufacturing (to make our own goods), and Technology (to create new solutions).

- **Create Jobs:** When the economy is good, companies can employ more people. Youths need jobs to have a good life and stay away from crime.

3. Healthcare and Education

These are two critical services every citizen needs.

- **Healthcare System:** This includes hospitals, clinics, doctors, and nurses. A good healthcare system means:
 - People don't die from preventable diseases like malaria, typhoid, or diarrhea.
 - Mothers can give birth safely.
 - Children can get vaccinated. Many Nigerians still struggle to get good healthcare because there aren't enough facilities or they are too expensive.
- **Education:** The problem of "**Out-of-School Children**" is huge. Millions of children who should be in classrooms are not. This is due to poverty, insecurity, or cultural beliefs. Education is the key to breaking the cycle of poverty and building a better future.

4. The Problem of Corruption

- **Definition:** Corruption is the misuse of public power or position for private gain. It is when a government official, politician, or civil servant steals money meant for roads, schools, or hospitals. It is also when someone takes a bribe to do their job or to look the other way.
- **Effects:** Corruption is like a poison. It steals from the poor. It leads to bad roads, no electricity in hospitals, and poorly equipped schools. It makes the country poorer.
- **Fighting Corruption:** The government has created special agencies to investigate and prosecute corrupt people.
 - **EFCC: Economic and Financial Crimes Commission.** Fights advanced fee fraud (419) and corruption involving money.
 - **ICPC: Independent Corrupt Practices Commission.** Focuses on preventing and punishing corruption in public offices.

EVALUATION

1. What is the name of the violent group causing insecurity in the North-East of Nigeria?
2. Why is it dangerous for farmers if there is banditry in their area?
3. What does it mean to "diversify the economy"?
4. What is corruption in simple terms?
5. Which agency fights crimes like "Yahoo-Yahoo" and money laundering?

ASSIGNMENT

1. **(Research/Drawing)** Find out what the EFCC logo looks like (an eagle). Draw it or describe it in your notebook. What does an eagle symbolize? (Strength, vision).
2. **(Reasoning/Writing)** Write three sentences explaining why kidnapping is a terrible crime. (Think about the victim, the family, and society).
3. **(Creative Thinking)** If you were the President for one day, what is the first problem you would tackle— insecurity, poor healthcare, or corruption? Choose one and give one reason for your choice.

WEEK 8: SCIENCE, TECHNOLOGY AND INNOVATION

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Mention the name of a Nigerian scientist or inventor.
2. Define "Technology Hub."
3. Identify the importance of Nigeria's space program.
4. Explain how technology helps agriculture.

CONTENT

1. Nigerian Innovators and Scientists

Nigerians are very intelligent and creative people. We have made significant contributions to science and technology globally.

- **Dr. Philip Emeagwali:** He is a world-famous computer scientist. He did groundbreaking work on how to make many computers work together as one super-fast machine (parallel computing). His ideas helped in the development of the internet.
- **Jelani Aliyu:** He is a world-class automotive designer. He designed the sleek Chevrolet Volt, a popular electric car for General Motors in America. He now works in Nigeria to help develop our own car industry.
- **Professor Ayodele Awojobi:** A brilliant engineer and inventor known for his work in mechanical engineering.
- **Dr. Ameyo Adadevoh:** She was a brave doctor who helped prevent the spread of the deadly Ebola virus in Nigeria in 2014 by identifying and quarantining the first patient.

2. Technology Hubs in Nigeria

A technology hub or tech hub is a place (like a building or community) where people who work in technology—like software developers, programmers, and designers—come together. They use computers to create mobile apps, websites, and software to solve problems. The most famous one in Nigeria is:

- **Yaba, Lagos:** Often called "**Yabacon Valley**" (like Silicon Valley in the USA). It is filled with tech startups, innovation labs, and companies creating Nigerian solutions for Nigerian problems.

3. Nigeria's Space Program

Yes, Nigeria has a space agency! It is called **NASRDA (National Space Research and Development Agency)**.

- **What do they do?** They build and launch satellites into space.
- **NigeriaSat-1 and NigeriaSat-2:** These are Nigerian satellites orbiting the Earth.
- **Why is this important?** Satellites are not just for "space travel." They help us in everyday life:
 - **Agriculture:** They take pictures of farmlands from space to see which areas are fertile, dry, or affected by pests.
 - **Disaster Management:** They help monitor floods, oil spills, and desertification.
 - **Security:** They can help track movements in remote areas.
 - **Communication:** They help improve TV, radio, and internet signals.

4. Technology in Agriculture (AgriTech)

Technology is changing farming from the old, tiring methods to smarter, more efficient ones.

- **Mobile Phones:** Farmers can use apps to check weather forecasts, market prices for their crops, and connect with buyers.
- **Drones:** Small flying machines (drones) can be used to spray fertilizers or pesticides on large farms quickly. They can also take pictures to check the health of crops.
- **Improved Tools:** Machines like tractors, planters, and harvesters make farming faster and less labour-intensive than using just a hoe and cutlass.

EVALUATION

1. What is Dr. Philip Emeagwali famous for in the world of computers?
2. What is a Technology Hub?
3. What does the abbreviation NASRDA stand for?
4. Name one practical way a satellite helps Nigerian farmers.
5. How can a mobile phone be a useful tool for a farmer in a village?

ASSIGNMENT

1. **(Research)** Find out the name of one Nigerian financial technology (Fintech) app or company that people use to send money or pay bills (e.g., Paystack, Flutterwave, Opay). Write it down.
2. **(Drawing)** Draw a simple picture of a satellite in orbit around the Earth. Label it "NigeriaSat-1".
3. **(Written)** In one sentence, state what Jelani Aliyu is famous for designing.

WEEK 9: NIGERIA'S CULTURAL DIVERSITY AS STRENGTH

OBJECTIVES By the end of the lesson, pupils should be able to:

1. State the number of ethnic groups in Nigeria (approx. 250+).
2. Explain the meaning of religious tolerance.
3. List three benefits of cultural diversity.
4. Identify national symbols that promote integration.

CONTENT

1. Our Rich Diversity

Nigeria is one of the most diverse countries in the world. This diversity is like a beautiful, multi-coloured cloth.

- **Ethnic Groups:** We have **over 250 distinct ethnic groups**. The three largest are Hausa-Fulani, Yoruba, and Igbo. Others include Kanuri, Tiv, Ibibio, Ijaw, Edo, Nupe, Urhobo, and hundreds more.
- **Languages:** We speak **over 500 languages!** The official language is English, which helps us all communicate with each other.
- **Religions:** The two major religions are Christianity and Islam. Many people also practice African Traditional Religions. This mix is part of our national identity.

2. Religious Tolerance

Tolerance means accepting and respecting people who are different from you, even if you don't agree with their beliefs or practices. Religious tolerance is crucial for peace in Nigeria.

- It means a Muslim and a Christian can be neighbours, friends, and even business partners.
- It means we participate in each other's joyful moments. Muslims visit their Christian friends during Christmas. Christians greet their Muslim friends during Eid-el-Fitr (Sallah).
- It means we do not fight or kill because of religion. We solve disagreements through dialogue and respect for the law.

3. Why Diversity is a Strength (Not a Weakness)

Our differences make Nigeria a vibrant and rich country:

- **Cuisine (Food):** We enjoy a huge variety of delicious foods. Jollof rice is famous nationwide, but we also have Tuwo Shinkafa (North), Amala and Ewedu (West), Fufu and Oha Soup (East), and Banga Soup (South-South).
- **Music and Arts:** Different cultures give us different music—Fuji and Apala from the Yoruba, Highlife from the Igbo, Gangaa from the Hausa. Our Nollywood movies tell stories from all cultures.
- **Skills and Innovation:** Different groups have traditional expertise that can be used for development. Some are great traders, others are famous for craftsmanship, farming, or technology. Together, we can build a stronger nation.

4. Promoting National Integration

The government and institutions work to turn our diversity into unity:

- **NYSC (National Youth Service Corps):** Graduates serve in states other than their own, living with and learning from different cultures.
- **Federal Unity Colleges:** Secondary schools where students from all states live and learn together.
- **National Symbols:** These belong to all Nigerians, regardless of tribe or religion. They remind us we are one.
 - **The Flag (Green-White-Green):** Green for agriculture, White for peace.
 - **The National Anthem and Pledge:** We sing and recite them together, promising to serve our fatherland.
 - **The Coat of Arms:** With its motto: "**Unity and Faith, Peace and Progress.**"

EVALUATION

1. Approximately how many ethnic groups are in Nigeria?
2. What does religious tolerance mean?
3. Give one example of how Nigeria's cultural diversity benefits us (think food, music, skills).
4. What is the main purpose of the NYSC program?
5. What is the common motto on the Nigerian Coat of Arms that calls for unity?

ASSIGNMENT

1. **(Cultural Exploration)** List three popular Nigerian dishes and write the ethnic group they are most associated with (e.g., Tuwo Shinkafa - Hausa).
2. **(Drawing)** Draw a simple picture showing religious harmony. Draw two people (one with a cross, one with a crescent and star) shaking hands or smiling together.
3. **(Memorization)** Write out the first stanza of the current Nigerian National Anthem from memory. Check and correct it afterwards.

WEEK 10: PREPARING FOR SECONDARY SCHOOL AND CITIZENSHIP

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Describe the transition from primary to secondary school.
2. List three qualities of a responsible citizen.
3. Explain the meaning of patriotism.
4. Create a personal vision for their role in Nigeria's future.

CONTENT

1. Transition to Secondary School

You are about to complete Primary 6. The next step is Junior Secondary School (JSS 1). This is an exciting new chapter with important changes:

- **Academic Changes:** You will have more subjects (like Basic Science, Basic Technology, French, Computer Studies). You will have different teachers for different subjects.
- **Social Changes:** You will meet new friends from different primary schools and backgrounds. Your school will likely be bigger.
- **Expectations:** You will be expected to be more independent and responsible. You must manage your time, do more homework, and take greater care of your books and belongings. It's a step towards becoming a young adult.

2. Qualities of a Responsible Citizen

As you grow older, your role as a citizen becomes more active. A responsible citizen:

- **Obeys Laws:** Follows school rules, traffic laws, and national laws.
- **Respects Public Property:** Does not vandalize school desks, break streetlights, or litter in public places. These things belong to all of us.
- **Is Honest and Has Integrity:** Tells the truth, does not cheat, and does the right thing even when no one is watching.
- **Performs Civic Duties:** Registers to vote when 18, pays taxes in the future, and serves if called for jury duty.

- **Promotes Peace and Unity:** Does not spread hate speech or engage in tribal or religious discrimination.

3. Patriotism: Love for One's Country

Patriotism is a deep love, loyalty, and commitment to your country. It is not just waving a flag; it shows in your actions:

- **Speaking Positively:** Promoting the good things about Nigeria instead of always criticizing.
- **Buying Nigerian:** Choosing to buy products made in Nigeria when you can, to support local jobs and industries.
- **Representing Well:** Behaving in a way that brings honour to Nigeria, both at home and if you travel abroad.
- **Contributing Your Quota:** Using your skills and talents to solve problems and make Nigeria better.

4. Your Personal Vision for Nigeria's Future

You are the future. Nigeria in 20 years will be shaped by what you do. Start thinking now:

- **What are your talents?** Are you good at explaining things? You could be a teacher. Do you like fixing things? You could be an engineer. Do you care for people? You could be a doctor or nurse.
- **What problems do you want to solve?** Do you want to ensure every child can read? Build better roads? Create a tech app that helps farmers? Provide clean water?
- **Make a Plan:** Your education is the first step in that plan. Do well in secondary school. Stay focused. Avoid distractions.

EVALUATION

1. What is one academic difference between Primary School and Secondary School?
2. What does a patriot do?
3. If you see someone scratching their name on a school desk, what quality of good citizenship are they lacking?
4. Why is it important for a citizen to pay taxes when they start working?
5. In your own words, what is one way you think you can help Nigeria in the future?

ASSIGNMENT

1. **(Personal Commitment)** Write a "Personal Pledge for JSS1". Write 3-4 promises to yourself about how you will behave in secondary school (e.g., "I promise to be punctual," "I promise to respect all my teachers").
2. **(Anticipation)** List three subjects you are looking forward to learning in Junior Secondary School and say why.

3. **(Symbolism)** Draw the Nigerian Coat of Arms. If drawing is difficult, write a description:
What are the two animals holding the shield? (Two white horses). What do they stand for? (Dignity).

WEEK 11: REVISION

OBJECTIVES By the end of the lesson, pupils should be able to:

1. Recall the hierarchy of Nigerian courts.
2. Summarize human rights and responsibilities.
3. Discuss the roles of youth and technology in development.
4. Answer questions confidently on all Third Term topics.

CONTENT

This is a revision week for all topics covered in the Third Term. Let's summarize the key points:

- **The Legal System (Week 1):** Sources of law (Constitution, Common, Customary, Islamic). The court hierarchy (Supreme Court to Magistrate Courts). The Rule of Law.
- **Human Rights (Week 2):** Definition of human rights. Key rights (Life, Dignity, Education for children). The link between rights and responsibilities.
- **Democracy (Week 3):** Meaning of democracy. Principles (Rule of Law, Majority Rule/Minority Rights, Free & Fair Elections). The duties of an active citizen.
- **Youth & Nation Building (Week 4):** Youths as future leaders. Importance of education and skills. Dangers of social vices (cultism, drugs). How to contribute now.
- **Contemporary Issues (Week 7):** Security challenges (insurgency, kidnapping). Need for economic diversification. Problems of healthcare, education, and corruption. Agencies like EFCC/ICPC.
- **Science & Technology (Week 8):** Nigerian innovators (Emeagwali, Aliyu). Tech hubs (Yaba). Space program (NASRDA) and satellites. Technology in agriculture.
- **Cultural Diversity (Week 9):** Over 250 ethnic groups. Religious tolerance. Benefits of diversity (food, arts). National integration through NYSC, Unity Schools, National Symbols.
- **Transition & Citizenship (Week 10):** Preparing for Secondary School. Qualities of a responsible citizen and a patriot. Your personal vision for Nigeria's future.

Interactive Session: The teacher will conduct a comprehensive quiz, group review sessions, and open Q&A to clarify any difficult areas. Pupils will be encouraged to share what they found most interesting.

EVALUATION (Teacher will select questions from the term's work, for example:)

1. Which is the final court in Nigeria?
2. Name two rights of a child.
3. What is the main difference between democracy and military rule?
4. Give one example of a social vice that can destroy a youth's future.
5. What does EFCC stand for and what does it do?
6. Which Nigerian designed a famous electric car?
7. What is the purpose of the NYSC program?
8. What is one quality of a patriotic citizen?

ASSIGNMENT

1. **(Study)** Thoroughly review all your notes from Third Term (Weeks 1-10) to prepare for your final Primary 6 examinations.
2. **(Reflective Writing)** Write a farewell letter to your Primary School. Thank your Headteacher, class teacher, and the school for the education and memories over the years.
3. **(Consolidation)** Look back at your history notes for the entire year (First, Second, and Third Terms). List five (5) of the most important lessons you have learned about Nigeria that you will always remember.
