

SS1 NIGERIAN HISTORY LESSON NOTES

FIRST TERM:

WEEK 1: INTRODUCTION TO HISTORY

Topic: Meaning, Scope, and Relevance of History

1. Content: The Meaning and Scope of History

- **A. What is History? (Beyond "The Study of the Past")**
 - **Simple Definition:** History is the study of past events, particularly those related to human affairs.

- **A More Accurate Definition:** History is a *systematic* and *interpretive* inquiry into the human past. It is not just *what* happened, but *how* and *why* it happened, *who* was involved, and *what* its short-term and long-term consequences were.
- **Key Distinction:** It's crucial to differentiate "The Past" from "History."
 - **The Past:** Everything that has ever happened (events, thoughts, actions). It is vast, chaotic, largely unrecorded, and gone forever.
 - **History:** The *academic discipline* and the *narrative* that attempts to find, analyze, organize, and present a coherent, evidence-based argument about specific parts of the past. History is what historians *write*.
- **E.H. Carr's Definition:** A famous historian, E.H. Carr, defined history as "an unending dialogue between the present and the past." This means our understanding of the past is *always* shaped by the questions, values, and problems of the present (e.g., today we are very interested in environmental history, a topic historians 100 years ago ignored).
- **History vs. Other Disciplines:**
 - **vs. Social Studies:** Social Studies is a *blend* of many disciplines (geography, economics, civics, history) aimed at creating good citizens. History is a *distinct* academic discipline focused on the past with its own rigorous methodology.
 - **vs. Archaeology:** Archaeology is a *source* for history, a "tool in the toolbox." It provides the material evidence (artifacts) that historians then interpret.
- **B. The Scope of History (What Does History Cover?)**
 - The scope of history is as broad as the human experience itself. It is not just about "great men," wars, and politics ("top-down" history). Modern history includes "history from below" (the study of ordinary people).
 - **Political History:** The study of power, government, laws, leadership, state-building, and conflicts (e.g., the rise of the Oyo Empire, the amalgamation of Nigeria).

- **Diplomatic History:** A sub-set of political history focusing on the relationships between states (e.g., pre-colonial diplomacy between the Benin Kingdom and its neighbours).
- **Social History:** The study of everyday life, family structures, gender roles, class relations, urbanisation, and customs (e.g., the role of women in pre-colonial Igbo society, the history of festivals).
- **Economic History:** The study of how people make a living, trade, agriculture, technology, industry, and wealth distribution (e.g., the trans-Saharan trade, the economic impact of the palm oil trade).
- **Cultural History:** The study of art, music, literature, religion, and ideas (e.g., the significance of Ife bronze heads, the spread of Islam in Northern Nigeria).
- **Intellectual History:** The study of how ideas themselves (e.g., nationalism, Pan-Africanism) have evolved and shaped society.
- **Environmental History:** A newer field studying the interaction between humans and their natural environment over time (e.g., how desertification in the North shaped migration patterns).
- **Historiography:** This is the "history of history." It studies *how* our understanding of a historical event (e.g., the Nigerian Civil War) has changed over time as new evidence emerges or new questions are asked.

2. Context: Importance and Relevance of History in Nation-Building

- **A. General Importance of History:**

1. **Understanding Identity:** History tells us who we are and where we come from. It is the collective memory of our family, our community, and our nation.
2. **Learning from the Past (Contextualising):** It provides a vast "laboratory" of human successes and failures. While history doesn't "repeat" exactly, it provides context and shows us the range of human possibilities, allowing us to (in theory) avoid repeating mistakes.
3. **Developing Critical Thinking:** History is the best discipline for developing critical analysis. It teaches us to analyze evidence, evaluate different arguments,

detect bias, and build a coherent argument based on evidence—skills vital for any field (law, medicine, business).

4. **Understanding Change and Continuity:** History is the only discipline that explains *how* societies change over time, and also *why* some things (like cultural beliefs) stay the same.
- **B. Specific Relevance to Nation-Building (especially for Nigeria):**
 - "Nation-building" is the complex process of constructing a unified national identity, loyalty, and consciousness, especially in a diverse, multi-ethnic, post-colonial country like Nigeria.
2. **Forging a Common Identity:** History provides the shared stories, heroes (Herbert Macaulay, Funmilayo Ransome-Kuti, Queen Amina), struggles (colonialism, the fight for independence), and triumphs that can unite diverse peoples under a single "Nigerian story."
 3. **Promoting National Unity & Countering Myth:** By studying the long-standing interactions, trade links, and inter-marriages between different groups (e.g., Hausa-Yoruba trade, Benin-Ife links) *before* colonialism, we can scientifically counter the dangerous myth that Nigeria's groups are "natural enemies" who were "forced together."
 4. **Providing Context for Current Conflicts:** History helps us understand the *deep roots* of contemporary problems (e.g., resource control, boundary disputes, farmer-herder clashes, ethnic tensions). Understanding their origins is the first step to resolving them.
 5. **Informing Public Policy:** Past government policies on agriculture, education, or governance (e.g., Operation Feed the Nation) can be studied to see what worked and what failed, helping to inform better policies today.
 6. **Instilling Patriotism and National Consciousness:** By celebrating national achievements (e.g., the 1996 Olympic football gold) and understanding the sacrifices made for independence and unity, history can foster a sense of pride and belonging.

7. **Fostering Reconciliation:** Studying difficult periods like the Civil War from *all* perspectives, with empathy and honesty, is essential for national healing and building a "more perfect union."

3. Evaluation (Week 1)

- **Objective Questions:**

1. The statement "History is an unending dialogue between the present and the past" was made by: (a) Lord Lugard (b) Herodotus (c) E.H. Carr (d) Leopold von Ranke.
2. Which of these is NOT a primary branch of history? (a) Political (b) Economic (c) Future (d) Social.
3. The *entirety* of everything that has ever happened is known as: (a) History (b) The Past (c) The Scope (d) Archaeology.
4. The study of how historical writing on a topic has changed over time is called: (a) Historiography (b) Archaeology (c) Social History (d) Histrionics.

- **Theory Questions:**

1. Differentiate clearly between "History" and "The Past."
2. Explain two reasons why history is crucial for nation-building in Nigeria, using a specific example for each.

4. Assignment (Week 1)

- In a 300-word essay, discuss the statement: "To build a strong future for Nigeria, we must first have an honest understanding of its past." Use two concrete examples from Nigerian history (e.g., pre-colonial interactions, the colonial experience, or the Civil War) to support your argument.

WEEK 2: WHY WE TEACH HISTORY

Topic: Values of Studying History

1. Content: Educational, Moral, Political, and Social Values

- This week builds on "importance" by focusing on the specific *values* that historical study imparts to an individual and society.
- **A. Educational Values (The "Skills")**
 1. **Critical Thinking:** History is not about memorizing dates. It is about *analysis*. It teaches you to evaluate evidence (sources), identify bias, compare conflicting accounts, and build a logical, evidence-based argument. This is the primary skill for identifying "fake news" and propaganda.

2. **Research Skills:** History trains you to find information, organize it, and present it coherently. You learn how to use libraries, archives, footnotes, bibliographies, and digital sources effectively.
 3. **Communication Skills:** To be a good historian, you must be a clear and *persuasive* writer and speaker. The discipline demands that you explain complex ideas and narratives in a compelling way.
 4. **Intellectual Curiosity:** History encourages you to ask "Why?" and "How?" It fosters a lifelong habit of inquiry about the world around you, moving beyond simple "what" questions.
- **B. Moral Values (The "Character")**
 1. **Empathy:** History forces us to step into the shoes of people who lived in different times and circumstances. We learn to understand their motivations, fears, and beliefs, even if we don't agree with them. This is different from *sympathy* (feeling sorry for them). Empathy is an *intellectual* understanding.
 2. **Ethical Reflection:** Studying events like the trans-Atlantic slave trade, the Holocaust, or the Nigerian Civil War forces us to confront difficult moral questions about human nature, justice, oppression, and responsibility.
 3. **Humility:** History shows us that our own time is not the "end of history." We see how past civilizations (like Benin, Ife, Oyo) rose and fell, which can give us perspective on our own achievements and challenges. It teaches us that our "modern" beliefs may seem strange to future generations.
 4. **Inspiration:** We study the lives of individuals who demonstrated great courage, integrity, and resilience (e.g., Queen Amina of Zazzau, King Jaja of Opobo, Margaret Ekpo), which can inspire us to act with integrity in our own lives.
 5. **Historical Perspective:** The ability to understand that people in the past did not know what we know now. We must judge them by the standards and knowledge of *their* time, not ours. This is the opposite of "anachronism."
 - **C. Political Values (The "Citizen")**
 1. **Informed Citizenship:** To be an effective citizen, you must understand the history of your nation's political systems, constitution, and laws. You learn *why* we have a presidency, a federal system, state boundaries, etc.

2. **Understanding "Spin" and Propaganda:** History is full of propaganda. By learning to detect bias in historical sources, we become better at detecting it in modern political speeches, advertisements, and media.
 3. **Holding Leaders Accountable:** A citizen who knows the historical context of political promises and actions is better equipped to ask tough questions and demand accountability.
 4. **Understanding International Relations:** History explains the origins of alliances, conflicts, and Nigeria's foreign policy (e.g., why Nigeria took a leading role in ECOMOG or the fight against Apartheid in South Africa).
 5. **National Consciousness:** Studying a *shared* history is what binds citizens together and turns a "population" into a "nation" with a common sense of destiny.
- **D. Social Values (The "Community")**
 1. **Cultural Awareness and Tolerance:** History introduces us to the vast diversity of human cultures. In Nigeria, it helps us appreciate the rich traditions of our 250+ ethnic groups, promoting tolerance and respect instead of prejudice.
 2. **Understanding Social Change:** History shows us how social structures (like the family, gender roles, or class) are not fixed or "natural," but evolve over time. This helps us navigate the changes in our own society.
 3. **Combating Prejudice:** History teaches us that stereotypes and prejudices are often a product of specific historical events or political manipulation (e.g., "divide and rule" policies in colonialism). It shows they are *learned*, not "natural," and can therefore be *unlearned*.
 4. **Global Citizenship:** By studying Nigerian, African, and World History, we understand our nation's place in the interconnected global community.

2. Evaluation (Week 2)

- **Objective Questions:**
 1. The ability to understand the world from another person's perspective is called: (a) Critical Thinking (b) Empathy (c) Citizenship (d) Research.
 2. Learning to detect bias in a politician's speech is an example of a: (a) Moral Value (b) Political Value (c) Social Value (d) Economic Value.

3. Understanding that people in the past did not have our modern knowledge is called: (a) Historical Perspective (b) Social Value (c) Propaganda (d) Empathy.
- **Theory Questions:**
 1. Explain the difference between the "educational value" and "moral value" of history.
 2. Choose one "social value" of history and explain its importance in a multi-ethnic country like Nigeria, using a practical example.

3. Assignment (Week 2)

- Select one historical figure from Nigeria (e.g., Herbert Macaulay, Ahmadu Bello, Nnamdi Azikiwe, Obafemi Awolowo, Margaret Ekpo). Write two paragraphs explaining how studying their life can provide both *moral* and *political* value to a student today.

WEEK 3: SOURCES OF HISTORY I

Topic: Primary, Secondary, and Tertiary Sources

1. Content: Oral Tradition, Written Sources, Archaeology, Linguistics, etc.

- Historians are like detectives; they cannot study the past directly. Instead, they must rely on *evidence* left behind. This evidence is called **Sources**.
 - **Primary Sources:** Materials created *at the time* of the event, or by an eyewitness/participant. They are raw, unfiltered data. This is the "stuff" of history.
 - **Secondary Sources:** Materials created *after* the event, by historians interpreting and analyzing primary sources. They are arguments *about* the past. (e.g., your textbook, a biography of Lord Lugard).

- **Tertiary Sources:** Materials that *summarize* or *index* secondary sources (e.g., encyclopedias, dictionaries, bibliographies).
- This week, we focus on the *types* of primary sources.
- **A. Oral Tradition**
 - **Definition:** Historical information passed down by word of mouth from one generation to the next. It is the *most important* source for pre-colonial Nigerian history.
 - **Types:**
 1. **Myths:** Symbolic stories explaining the origin of a people, their relationship with God, or natural phenomena (e.g., the Oduduwa myth).
 2. **Legends:** Stories about heroic figures, often based on a real person or event, but embellished over time (e.g., the Bayajidda legend).
 3. **Folktales & Proverbs:** Moral stories and wise sayings that reveal the values and beliefs of a society.
 4. **Songs, Chants, and Poems:** (e.g., *Ijala* - Yoruba hunter's chants) that preserve history and cultural knowledge.
 5. **King Lists & Genealogies:** Lists of rulers or family trees recited from memory by specialists (e.g., *Griots*).
 - **Pros:** Often the *only* source available for pre-literate societies. Provides rich cultural context and the people's own perspective ("insider view").
 - **Cons:** Prone to distortion (memory lapses), exaggeration, "telescoping" (compressing time, e.g., making 10 kings into 5), and deliberate manipulation for political reasons (e.g., to legitimize a new king).
 - **Methodology:** Historians must collect multiple versions from different informants and cross-reference them with other sources (like archaeology).
- **B. Oral History**
 - **Definition:** *Different* from oral tradition. Oral history is the collection of memories from people who *witnessed or participated in* recent historical events (e.g., interviewing veterans of the Nigerian Civil War, or participants in the Aba Women's Riots).
- **C. Written Sources (Archives)**

- **Definition:** Any information from the past that is written, printed, or inscribed.
- **Examples in Nigerian History:**
 1. **Arabic Manuscripts:** (e.g., The Kano Chronicle, works by Uthman dan Fodio). Very important for the history of the Northern states and the Sokoto Caliphate.
 2. **Missionary Records:** Diaries, letters, and reports from 19th-century missionaries.
 3. **Colonial Government Records:** Memos, reports, laws, and letters from colonial officers (e.g., Lugard's reports).
 4. **Company Records:** Ledgers and diaries from European (e.g., UAC, Royal Niger Company) and Nigerian traders.
 5. **Newspapers:** (e.g., *West African Pilot*). Crucial for the nationalist movement.
 6. **Personal Documents:** Diaries, letters, autobiographies (e.g., *My Life* by Ahmadu Bello).
- **Pros:** Can be preserved with high accuracy. Can be dated precisely.
- **Cons:** Can be highly biased (e.g., a colonial officer's report on a riot will be different from a participant's). Often only reflects the views of the literate, wealthy, and powerful (the "elite").
- **D. Archaeology**
 - **Definition:** The study of the past through the recovery and analysis of *material remains* (artifacts) dug from the ground.
 - **Examples in Nigerian History:**
 1. **Nok Terracotta Heads:** (c. 1500 BC - 500 AD) Proves the existence of a sophisticated ancient society in the Middle Belt.
 2. **Igbo-Ukwu Bronzes:** (c. 9th Century AD) Exquisite bronze objects that show a complex society with long-distance trade links.
 3. **Ife Terracotta & Bronze Heads:** (c. 12th-15th Century AD) World-famous naturalistic sculptures.
 4. **Benin Walls:** A massive, ancient earthwork.

5. **Dufuna Canoe:** (c. 6500 BC) Discovered in Yobe State, it is the oldest known boat in Africa and one of the oldest in the world, proving ancient habitation.

- **Pros:** Provides tangible evidence for pre-literate societies. Can reveal technology, diet, trade, and settlement patterns. Can be scientifically dated.
- **Cons:** Expensive. The act of digging is destructive. Artifacts can be difficult to interpret without other sources (e.g., we have Nok art, but we know little of their language or beliefs).

- **E. Linguistics**

- **Definition:** The scientific study of language.
- **How it's used:**
 1. **Glottochronology:** By comparing vocabulary, grammar, and sound changes, historians can trace the relationships ("family tree") and migration patterns of different groups.
 2. **Loanwords:** Studying "borrowed" words reveals historical contact (e.g., the presence of Hausa words in Yoruba, or Portuguese words in Efik).
- **Example:** Linguistic evidence shows that Yoruba, Edo, and Igala languages are related (part of the Kwa language sub-family), suggesting they all split from a common "ancestor" language thousands of years ago.
- **Pros:** Reveals *deep* historical connections (thousands of years) that are not preserved in any other source.
- **Cons:** Highly technical. Provides a relative timeline, not exact dates.

- **F. Ethnography**

- **Definition:** The study and description of living human cultures. Historians sometimes use ethnographic studies of *modern* societies to cautiously infer what *past* societies with similar technology or organization might have been like.

2. Evaluation (Week 3)

- **Objective Questions:**

1. A textbook on the Nigerian Civil War written in 2020 is a: (a) Primary Source (b) Secondary Source (c) Oral Tradition (d) Tertiary Source.

2. The Kano Chronicle is an example of a: (a) Written Source (b) Oral Tradition (c) Archaeological find (d) Linguistic model.
 3. Which source is most prone to "telescoping" (compressing time)? (a) Archaeology (b) Written Source (c) Oral Tradition (d) Linguistics.
 4. The study of "loanwords" is part of which field? (a) Archaeology (b) Linguistics (c) Ethnography (d) Oral History.
- **Theory Questions:**
 1. List and explain two advantages and two disadvantages of using Oral Tradition as a historical source.
 2. What is the difference between Oral Tradition and Oral History?
 3. What has Archaeology (e.g., Nok, Igbo-Ukwu, Dufuna Canoe) taught us about Nigeria's deep past?

3. Assignment (Week 3)

- **Mini-Project:** Act as a historian. Interview an elder in your family or community about a specific historical event *they witnessed* (this is Oral History). Ask them for one piece of Oral Tradition (a family origin story or folktale).
 1. Write down both stories (1-2 paragraphs each).
 2. In a separate paragraph, analyze them. Label which is Oral History and which is Oral Tradition. What challenges did you face in getting a "clear" story?

WEEK 4: SOURCES OF HISTORY II AND DATING

Topic: Determining Historical Time

1. Content: Chronology and Dating Methods

- History is built on two pillars: **Evidence** (sources) and **Chronology** (time). Chronology is the science of arranging events in their order of occurrence in time. Without it, history is just a jumble of stories.
- We use two types of dating:
 - **Relative Dating:** Placing events in a sequence. (e.g., "The Nok culture came *before* the Ife culture.") We don't know the exact year, but we know the order.
 - **Absolute Dating:** Assigning a specific calendar date or range to an event. (e.g., "Nigeria gained independence on October 1, 1960.")
- **A. Calendar Systems (for Absolute Dating)**
 - **Definition:** Systems created by societies to organize long periods of time.
 - **Examples:**
 1. **Gregorian Calendar:** The most widely used calendar today (January-December). It is a *solar* calendar. It numbers years based on a (now-corrected) calculation of Jesus Christ's birth. Dates are given as **A.D.** (*Anno Domini*, "in the year of the Lord") or **B.C.** (*Before Christ*).
 2. **B.C.E. / C.E.:** Many historians prefer the neutral terms **C.E.** (*Common Era*) and **B.C.E.** (*Before the Common Era*). The numbering is exactly the same (e.g., 2024 AD = 2024 CE; 500 BC = 500 BCE).
 3. **Islamic (Hijri) Calendar:** A *lunar* calendar (based on the moon's cycles) starting from 622 CE, the year of the Hijra. Used in many Arabic records.
Challenge: A lunar year is ~11 days shorter than a solar year, making direct conversion complex.
 4. **Traditional Calendars:** (e.g., The Igbo 4-day market week: *Eke, Orie, Afor, Nkwo*). Used to date local events.
- **B. Radiocarbon Dating (C-14 Dating) (for Absolute Dating)**
 - **Definition:** A scientific method used to date *organic* materials (things that were once alive, like wood, bone, cloth, seeds, charcoal).
 - **How it Works (Simplified):**
 1. All living things absorb a radioactive form of carbon called **Carbon-14 (C-14)** from the atmosphere.
 2. When the organism dies, it stops absorbing C-14.

3. The C-14 it already has begins to decay at a fixed, known rate.
 4. The **half-life** of C-14 is approximately 5,730 years (meaning after 5,730 years, half of the C-14 will be gone; after another 5,730 years, half of the remainder will be gone, etc.).
 5. Scientists measure the remaining C-14 in an artifact (e.g., a wooden mask, a bone) to calculate how long ago it died.
- **Relevance:** This is how we have absolute dates for archaeological finds like the Nok culture (dated to as early as 1500 BCE) and Igbo-Ukwu (dated to the 9th Century CE).
 - **Limitations:** Only works on organic material. Only reliable for up to ~50,000 years. It gives a *range* of dates (e.g., 900 CE +/- 70 years), not an exact day.
- **C. Genealogical Methods (for Relative Dating)**
 - **Definition:** Using king lists (dynastic lists) or family trees (genealogies) to create a timeline. This is often part of oral tradition.
 - **How it Works:** A historian collects a king list (e.g., a list of Obas of Benin or Oonis of Ife). They then assign an average number of years (a "generation," e.g., 25-30 years) to each reign to estimate a timeline.
 - **Pros:** Provides a framework for chronology in oral societies.
 - **Cons:** Highly unreliable. Names can be forgotten (creating gaps), reigns can be very short or very long, and the "average generation" is just a guess. Often politically motivated.
 - **D. Other Methods**
 1. **Stratigraphy:** (Relative) The archaeological principle that in an undisturbed site, the deepest layers of earth (strata) are the oldest. An artifact found in a lower layer is older than one found in a higher layer.
 2. **Linguistics (Glottochronology):** (Relative) Estimates how long ago two related languages split apart, based on changes in their core vocabulary.
 3. **Thermoluminescence:** (Absolute) A scientific method used to date inorganic material that was heated to a high temperature, such as **pottery** or burnt flint. It measures the energy trapped in the object since it was last fired.

4. **Dendrochronology:** (Absolute) Tree-ring dating. Counting the annual growth rings in wood. Very precise, but less useful in tropical Nigeria where trees may not have distinct annual rings.

2. Evaluation (Week 4)

- **Objective Questions:**

1. Which method would be used to find the absolute date of a piece of *charcoal* from an ancient Nok fire pit? (a) Genealogy (b) Stratigraphy (c) Radiocarbon Dating (d) Linguistics.
2. The term C.E. stands for: (a) Christ's Era (b) Common Era (c) Colonial Era (d) Carbon Era.
3. Placing the Alafin of Oyo in a list of successive kings is an example of: (a) Radiocarbon Dating (b) Calendar System (c) Genealogical Method (d) Stratigraphy.
4. Which method would be best for dating an ancient *pottery* shard? (a) C-14 (b) Thermoluminescence (c) Genealogy (d) B.C.E.

- **Theory Questions:**

1. Explain the difference between Relative Dating and Absolute Dating, giving two examples of each.
2. Describe, in simple terms, how Radiocarbon (C-14) dating works. What kind of materials can it be used on?

3. Assignment (Week 4)

- Draw a simple diagram or chart that visually explains the concept of Stratigraphy. Your diagram should show 3 layers of earth (A, B, C) with different artifacts (e.g., a pot, a bone, a coin) in each, and clearly label which layer is the OLDEST and which is the YOUNGEST.

WEEK 6: HISTORICAL SKILLS

Topic: Approaches to Historical Analysis

1. Content: Ancient and Modern Approaches; Critical Thinking

- This topic examines *how* the *method* (historiography) of writing history has changed over time.
- **A. Ancient Approaches to Historical Analysis (Pre-19th Century)**
 - **Characteristics:**
 1. **Chronicling:** The main goal was often to simply *record* events (annals or chronicles), especially the deeds of kings, heroes, and warriors.

2. **Moral Lessons:** History was seen as a "teacher." Historians (like the Roman historian Livy) used the past to provide moral examples of good and bad behavior for citizens.
 3. **Praise & Legitimacy (Hagiography):** Court historians (in Nigeria, *Griots* or royal oral historians) had the job of praising the current ruler and reciting his genealogy to prove his legitimate right to rule.
 4. **Supernatural Causes:** Events were often explained as the will of God, the gods, or fate, rather than human actions or economic/social forces.
 5. **Cyclical View:** Many ancient societies saw history as a repeating cycle (e.g., birth, growth, decay, death, rebirth).
 - **Examples:** The Greek historian Herodotus (often included myths and legends), or the court historians of the Oyo or Benin kingdoms.
 - **Weakness:** Little to no analysis of sources. Myths were often accepted as fact. Bias was open and expected.
- **B. Modern Approaches to Historical Analysis (Scientific/Critical History)**
 - **Origin:** Began in the 19th century, famously with the German historian **Leopold von Ranke**. His motto was to write history "as it actually happened" (*wie es eigentlich gewesen*).
 - **Characteristics:**
 1. **Emphasis on Primary Sources:** A "fetish" for primary sources. The rule is: "No documents, no history." (This was later modified by Africanists like Jan Vansina to include oral tradition as a valid primary source).
 2. **Objectivity:** The historian must try to be a neutral, "scientific" observer and minimize personal, political, or national bias. (Though we now accept *perfect* objectivity is impossible, as we all have biases).
 3. **Critical Evaluation of Evidence:** This is the core skill. The historian must act like a lawyer/detective and cross-examine their sources.
 - **External Criticism:** Is the source *authentic*? (Is this document a forgery? Is this Nok head real or a modern fake?)

- **Internal Criticism:** Is the source *credible*? (Was the author an eyewitness? What was their motive or bias? Did they have a reason to lie? Does their account match other, independent sources?)
- 4. **Causation:** Modern history is obsessed with "Why?" It looks for multiple, complex causes (long-term, short-term, trigger) for every event. It distinguishes between *correlation* (two things happen at the same time) and *causation* (one thing *caused* the other).
- 5. **Interpretation:** History is not just a list of facts. It is an *argument* about what the facts mean. This is why two modern historians can look at the same event (e.g., the amalgamation) and write two different books about it.
- **Later Developments:**
 - **Marxist History:** Focuses on economic factors and class struggle as the main "engine" of history.
 - **Annales School (French):** Focuses on long-term social, environmental, and cultural history ("history from below"), rather than just politics.
- **C. The Role of Critical Thinking and Evaluation of Evidence**
 - This is the practical skill set of a modern historian.
 - **Key Skills:**
 - 0. **Distinguishing Fact from Opinion:** A fact is "Lord Lugard amalgamated the Northern and Southern Protectorates in 1914." An opinion is "The amalgamation was a terrible mistake."
 - 1. **Identifying Bias:** Bias is a strong, one-sided perspective. A missionary's letter calling local customs "barbaric" is heavily biased. A good historian doesn't *discard* the source, but *uses* the bias as evidence of the missionary's worldview.
 - 2. **Corroboration:** The most important rule. **Never trust a single source.** A historian must find *multiple* (and different *types* of) sources that point to the same conclusion. (e.g., an oral tradition, a missionary letter, and an archaeological find all suggest a major battle occurred).

3. **Understanding Context:** Evaluating an event or statement based on the standards and knowledge of its *own* time, not ours.
4. **Avoiding Anachronism:** The error of applying modern ideas, morals, or technology to the past. (e.g., "Why didn't King Jaja just send an email?")

2. Evaluation (Week 6)

- **Objective Questions:**

1. The 19th-century historian who championed the "scientific" approach to history was: (a) Herodotus (b) E.H. Carr (c) Leopold von Ranke (d) Lord Acton.
2. Checking if a document is a forgery is an example of: (a) Internal Criticism (b) External Criticism (c) Corroboration (d) Bias.
3. A court historian praising his king is typical of which approach? (a) Modern (b) Critical (c) Scientific (d) Ancient.
4. The error of applying modern values to the past is called: (a) Bias (b) Anachronism (c) Corroboration (d) Causation.

- **Theory Questions:**

1. State three major differences between Ancient and Modern approaches to history.
2. What is "corroboration," and why is it essential for a historian?

3. Assignment (Week 6)

- **Fictional Scenario:** You are a historian studying a protest in a school. You have two primary sources:
 - **Source A:** The Principal's official report, which calls the students "violent hooligans" and says they "destroyed property without reason."
 - **Source B:** The diary of a student who participated, which says it was a "peaceful protest" and that property was only "accidentally damaged" when security guards attacked them.
- **Your Task:** Write one paragraph for *each* source, applying "Internal Criticism." What is the author's bias? What is their motive? Why might they not be telling the complete truth?

Finally, what *other* sources would you look for (corroboration) to find out what *really* happened?

WEEK 8: PROSPECTS OF ICT IN HISTORICAL STUDIES

Topic: ICT in History

Summary: Demonstrates the dynamic, multi-directional impact of technology on historical research and public engagement.

1. Content: Use of ICT in Data Collection, Storage, and Presentation

- **ICT** stands for Information and Communication Technology. This refers to computers, the internet, software, and digital devices. ICT has revolutionized the study of history. This new field is often called "**Digital Humanities.**"
- **A. ICT in Data Collection**
 1. **Digitized Archives & Online Access:** Millions of primary sources (documents, newspapers, photos) are now scanned and available online. A historian in Nigeria can access records from the British National Archives or the US Library of Congress without leaving their desk.
 2. **Digital Oral History:** Using high-quality digital audio recorders and video cameras to conduct and preserve oral tradition interviews. This is clearer, more durable, and easier to share and transcribe than old cassette tapes.
 3. **Archaeology:**
 - **Ground-Penetrating Radar (GPR):** Can "see" underground to find buried structures *before* digging.
 - **Satellite Imagery:** Can identify large-scale ancient settlements or irrigation systems from space.
 - **LiDAR:** Uses lasers to create 3D maps of the ground, revealing structures hidden under forest canopies.
 4. **Databases & "Big Data":** The ability to access and search massive online databases (e.g., slave trade databases) to identify large-scale patterns.
- **B. ICT in Data Storage and Analysis**
 1. **Databases:** Historians can build massive databases to manage and analyze large sets of information (e.g., a database of all slaves taken from a specific port, with their names, ages, and origins).
 2. **Digital Preservation:** Creating high-resolution digital copies (scans, photos) of fragile documents, books, and artifacts to preserve them from decay.
 3. **Text-Mining Software:** Using computer programs to search thousands of digitized newspapers or documents at once for specific keywords or patterns, a task that would take a human a lifetime.

4. **GIS (Geographic Information Systems):** Special software used to create maps that layer historical data (e.g., mapping the spread of the Sokoto Caliphate, or mapping trade routes over time).
 5. **Cloud Storage:** Safely backing up research and making it accessible from anywhere.
- **C. ICT in Data Presentation and Dissemination**
 1. **Academic Websites & Blogs:** Historians can share their research directly with the public, bypassing traditional publishers.
 2. **Digital Museums & Virtual Exhibits:** Creating interactive 3D models of artifacts (like an Ife head) or virtual reality (VR) reconstructions of historical sites (like the Benin palace).
 3. **Multimedia:** Using ICT to create historical documentaries, podcasts, and interactive timelines that are more engaging than a traditional textbook.
 4. **Social Media:** Historians and archives use platforms like Twitter (X) and Instagram to share historical photos and facts with a wide audience.
 5. **Historical Gaming:** Video games (like *Age of Empires* or *Assassin's Creed*) are a (controversial) but very popular way that millions of people consume historical information.
 - **D. Context: Challenges of ICT in Nigeria**
 - While the prospects are bright, there are significant challenges:
 1. **Erratic Power Supply:** A major obstacle to all digital work.
 2. **Cost & Access (Digital Divide):** High cost of equipment and internet data creates a gap between "haves" and "have-nots."
 3. **Digital Literacy:** Need for training for both historians and students.
 4. **Digitization Gap:** A vast amount of Nigeria's own historical records (in our national archives) are not yet digitized and are decaying.
 5. **Data Integrity & Loss:** Digital files can be corrupted, hacked, or become obsolete as technology changes.

2. Evaluation (Week 8)

- **Objective Questions:**

1. ICT stands for: (a) Information and Computer Technology (b) Internet and Computer Tech (c) Information and Communication Technology (d) Internal Computing Tools.
2. Using software to create layered maps of trade routes is an example of: (a) GIS (b) GPR (c) C-14 (d) Text-Mining.
3. Which of these is a major challenge for ICT in Nigerian historical studies? (a) Lack of history (b) Erratic power (c) Too many sources (d) Old documents.
4. The academic field that combines computing and history is often called: (a) Digital Humanities (b) Social Media (c) C-14 (d) GIS.

- **Theory Questions:**

1. Explain two ways ICT has changed how historians *collect* data.
2. Describe two ways ICT can be used to *present* history to the public in a more engaging way.
3. What is the "Digital Divide" and how does it affect historical research in Nigeria?

3. Assignment (Week 8)

- Using a smartphone or computer, go online and find one *primary source* related to Nigerian history (e.g., a digitized old newspaper article, a photo from the 1960s, a copy of a colonial letter).
- **Part 1:** Provide a link to the source or a screenshot.
- **Part 2:** In one paragraph, describe the source you found.
- **Part 3:** In a second paragraph, explain how this single source helps you understand a small piece of Nigeria's past.

WEEK 9: LAND AND PEOPLES OF NIGERIA

Topic: Geographical and Ethnic Diversity

1. Content: Geography and its Impact on History

- **Core Concept:** Geography is the stage upon which history unfolds. The climate, vegetation, and landscape of Nigeria profoundly shaped the societies that developed within it.

- **Environmental Determinism (Outdated View):** The old theory that geography *dictates* human culture (e.g., "hot climates make people lazy"). This is considered racist and wrong.
- **Possibilism (Modern View):** The correct view that geography *offers possibilities* and *sets limitations*. Humans then use their culture and technology to choose from those possibilities (e.g., the forest *limited* the use of horses, but *offered* yams as a food source).
- **A. Location and Significance**
 - **Location:** Nigeria is located in West Africa, on the coast of the Gulf of Guinea. It is bordered by Benin, Niger, Chad, and Cameroon.
 - **Significance:** It is a "crossroads" region.
 1. **North-South Axis:** It connects the arid, camel-based trade of the **Sahara Desert** (Trans-Saharan Trade) to the forest and coastal regions.
 2. **East-West Axis:** It is the eastern end of the "Sudan" savanna belt, which facilitated movement and empire-building across West Africa.
 3. **Coastal Access:** The southern coast opened Nigeria up to maritime trade with Europeans (leading to the trans-Atlantic slave trade and later, the palm oil trade).
- **B. Climate and Vegetation (The Major Zones)**
 - **1. Southern Nigeria: The Forest Zone**
 - **Climate:** Tropical Rainforest climate (high rainfall, high humidity).
 - **Vegetation:** Mangrove Swamp (coast) and dense Rainforest.
 - **Historical Impact:**
 - **Tsetse Fly:** The fly, which thrives in forests, carries sleeping sickness (trypanosomiasis), which is fatal to horses and cattle.
 - **Military:** *Prevented* the use of cavalry, limiting the size of armies and empires (e.g., Benin, Oyo).
 - **Agriculture:** Land was cleared for farming root crops (yams, cassava) and tree crops (kola nuts, palm oil).

- **Settlement:** People lived in forest clearings, leading to more *decentralized* political units (villages, small kingdoms) compared to the north.
- **Defence:** The dense forest was a natural defense against invasion.
- **2. Northern Nigeria: The Savanna Zone**
 - **Climate:** Tropical Savanna climate (distinct wet and dry seasons). Becomes drier as you move north (**Sahel**).
 - **Vegetation:** Open grasslands with scattered trees.
 - **Historical Impact:**
 - **Cavalry:** *No* tsetse fly. This allowed for the use of **horses**, which were the "tanks" of the ancient world. Cavalry was key to building and controlling large-scale, centralized empires (e.g., Kanem-Borno, Sokoto Caliphate).
 - **Agriculture:** Suited for growing grains like millet, sorghum, and rice. Supported large populations.
 - **Livestock:** Open grassland supported cattle-herding (e.g., the Fulani).
 - **Trade & Communication:** Open terrain made travel and communication easy, linking the region to the Trans-Saharan trade.
- **3. The Middle Belt (A "Shatter Zone")**
 - **Location:** The hilly, diverse region between the North and South (e.g., Jos Plateau).
 - **Historical Impact:** This region was a "shatter zone" and "buffer zone." It was home to many smaller, non-Muslim, non-centralized groups (e.g., Tiv, Gwari, Mumuye). They used the hills (like the Jos Plateau) as a natural fortress to resist the cavalry-based empires of the north.
- **C. Major River Systems**
 - **Niger River and Benue River:** These were the "highways" of pre-colonial Nigeria.
 - **Impact:** They facilitated trade, migration, and communication between different groups. The point where they meet, the **Confluence** (at Lokoja), has always been a strategic and cultural melting pot.
- **D. Ethnic and Linguistic Diversity**
 - Nigeria is home to over 250 (some estimates say 400+) distinct ethnic groups. This diversity is a product of centuries of migration and settlement.

- **Three Largest Groups:**

0. **Hausa-Fulani:** Predominantly in the North. This is a *cultural-political* term. The **Hausa** are historically sedentary traders and farmers. The **Fulani** are historically nomadic pastoralists (cattle-herders) who led the 19th-century jihad that founded the Sokoto Caliphate, fusing the two groups politically.
1. **Yoruba:** Predominantly in the Southwest. Historically organized into powerful *centralized* city-states and kingdoms, each led by an *Oba* (e.g., Ife, Oyo, Ijebu, Egba).
2. **Igbo:** Predominantly in the Southeast. Historically, most Igbo communities were politically *decentralized* or "acephalous" (headless), living in autonomous villages governed by councils of elders and title-holders.

- **Other Major Groups (Examples):**

- **Kanuri** (Northeast, Borno Empire)
- **Ijaw** (Niger Delta)
- **Edo** (Benin Kingdom)
- **Tiv & Nupe** (Middle Belt)
- **Ibibio & Efik** (Cross River)

- **Key Point:** These groups were *not* isolated. They had centuries of trade, diplomacy, and inter-marriage before Nigeria was created.

2. Evaluation (Week 9)

- **Objective Questions:**

1. The use of cavalry was a major military advantage for empires in the: (a) Forest Zone (b) Savanna Zone (c) Mangrove Swamp (d) Niger Delta.
2. The tsetse fly, common in the south, prevented the use of: (a) Horses (b) Canoes (c) Iron tools (d) Yams.

3. The two main rivers that meet at Lokoja are the: (a) Niger and Chad (b) Benue and Gongola (c) Niger and Benue (d) Cross and Niger.
4. The modern view that geography offers limitations and possibilities is: (a) Possibilism (b) Determinism (c) Geology (d) Tsetse.

- **Theory Questions:**

1. In two paragraphs, compare and contrast the historical impact of geography on the political development of the Forest Zone and the Savanna Zone.
2. What is the "Middle Belt," and why is it historically significant?

3. Assignment (Week 9)

- Draw a simple map of Nigeria. On your map, you must clearly label:
 1. The three main vegetation zones (Forest, Savanna, Middle Belt/Confluence).
 2. The Niger River and the Benue River.
 3. The general location of the three largest ethnic groups (Hausa-Fulani, Yoruba, Igbo) and one other group (e.g., Kanuri or Edo).

WEEK 10: TRADITIONS OF ORIGIN AND HISTORICAL LINKS

Topic: Myths, Legends, and Oral Accounts of Origin

1. Content: Analyzing Origin Myths

- **Key Concept:** Origin myths are not *literal, factual history*. A historian does not ask "Did Oduduwa really come from heaven?" Instead, a historian asks, "**What is the purpose of this story? What does it tell us about the people who believe it?**"
- Origin myths are historical sources (oral tradition) that explain a people's "truth" about their identity, their right to their land, and their political/social relationships with their neighbors. They are a "social charter."
- **A. The Yoruba (Oduduwa Myth)**

- **The Story (Ife Version):** Olodumare (God) sent his son, **Oduduwa**, from heaven on a chain. Oduduwa landed on the primordial water at **Ile-Ife**. He had a handful of earth, which he sprinkled on the water, and a cockerel, which spread the earth to create the land. Ile-Ife became the first land, and Oduduwa became the first Ooni (King). His sons and grandsons (e.g., Oranmiyan) later traveled out to found the other major Yoruba kingdoms (like Oyo) and even the Benin dynasty.
- **Alternative Story (Migration Version):** Another tradition, popular in Oyo, claims Oduduwa was a migrant prince from "the East" (possibly Mecca or Egypt), who fled and settled in Ife.
- **Historical Interpretation (What it *means*):**
 1. **Political Legitimacy:** It gives all "crowned" Yoruba Obas a divine right to rule, as they are all "descendants" of Oduduwa.
 2. **Cultural Unity:** It establishes a "family" relationship between the different, and often competing, Yoruba kingdoms.
 3. **Spiritual Homeland:** It establishes Ile-Ife as the *orirun* (cradle) and spiritual capital of the entire Yoruba-speaking world.
 4. **Historical Debate:** The "migration" version suggests historical links between the Yoruba and peoples to the East, possibly reflecting the ancient trans-Saharan trade routes.
- **B. The Hausa (Bayajidda Legend)**
 - **The Story:** A prince named **Bayajidda** fled from Baghdad (in modern-day Iraq). He traveled across the desert and came to **Daura**. He found the people were terrorized by a great snake named "Sarki," which lived in the well and only allowed them to fetch water on Fridays. Bayajidda killed the snake, married the Queen of Daura, and had a son named Bawo. Bawo, in turn, had seven sons who founded the "**Hausa Bakwai**" (The Seven True Hausa States: Daura, Kano, Katsina, Zaria, Rano, Gobir, and Biram). Bayajidda's other sons (by a concubine) founded the "**Hausa Banza**" (The Seven "Illegitimate" States, e.g., Nupe, Gwari, Yoruba—groups that were influenced by the Hausa but not "of them").
 - **Historical Interpretation (What it *means*):**

1. **Political & Cultural Link:** It explains the origin of the Hausa states and links them together as "brothers" in a common political and cultural framework.
 2. **External Validation:** By claiming the founder came from Baghdad (the center of the Islamic Caliphate), it links the Hausa states to the prestigious and powerful Islamic world *long before* the 19th-century jihad.
 3. **Explaining Relationships (Social Charter):** It creates a clear hierarchy and framework for understanding the relationship between the "true" Hausa states and their non-Hausa neighbors (the "Banza" states).
 4. **Gender:** It may represent a historical shift from a *matriarchal* society (ruled by the Queen) to a *patriarchal* one (ruled by Bayajidda and his sons).
- **C. The Igbo (Decentralized and Nri Myths)**
 - **The Context:** Unlike the Yoruba and Hausa, most Igbo communities do *not* have a single, grand origin myth. This *itself* is historical evidence reflecting their history of political decentralization.
 - **Common Traditions:**
 1. **Autochthony:** Many Igbo villages simply state, "We have always been here," or that their founding ancestor "sprang from the earth" (*esi n'ala puta*). This is a powerful *political claim* to their land.
 2. **Short-Distance Migration:** Most village traditions point to a founder who came from a nearby village just a few miles away.
 - **The Nri Myth (An Exception):** The Nri kingdom (a spiritual center, not a military one) has a myth. It states that **Eri** was sent from the sky by Chukwu (God) and landed at the confluence of the Niger and Anambra rivers. His sons founded Nri and other related groups.
 - **Historical Interpretation (What it *means*):**
 1. The lack of a single myth confirms the historical pattern of *political fragmentation*. Identity was local.
 2. The "autochthony" myth asserts an unchallengeable, ancient right to their land.

3. The Nri myth explains and legitimizes the special *spiritual* role of Nri priests, who traveled across Igboland to perform rituals.

- **D. Historical Link: Benin and Ife**

- **The Story:** The Benin tradition states that after a period of misrule (the *Ogiso* dynasty), the people of Benin sent to the Ooni of Ife, asking for a prince to rule them. The Ooni sent his son (or grandson), **Oranmiyan**. Oranmiyan came to Benin, but found it difficult to rule. He had a son with a local princess, **Eweka I**, and left him to rule, returning to Ife. Eweka I became the first Oba of the new (and current) Benin dynasty.
- **Historical Interpretation (What it *means*):**
 1. This is a clear statement of a direct *historical and political link* between Benin and Ife.
 2. It shows the new Benin dynasty drew its legitimacy from the prestigious, older, and spiritually potent Ife tradition (descended from Oduduwa).
- **Corroborating Evidence:** This oral tradition is strongly supported by *art history*. The world-famous bronze-casting techniques of Benin and Ife are so similar, especially in the early periods, that art historians believe the skill was likely introduced *from Ife to Benin* around the time this political link was forged.

2. Evaluation (Week 10)

- **Objective Questions:**

1. The heroic founder in the Hausa legend who killed a snake is: (a) Oduduwa (b) Eri (c) Bayajidda (d) Oranmiyan.
2. The Oduduwa myth establishes which city as the "cradle" of the Yoruba? (a) Oyo (b) Ijebu (c) Lagos (d) Ile-Ife.
3. The lack of a single origin myth for most Igbo communities reflects their history of: (a) Political decentralization (b) A single empire (c) Constant warfare (d) Nomadic life.
4. The Benin oral tradition links the origin of its Oba dynasty to: (a) Daura (b) Nri (c) Ife (d) Baghdad.

- **Theory Questions:**

1. Briefly narrate the Benin-Ife origin story. What is the *historical interpretation* of this story, and what other type of evidence supports it?
2. What is the main purpose of an origin myth? Why do historians study them if they are not "literally true"?

3. Assignment (Week 10)

- Create a simple comparison table. | Feature | Oduduwa Myth (Yoruba) | Bayajidda Legend (Hausa) | | :--- | :--- | :--- | | **Heroic Founder** | Oduduwa | Bayajidda | | **Where did they come from?** | Heaven (Ife ver.) or East (Oyo ver.) | Baghdad | | **What did they do?** | Created land at Ife / Migrated | Killed a snake, married a queen | | **What did they establish?** | The Yoruba kingdoms | The Hausa Bakwai & Banza | | **Main historical "meaning"?** | Links all Obas to Ife, divine rule | Links Hausa states, validates with Islam |

WEEK 11: REVISION

Topic: Review of all topics covered in the term

1. Content: Summary of Key Concepts

- **Week 1 (Intro):** History is the *systematic, interpretive study* of the human past, distinct from "The Past." It is vital for nation-building as it creates a shared identity, promotes unity, and provides context. *Historiography* is the study of how history is written.
- **Week 2 (Values):** History gives us *educational* skills (critical thinking), *moral* values (empathy, historical perspective), *political* awareness (citizenship), and *social* understanding (tolerance).
- **Week 3 (Sources I):** Historians use sources.

- **Primary:** Eyewitness, "raw" material (e.g., Oral Tradition, Oral History, Written Documents, Archaeology, Linguistics, Ethnography).
- **Secondary:** Written *after* the event, interpreting primary sources (e.g., textbooks).
- **Tertiary:** Summaries (e.g., encyclopedias).
- **Oral Tradition:** Pros (only source) and Cons (distortion, "telescoping").
- **Archaeology:** Tangible proof (Nok, Igbo-Ukwu, Dufuna Canoe).
- **Week 4 (Sources II):** Chronology is key.
 - **Relative Dating:** In sequence (e.g., Stratigraphy, Genealogy).
 - **Absolute Dating:** A specific date (e.g., Calendars, Radiocarbon C-14 for organic, Thermoluminescence for pottery).
- **Week 6 (Skills):** The *method* of history.
 - **Ancient:** Chronicling, moralizing, praising kings (hagiography).
 - **Modern (Rankean):** "Scientific," based on primary sources, objectivity, and critical analysis (Internal/External Criticism, Corroboration). Avoid *anachronism*.
- **Week 8 (ICT):** "Digital Humanities" revolutionizes history via digital archives (collection), GIS/databases (storage/analysis), and virtual museums/social media (presentation). Challenges include the "Digital Divide" and power.
- **Week 9 (Land & People):** Geography *offers possibilities* (Possibilism).
 - **Savanna (North):** Open land, cavalry, large centralized empires (e.g., Hausa).
 - **Forest (South):** Tsetse fly, no cavalry, decentralized states (e.g., Igbo) or smaller kingdoms (e.g., Yoruba, Benin).
 - **Middle Belt:** A "shatter zone" and buffer.
 - Nigeria has 250+ ethnic groups with long histories of interaction.
- **Week 10 (Origins):** Myths are "social charters," not literal fact.
 - **Oduduwa:** Links all Yoruba Obas to Ife.
 - **Bayajidda:** Links Hausa states and validates them via Islam.
 - **Benin-Ife:** Shows a direct political link, supported by art history.
 - **Igbo:** Lack of one myth *proves* decentralization. "Autochthony" is a land claim.

2. Evaluation (Week 11)

- **Practice Exam:**

1. (MCQ) Which of these is a primary source? (a) A textbook (b) A newspaper from 1960 (c) A documentary from 2005 (d) This lesson note.
2. (MCQ) The "tsetse fly" is a key geographical factor that historically limited the use of cavalry in the: (a) Savanna (b) Sahel (c) Forest (d) Jos Plateau.
3. (MCQ) The oldest known boat in Africa, found in Nigeria, is the: (a) Benin Canoe (b) Nok Canoe (c) Dufuna Canoe (d) Ife Canoe.
4. (Theory) Define "Internal Criticism" and "External Criticism."
5. (Theory) Briefly explain the historical significance (the "meaning," not the story) of the Bayajidda legend.
6. (Theory) List three ways ICT can be used by a historian.
7. (Theory) What is the difference between "Environmental Determinism" and "Possibilism"? Which one do historians use today?

3. Assignment (Week 11)

- Create a "concept map" or "spider diagram" that links all the major topics of the term. Start with "NIGERIAN HISTORY" in the center. Branch out to "Sources," "Geography," "Historical Skills," etc., and add key sub-points for each. This will serve as your personal study guide for the examination.

SS1 NIGERIAN HISTORY LESSON NOTES

SECOND TERM

WEEK 1: EARLY CENTRES OF CIVILIZATION IN NIGERIA

Topic: Nok, Igbo-Ukwu, Ife, and Benin Civilizations

1. Content: Archaeological Findings and Significance

- **Introduction:** This week examines the tangible proof of ancient, sophisticated societies within Nigeria, long before European contact. These "civilizations" are defined by their advanced art, technology, social organization, and (in some cases) trade networks.
- **A. Nok Culture (c. 1500 BC - 500 AD)**
 - **Location:** Found over a vast area of the Middle Belt, particularly the Jos Plateau. First discovered in the village of Nok.
 - **Archaeological Findings:**
 1. **Terracotta Sculptures:** Life-sized and small-scale human and animal figures.
 2. **Style:** Highly distinct style: triangular or semi-circular eyes, perforated pupils, elaborate hairstyles, and beaded ornaments.
 3. **Iron Smelting:** Dozens of iron-smelting furnaces (slag, tuyeres) have been found alongside Nok art.
 - **Significance:**
 1. **Art:** It is the oldest known tradition of sophisticated figural art in Sub-Saharan Africa.
 2. **Technology:** It represents the earliest known evidence of iron smelting in West Africa (and possibly all of Sub-Saharan Africa). This "Iron Age" transition allowed for better tools (farming) and weapons (warfare).
 3. **Society:** The complexity and similarity of the art over a vast area suggest a well-organized, socially stratified society, not just scattered hunter-gatherers.
- **B. Igbo-Ukwu Civilization (c. 9th - 10th Century AD)**
 - **Location:** In the forest region of Southeastern Nigeria, near modern-day Awka (Anambra State).
 - **Archaeological Findings:** Discovered in three sites (Isaiah, Richard, and Jonah Anozie's compounds):
 1. **Elaborate Bronzes:** Incredibly intricate bronze objects (bowls, staff heads, pendants) made using the "lost-wax" (cire-perdue) method.

2. **Grave Goods:** One site was the burial chamber of a high-status individual (a priest-king or *Eze Nri*), buried with a crown, staff, and thousands of trade beads.
 3. **Materials:** The bronzes were made of high-lead copper, a material not found locally.
- **Significance:**
 1. **Technology:** Shows a mastery of bronze casting completely independent of European influence and stylistically unique from Ife or Benin.
 2. **Trade:** The thousands of carnelian and glass beads (identified as coming from as far as India and Egypt) prove that Igbo-Ukwu was part of a vast, long-distance trade network.
 3. **Society:** It reveals a highly wealthy, stratified, and complex society in the Igbo heartland centuries *before* the rise of the great centralized kingdoms, suggesting an alternate path to complexity (based on spiritual/economic power, not military might).
- **C. Ife Civilization (c. 12th - 15th Century AD)**
 - **Location:** Ile-Ife, considered the spiritual "cradle" (*orirun*) of the Yoruba people.
 - **Archaeological Findings:**
 1. **Naturalistic Sculptures:** World-famous sculptures in both terracotta and bronze (brass).
 2. **Style:** Unlike Nok (stylized) or Benin (idealized), Ife art is remarkably *naturalistic* and *realistic*, capturing individual portraits.
 3. **Urbanism:** Evidence of a large city-state, including paved courtyards and roads made of "potsherds" (broken pottery).
 - **Significance:**
 1. **Artistic "Golden Age":** Represents a peak of artistic achievement and technical skill in all of Africa.
 2. **Political "Mother-Culture":** As the center of the Oduduwa myth, Ife's political and spiritual model influenced the founding of many other kingdoms, most notably Benin and Oyo.

3. **Technology:** The bronze casting (lost-wax) skill is believed to have been transferred from Ife to Benin.

- **D. Benin Civilization (c. 12th Century AD - 1897)**

- **Location:** Benin City, capital of the Edo people.
- **Archaeological Findings:**
 1. **Benin Bronzes:** A vast collection of bronze and brass plaques, commemorative heads, and sculptures.
 2. **Royal Art:** Unlike Ife art (naturalistic), Benin art is more stylized, hierarchical, and "idealized." It was a *royal* art form, used to decorate the Oba's palace and record the kingdom's history, politics, and rituals.
 3. **Benin Walls (Iya):** A massive complex of earthworks (walls and moats) surrounding the city, one of the largest man-made structures in the world.
- **Significance:**
 1. **Political Power:** The art and walls are testaments to a highly centralized, wealthy, and powerful military empire, ruled by a divine Oba.
 2. **Historical Record:** The bronze plaques functioned as a kind of historical archive, recording kings, court events, and interactions with Europeans.
 3. **Continuity:** It is a civilization whose oral traditions (like the Ife-Benin link) are directly *corroborated* by archaeological and art-historical evidence.

2. Evaluation (Week 1)

- **Objective Questions:**

1. The earliest known iron-smelting culture in West Africa is: (a) Ife (b) Nok (c) Benin (d) Igbo-Ukwu.
2. Which civilization is famous for its highly *naturalistic* and *realistic* terracotta and bronze heads? (a) Ife (b) Nok (c) Benin (d) Igbo-Ukwu.
3. The discovery of beads from India at Igbo-Ukwu is proof of: (a) Indian invasion (b) Long-distance trade (c) Local manufacturing (d) A non-centralized state.
4. The famous bronze *plaques* that decorated the royal palace are associated with: (a) Ife (b) Nok (c) Benin (d) Igbo-Ukwu.

- **Theory Questions:**

1. What do the findings at Nok tell us about the society that lived there?
2. Compare and contrast the bronze art of Ife with that of Benin, focusing on (a) style and (b) purpose.

3. Assignment (Week 1)

- Write a 300-word essay on the topic: "What do the discoveries at Igbo-Ukwu teach us about the nature of civilization and political power in pre-colonial Nigeria?"

WEEK 2: STATE FORMATION PROCESS I

Topic: Concept of Centralized and Non-Centralized States

1. Content: State Formation and Political Organization

- A. What is a "State"?

- A state is an organized political community living under a single system of government, occupying a defined territory.
- **Key Features:** A state has a *government* that has *sovereignty* (the authority to make laws, collect taxes, raise an army, and manage relations with other states).
- **B. Factors in State Formation (How do states form?)**
 - States don't just appear; they evolve. Key "ingredients" include:
 1. **Population Growth:** More people create a need for more complex organization.
 2. **Agricultural Surplus:** When farmers can grow *more* food than they need, it frees up other people to become specialists (soldiers, priests, kings, artists, blacksmiths).
 3. **Trade:** The need to organize and control long-distance trade routes (like the Trans-Saharan) often leads to the rise of a powerful state (e.g., Kanem-Borno).
 4. **Warfare/Defense:** The need to defend against external enemies or to conquer neighbors encourages people to unite under a strong leader.
 5. **Charismatic Leadership:** A powerful warrior or religious leader can unite different groups.
 6. **Religion/Ideology:** A shared religion or belief system (like the Oduduwa myth) can provide the *ideological "glue"* to hold a state together and *legitimize* its rulers.
- **C. Concept of Centralized States (Kingdoms/Empires)**
 - **Definition:** A state where power and authority are concentrated in the hands of a single ruler (King, Emir, Oba, Mai) or a small, elite group at the center.
 - **Political Organization & Features:**
 1. **Clear Hierarchy:** A pyramid-like structure: King (at the top), followed by nobles/chiefs, then commoners, then slaves.
 2. **Recognized Leader:** A single, recognized head of state (e.g., *Alaafin* of Oyo, *Oba* of Benin, *Sarki* of Kano).
 3. **Taxation:** The central government has the power to collect taxes or tribute from all parts of the state.

4. **Standing Army:** A professional army, loyal to the king, used for defense and conquest (e.g., the Oyo cavalry, the Borno musketeers).
 5. **Bureaucracy:** A system of appointed officials (ministers, governors) who help the king run the government.
 6. **Codified Laws:** A single set of laws, often based on royal decree or religious code (e.g., Sharia), that applies to everyone.
 - **Examples in Nigeria:** Kanem-Borno, Hausa States, Oyo, Benin, Nupe, Jukun.
- **D. Concept of Non-Centralized States (Acephalous/Segmentary)**
 - **Definition:** "Acephalous" means "headless." These are societies that function without a single, central ruler or "head." Power is *diffused* (spread out) among different groups and institutions.
 - **Note:** It is *wrong* to call them "stateless" or "societies without government." They have *government*, but it is organized differently.
 - **Political Organization & Features:**
 1. **Kinship (Family):** The *lineage* or *clan* (extended family) is the most important political, social, and economic unit.
 2. **No Single Ruler:** No king, no standing army, no central tax collection.
 3. **"Checks and Balances":** Power is balanced between multiple institutions.
 4. **Governing Institutions:**
 - **Council of Elders:** (e.g., *Amala* or *Oha-na-Eze* in Igboland) – The main decision-making body.
 - **Age Grades:** Groups of men (and sometimes women) of the same age. They function as the public workforce (building roads), the police (enforcing laws), and the army (defending the village).
 - **Secret Societies:** (e.g., *Ekpe* in Calabar, *Ogboni* in parts of Yorubaland) – Acted as a powerful judiciary and legislature, often with more power than any individual.
 - **Priests/Oracles:** Religious leaders (like the Arochukwu oracle) could act as a "supreme court" to settle disputes.
 - **Examples in Nigeria:** Igbo, Tiv, Idoma, Ibibio, Ijaw.

2. Evaluation (Week 2)

- **Objective Questions:**

1. A society where power is concentrated in the hands of a single king is called: (a) Acephalous (b) Non-centralized (c) Centralized (d) Segmentary.
2. The term "acephalous" literally means: (a) Headless (b) Kingless (c) Governmentless (d) Powerful.
3. Which of these is NOT a key feature of a centralized state? (a) Standing army (b) Taxation (c) Council of elders as the *only* power (d) A single ruler.
4. In non-centralized societies, the most important political unit is typically: (a) The army (b) The King (c) The Kinship/Lineage (d) The Tax collector.

- **Theory Questions:**

1. List and explain three factors that can lead to state formation.
2. What is the function of an "Age Grade" in a non-centralized society?

3. Assignment (Week 2)

- Write two paragraphs. In the first, describe the political structure of a typical *centralized* state. In the second, describe the political structure of a typical *non-centralized* state.

WEEK 3: CENTRALIZED STATES I: KANEM AND BORNU TO 1800

Topic: Kanem-Bornu Empire

1. Content: Political Organization, Trade, and Religion

- A. Location and Origin:

- Located in the Lake Chad Basin. One of the longest-lasting empires in history (c. 8th Century - 1893).
- **Kanem (Phase 1):** The state was founded east of Lake Chad by the Sefawa dynasty, a nomadic group.
- **Bornu (Phase 2):** In the 14th century, the Sefawa were forced to move west of Lake Chad, establishing their new capital, *Ngazargamu*, in Bornu. The empire reached its peak here.
- **B. Political Organization:**
 - **The Mai (King):** The *Mai* was a divine king, at the top of the political structure. He held absolute power in theory.
 - **Council of Twelve:** The *Mai* was advised by a council of 12 great nobles (often from his own family), who helped administer the provinces.
 - **The Magira (Queen Mother):** The mother of the *Mai* held immense political power and influence. She had her own palace, officials, and territory.
 - **The Magara (King's Sister):** The *Mai's* official "first sister" also held significant power. (This highlights the important political role of royal women).
 - **Provincial Administration:** The empire was divided into provinces, ruled by governors appointed by the *Mai*.
 - **Military:** The military was the key to the state's survival and expansion. It was built on a powerful cavalry (horse-riding warriors) and, later, firearms.
- **C. The Role of Trade (The Economy):**
 - **Trans-Saharan Trade:** Kanem-Bornu's location made it a *critical crossroads* for the Trans-Saharan trade.
 - **Exports (South to North):** The empire exported slaves, ivory, ostrich feathers, and kola nuts.
 - **Imports (North to South):** The empire imported *horses* (vital for the cavalry), salt (vital for life), textiles, and later, *muskets* (firearms) from the Ottoman Empire (North Africa).
 - **Control of Trade:** The *Mai* grew wealthy by controlling and taxing this trade. This wealth paid for the army and the bureaucracy.
- **D. The Role of Religion (Islam):**

- **Adoption:** The Sefawa dynasty adopted Islam around the 11th century (*Mai Humai*).
- **Significance:**
 1. **Administration:** Islam provided a system of law (*Sharia*) and literacy (Arabic), which made the government more efficient.
 2. **Diplomacy:** It connected Kanem-Bornu to the wider Islamic world (North Africa, Middle East), allowing for diplomatic and trade alliances.
 3. **Education:** Rulers like *Mai Idris Alooma* built mosques and sponsored Islamic scholarship.
- **E. *Mai Idris Alooma* (c. 1571 - 1603) - The "Golden Age":**
 - He is the most famous of all the *Mais*.
 - **Military Reformer:** He imported muskets and Turkish military instructors from the Ottoman Empire, creating the first army in West Africa to use firearms effectively.
 - **Administrator:** He built mosques, replaced traditional law with *Sharia* law, and built a new capital at Ngazargamu.
 - **Diplomat:** He established embassies in Tripoli and with the Ottoman Sultan.

2. Evaluation (Week 3)

- **Objective Questions:**
 1. The title of the ruler of Kanem-Bornu was: (a) *Sarki* (b) *Oba* (c) *Alaafin* (d) *Mai*.
 2. The powerful Queen Mother of Bornu was known as the: (a) *Magira* (b) *Magara* (c) *Mai* (d) *Eze Nri*.
 3. The wealth of Kanem-Bornu was primarily based on: (a) Palm oil (b) Trans-Saharan trade (c) Gold (d) Tin.
 4. The famous 16th-century ruler who introduced muskets to Bornu was: (a) Queen Amina (b) *Mai Humai* (c) *Mai Idris Alooma* (d) Uthman dan Fodio.
- **Theory Questions:**
 1. Explain the political importance of *two* of the following: *Mai*, *Magira*, Council of Twelve.
 2. Discuss the role of Islam in the administration and diplomacy of Kanem-Borno.

3. Assignment (Week 3)

- In a 250-word essay, explain how Kanem-Bornu's *geographical location* was the most important factor in its economic and military success.

WEEK 4: CENTRALIZED STATES II: HAUSA STATES TO 1800

Topic: Hausa City-States

1. Content: City-States, Economy, and Leadership

- **A. Origin and Location:**

- Located in the savanna of Northern Nigeria (recap Bayajidda legend from Term 1).
- **Hausa Bakwai:** The "Seven True Hausa States" (Daura, Kano, Katsina, Zaria, Rano, Gobir, Biram).
- **Hausa Banza:** The "Seven Illegitimate States" (Nupe, Gwari, Yoruba, etc.) – places that were influenced by Hausa culture but not "original."
- **B. Political Organization: The City-State Model**
 - **City-State (*Birni*):** Unlike Kanem-Borno (a single empire), the Hausa states were independent, rival *city-states*. Each state consisted of a large, walled city (*birni*) and the farmlands surrounding it.
 - **Lack of Unity:** They were unified by language and culture, but *politically* they were rivals. They constantly fought each other for control of trade routes. This lack of unity made them vulnerable to outside empires like Kanem-Borno and, later, the Sokoto Caliphate.
 - **Leadership (The *Sarki*):**
 - Each state was ruled by a King, the *Sarki*.
 - The *Sarki* was *not* divine like the *Mai* or *Oba*. He was a political and military leader.
 - **Administration:** The *Sarki* was assisted by a complex bureaucracy of officials:
 - *Sarkin Kasa* (Chief of the Land)
 - *Madawaki* (Commander of the Cavalry)
 - *Galadima* (Head of Administration)
 - *Sarkin Fada* (Head of Palace Officials)
- **C. Economy: A System of Specialization**
 - The Hausa states were the industrial and commercial *center* of West Africa.
 - **Specialization:** Each city-state specialized in a different economic activity:
 - **Kano:** Became the most powerful. Famous for *industry* (textiles, leather goods, dyeing) and was the primary *market* (Trans-Saharan trade).
 - **Katsina:** A major *trade* center (competing with Kano) and also a famous *intellectual* center, with many Islamic scholars.

- **Zaria (Zazzau):** Located further south. Specialized in *agriculture* (grain) and capturing *slaves* from the Middle Belt.
- **Gobir:** The northernmost state, focused on *military* defense against desert nomads.
- **D. Religion (Islam and Bori)**
 - Islam was introduced via the Trans-Saharan trade (c. 14th Century).
 - It became the religion of the *Sarkis* and the urban merchant class. It brought literacy (Arabic) and law (Sharia).
 - **Syncretism:** However, among the common people, Islam was *mixed* with traditional Hausa beliefs, a spirit-possession religion called **Bori**.
 - **Tension:** By 1800, this "impure" mixing of Islam and traditional beliefs created tension, which was a key cause of the 1804 Fulani Jihad.
- **E. Queen Amina of Zazzau (c. 16th Century)**
 - A famous warrior-queen from Zaria (Zazzau).
 - She is remembered in oral tradition as a brilliant military commander who expanded Zaria's power, built many walled camps (known as *Ganuwar Amina* or "Amina's Walls"), and controlled trade routes as far as Nupe and Kano.
 - She is a powerful example of female leadership in pre-colonial Nigeria.

2. Evaluation (Week 4)

- **Objective Questions:**
 1. The seven "true" Hausa states are known as the: (a) Hausa Banza (b) Hausa Bakwai (c) Hausa Birni (d) Hausa Sarki.
 2. The walled city of Kano was most famous for: (a) Horses (b) War (c) Textiles and Trade (d) Fishing.
 3. The traditional Hausa spirit-possession religion that co-existed with Islam is: (a) Bori (b) Sharia (c) Ekpe (d) Ogboni.
 4. The famous 16th-century warrior-queen of Zazzau was: (a) Magira (b) Magara (c) Amina (d) Eweka.
- **Theory Questions:**

1. What is a "city-state"? Explain why the Hausa states are a good example of this model.
2. Why were the Hausa states, despite their economic power, politically weak before 1800?

3. Assignment (Week 4)

- Imagine you are a traveler in 1750. Write a 250-word letter home describing the *economic specialization* you see. Describe what you would buy in Kano, what you would see in Katsina, and what Zaria is known for.

OYO EMPIRE: CHECKS AND BALANCES SYSTEM

Mutual Scrutiny & Power Distribution

A Unique Political Structure Preventing Tyranny

Topic: Nupe, Jukun, Ife, Oyo, Benin, and Efik

A. Nupe Kingdom

- **Location:** Middle Belt, on the Niger River (Confluence area).
- **Leadership:** Ruled by the *Etsu Nupe* (King).
- **Significance:** A "bridge" state between North and South. Famous for its powerful cavalry (like the North) but also its river-based trade. Known for bronze and glass making. Was a major rival of the Oyo Empire.
- **B. Jukun Kingdom (Kwararafa)**
 - **Location:** Middle Belt (Benue River Valley).
 - **Leadership:** Ruled by a divine king, the *Aku Uka*.
 - **Significance:** Kwararafa was a powerful, *confederacy* (loose empire) feared for its military. Its cavalry famously raided the Hausa states (including Kano) in the 17th century. Its king was seen as a major spiritual power.
- **C. Ife Kingdom**
 - **Recap (Week 1):** *Ooni* (King). Not a large military empire, but the undisputed *spiritual* and *cultural* "cradle" of the Yoruba people. Its political importance comes from its *legitimizing* power (e.g., the Benin and Oyo dynasties traced their right-to-rule to Ife).
- **D. Oyo Empire**
 - **Leadership:** Ruled by the *Alaafin* (King).
 - **Political Organization (A System of "Checks and Balances"):**
 1. **The *Alaafin*:** The King, in theory, was absolute.
 2. **The *Oyo Mesi*:** A council of 7 great chiefs, led by the *Bashorun* (Prime Minister). They were the kingmakers and had the power to *depose* (remove) the Alaafin by sending him a "calabash of parrot's eggs" (a death sentence).
 3. **The *Ogboni*:** A powerful, secret society of elders, priests, and nobles that acted as a *check* on the power of the *Oyo Mesi*, preventing them from becoming too powerful.
 - **Military:** The *Are-Ona-Kakanfo* (Generalissimo). Oyo's power came from its *cavalry*, which allowed it to dominate the savanna portion of its empire.
 - **Economy:** Grew rich by controlling trade routes from the interior to the coast (port of Ajase/Porto Novo), especially in slaves.

- **E. Benin Empire**

- **Recap (Week 1):** Ruled by the *Oba* (divine king).
- **Political Organization:** Highly centralized and bureaucratic.
- **Three Groups of Chiefs:**
 1. **The *Uzama N'ihiron*:** The seven hereditary "kingmakers" (the oldest nobility).
 2. **Palace Chiefs:** (e.g., *Iwebo*, *Ibiwe*) – Appointed by the Oba, loyal to him, and lived in the palace.
 3. **Town Chiefs:** (e.g., *Iyase* - Prime Minister) – Appointed by the Oba, represented the people.
- **The Oba's Power:** The Oba skillfully balanced the Palace and Town chiefs against each other to maintain his supreme power.
- **Economy:** Royal guilds (craftsmen) and trade (pepper, ivory, slaves) at the port of Ughoton.

- **F. Efik States (Old Calabar)**

- **Location:** Cross River estuary (Southeastern coast).
- **Political Organization:** Not a single kingdom. A collection of rival *city-states* (e.g., Duke Town, Creek Town).
- **The *Ekpe* (Leopard) Society:** This was the *true government*. It was a graded, secret society that *all* free men of wealth had to join.
- **Functions of *Ekpe*:**
 1. **Legislative:** It made the laws.
 2. **Judicial:** It settled disputes and punished criminals.
 3. **Economic:** It regulated trade, collected debts, and enforced contracts.
- **Economy:** Grew extremely wealthy by dominating the trans-Atlantic slave trade in the Bight of Biafra, later switching to palm oil.

2. Evaluation (Week 6)

- **Objective Questions:**

1. The council that could depose the *Alaafin* of Oyo was the: (a) *Ogboni* (b) *Uzama* (c) *Oyo Mesi* (d) *Ekpe*.

2. The true government of the Efik city-states, which made laws and enforced contracts, was the: (a) *Oba* (b) *Oha-na-Eze* (c) *Ekpe* Society (d) *Aku Uka*.
3. The *Bashorun* was the "Prime Minister" of: (a) Benin (b) Oyo (c) Nupe (d) Jukun.
4. The *Uzama* were the hereditary kingmakers in: (a) Benin (b) Oyo (c) Ife (d) Calabar.

- **Theory Questions:**

1. Briefly describe the "checks and balances" system in the Oyo Empire.
2. How was the Efik political system different from that of Benin or Oyo?

3. Assignment (Week 6)

- Choose two of the following states: Oyo, Benin, or Efik. Write two paragraphs comparing and contrasting their systems of government.

WEEK 8: NON-CENTRALIZED STATES I

Topic: Social and Political Organization of Tiv, Idoma, Igbo, Ibibio, and Ijaw

- **A. Introduction (Recap Week 2):**

- These societies are "acephalous" (headless). Power is *diffused*, not concentrated.
- They are *not* anarchies. Government is maintained through a balance of social and political institutions, with kinship (family) as the central organizing principle.

- **B. The Igbo**

- **Location:** Southeastern forest region.
- **Political Unit:** The *village* or *village-group* was the highest level of political organization.
- **Political Institutions (How power was balanced):**
 1. **Council of Elders (*Oha-na-Eze* or *Amala*):** A general assembly of all adult men (or just family heads) where decisions were made by *consensus* (general agreement), not by a king's decree.
 2. **Title-Holders (*Ozo*):** Wealthy, respected men who had taken titles. They formed an influential "inner council."
 3. **Age Grades:** Groups of men of the same age. They functioned as the village *militia* (defense), *police* (enforcing laws), and *public workforce* (clearing paths).
 4. **Priests:** Custodians of the village deity/shrine.
 5. **Umuada:** The "daughters of the lineage" (married women) formed a powerful social and political group that could settle disputes and protect women's rights.
- **Exceptions:** Some Igbo towns on the Niger River (like Onitsha and Aboh) *did* have kings (*Obi*), a practice borrowed from their Benin neighbors.

- **C. The Tiv**

- **Location:** Middle Belt (Benue Valley).
- **Political Unit:** Based purely on *genealogy* (family tree).
- **Political Organization:** All Tiv trace their ancestry to a single founder, "Tiv." Society is segmented into lineages.
- **Leadership:** No chiefs. Decisions were made by councils of elders (*Jir*) at the family or village level. There was no single Tiv leader until the British created the office of the *Tor Tiv* in the colonial period.

- **D. The Idoma**

- **Location:** Middle Belt (West of the Tiv).
- **Political Organization:** Similar to the Igbo. Lived in autonomous villages.

- **Leadership:** Each village had a head (*Oche*), but his power was balanced by a council of elders. The paramount leader, the *Och'Idoma*, is a modern (colonial) creation to have a single "spokesman."
- **E. The Ibibio**
 - **Location:** Cross River region (Southeastern coast).
 - **Political Organization:** Very similar to the Igbo (village-groups, councils of elders).
 - **Key Institution:** The *Ekpo Society* (a "ghost" society, *not* the same as Efik *Ekpe*). This secret society of elders had immense political, judicial, and religious power, and enforced its laws through members wearing masks representing ancestors.
- **F. The Ijaw**
 - **Location:** The creeks of the Niger Delta.
 - **Political Organization (The "House System"):**
 - **Geography:** The delta environment (swamps, small islands) was not suitable for large states.
 - **The "House" (*Wari*):** The primary political and economic unit was the "Canoe House."
 - **What it was:** A "House" was *not* just a family. It was a *trading corporation*, built around a single, powerful trader (the *Amanyabo* or House Head) and his "canoe boys" (who were often slaves or servants).
 -
 - **Function:** These Houses competed fiercely for control of the rivers and trade (first slaves, then palm oil) with the Europeans at the coast. The most successful Houses (like Bonny, Opobo, Nembe) became powerful, fortified city-states.

2. Evaluation (Week 8)

- **Objective Questions:**
 1. The non-centralized society organized *primarily* by genealogy (lineage) is the: (a) Igbo (b) Tiv (c) Ijaw (d) Ibibio.

2. In many Igbo villages, the group that functioned as the police and public workforce was the: (a) *Ozo* (b) *Umuada* (c) *Oha-na-Eze* (d) *Age Grade*.
 3. The "Canoe House" system was the unique political organization of the: (a) Igbo (b) Tiv (c) Ijaw (d) Idoma.
 4. The powerful *Ekpo* secret society was the main governing institution for the: (a) Ibibio (b) Oyo (c) Hausa (d) Tiv.
- **Theory Questions:**
 1. What does "decision by consensus" mean, and how did it work in an Igbo council of elders?
 2. Explain what a "Canoe House" was and why this system developed in the Niger Delta.

3. Assignment (Week 8)

- Imagine you are an *Age Grade* in an Igbo village. Write a one-page "job description" outlining your duties in (a) law enforcement, (b) public works, and (c) defense.

WEEK 9: NON-CENTRALIZED STATES II

Topic: Aspects of their History and Inter-group Interactions

Revision: Centralized vs. Non-Centralized States

Centralized States		Non-Centralized States	
Leadership		Military	
	King/Queen, Emperor; Clear Command & control		Elders, Councils Diffused authority Consensus
	Standing armies Fortifications Waged war		Militia Raids/Defense No formal army
Economy		Economy	
	Taxes, Tribute, Controlled trade routes Craft specialization		Subsistence farming Local markets Barter
Examples			
	Songhai Empire, Oyo Kingdom Kanem-Bornu		Igbo (Nigeria), Tiv (Nigeria) Tiv (Nigeria) San (Botswana)

A Quick-Glance Study Aid for Understanding Political Structures.

- **A. Common Features (Revisited)**

- **Judicial Systems:**

- Disputes were settled by elders through *mediation* and *arbitration* (finding a compromise), not by a king's absolute decree.

- **Oaths and Ordeals:** To find a "guilty" party, people were often made to swear an oath on a powerful shrine (*mbiam*). It was believed the *juju* (spirit) would kill the person who lied.
 - **Religious Sanctions:** Priests and elders could enforce laws by threatening *ostracism* (banning someone from the community) or by placing a religious curse.
 - **Defense:** No standing army. All able-bodied men (usually in an age grade) were the militia, mobilized only during a threat.
- **B. The Role of Oracles (Inter-group Interaction)**
 - In a land with no "Supreme Court," powerful religious oracles evolved to fill that role.
 - **The Arochukwu Oracle (*Ibini Ukpabi*):**
 - **Location:** In Arochukwu (an Igbo/Cross River town).
 - **Function:** This oracle became the most famous and feared "court of appeal" in Southeastern Nigeria. People from all over Igboland, Ibibioland, and beyond would travel to it to settle difficult disputes.
 - **The "Secret":** The oracle was controlled by the *Aro* people. They used their position as priests to build a vast *commercial* network across the region.
 - **The Aro Confederacy:**
 - This was *not* a traditional empire. It was a *confederacy* (alliance) of Aro trading posts, all linked by their control of the *Ibini Ukpabi* oracle.
 - **Economic Power:** The Aro used the oracle to their advantage. They would often declare one party in a dispute "guilty," and the "fine" would be to sell them (or their relatives) as slaves.
 - **Role in Slave Trade:** The Aro Confederacy became the *primary* inland network for capturing and transporting slaves to the coastal Ijaw and Efik city-states, who then sold them to Europeans. They were the most powerful *middlemen* in the region.
- **C. Other Inter-group Interactions**
 - **Warfare:** While common, it was often localized and had "rules." It was fought over land, resources, or personal insults.

- **Trade:** Constant, local trade was the norm. Specialized markets (e.g., the 4-day Igbo market week: *Eke, Ori, Afor, Nkwo*) were the primary point of contact between villages.
- **Marriage:** Inter-marriage between villages was very common and was the main way of building alliances and ensuring peace.

2. Evaluation (Week 9)

- **Objective Questions:**

1. The famous oracle in Southeastern Nigeria that acted as a "supreme court" was the: (a) *Ozo* (b) *Ekpo* (c) *Ibini Ukpabi* (d) *Etsu Nupe*.
2. The *Ibini Ukpabi* was controlled by the: (a) Ijaw (b) Tiv (c) Aro (d) Idoma.
3. The Aro Confederacy was primarily a: (a) Military empire (b) Spiritual and Commercial network (c) Fishing village (d) Nomadic group.
4. In non-centralized states, "oaths" and "ordeals" were part of the: (a) Judicial system (b) Economic system (c) Military system (d) Age Grade.

- **Theory Questions:**

1. What was the "Aro Confederacy"?
2. Explain the economic and judicial role of the *Ibini Ukpabi* oracle in Southeastern Nigeria.

3. Assignment (Week 9)

- Write a 300-word essay: "The Aro Confederacy was the most powerful *non-centralized* state in Nigerian history." Do you agree or disagree? Explain your reasoning.

WEEK 10: INTER-GROUP RELATIONS I

Topic: Economic and Cultural Exchanges

- **A. Introduction: The Myth of Isolation**

- It is a *myth* that pre-colonial Nigerian groups lived in isolation. The entire region was connected by a complex web of economic, cultural, and political relationships.

- **B. Economic Inter-group Relations (The Engine of Interaction)**

- **Trade:** This was the most important form of interaction, driven by *geographical specialization* (recap Week 9, Term 1).
- **Major Trade Routes:**
 1. **North-South Trade:**
 - *From the North (Savanna):* Salt (vital), horses, livestock (cattle), natron, leather goods, textiles.
 - *To the North (From the Forest):* **Kola nuts** (a mild stimulant, essential for Hausa society), palm oil, yams, ivory, and (from the 1600s) slaves.
 2. **Riverine Trade:** The Niger and Benue rivers were the "highways" for trade.
 - The Ijaw brought fish and salt from the delta *upriver*.
 - The Igbo and Nupe brought yams and textiles *downriver*.
 3. **Coastal Trade:** (From the 1500s) Efik, Ijaw, and Itsekiri traders acted as *middlemen* between inland producers (like the Aro) and European ships, exchanging slaves and palm oil for guns, gin, and textiles.
- **Marketplaces:** Famous "melting pot" markets (like Onitsha, on the Niger) were places where Igbo, Ijaw, Igala, and Benin traders met peacefully.
- **Currencies:** Trade was conducted using various currencies, including cowrie shells, manillas (metal bracelets), salt, and iron bars.

- **C. Cultural Inter-group Relations**

- **Religion:**
 - Islam spread from Kanem-Borno and Hausaland *south* along trade routes, influencing Nupe and parts of Yorubaland.
 - The *Ibini Ukpabi* oracle (Igbo) was *used* by Ibibio, Ijaw, and Efik peoples.
 - Oracles and deities were often "borrowed" from one group to another.
- **Language:**
 - The spread of *loanwords* (e.g., Hausa words in Yoruba, Portuguese words in Efik and Benin) is direct proof of interaction.

- Hausa became a *lingua franca* (common language of trade) across much of the savanna.
- **Art:**
 - The most famous example is the *Ife-Benin connection*. The skill of bronze casting was transferred from Ife to Benin.
- **Settlement:**
 - Many towns and villages (like Onitsha) have oral traditions of being *founded* by migrants from another group (e.g., Onitsha founded by migrants from Benin).
- **D. Political and Diplomatic Relations**
 - **Warfare:** Wars were common (over territory, trade routes, or slaves), *but* they also created new relationships (e.g., refugees fleeing a war would found a new town).
 - **Diplomacy:** Centralized states exchanged ambassadors constantly. The *Alaafin* of Oyo and the *Oba* of Benin had a famous, long-standing (if rivalrous) diplomatic relationship.
 - **Alliances:** States would form military and trade alliances (e.g., the Aro Confederacy was an alliance).

2. Evaluation (Week 10)

- **Objective Questions:**
 1. The *most* important item of trade from the forest (South) to the savanna (North) was: (a) Gold (b) Slaves (c) Kola nuts (d) Horses.
 2. A language used as a "common language" for trade is called a: (a) Loanword (b) Lingua franca (c) Dialect (d) Mother tongue.
 3. A currency made of metal bracelets, used heavily in the Niger Delta, was the: (a) Cowrie (b) Manilla (c) Sharia (d) Dollar.
 4. The oral traditions of Onitsha link its founding to migrants from: (a) Ife (b) Aro (c) Benin (d) Zaria.
- **Theory Questions:**

1. Using one example from trade and one from art, prove that pre-colonial Nigerian groups were *not* isolated.
2. What is a "middleman" in trade? Give one example from pre-colonial Nigeria.

3. Assignment (Week 10)

- Write an essay entitled: "**Pre-colonial Nigerian groups were more united by trade than they were divided by war.**" Use specific examples from your lessons (e.g., North-South trade, Aro Confederacy, River Niger trade) to argue for or against this statement.

WEEK 11: REVISION

Topic: Review of Major Civilizations and Inter-group Relations

1. Content: Summary of Key Concepts

- **Week 1 (Civilizations):** Proof of ancient complexity.
 - **Nok:** Earliest iron-smelting, terracotta art.
 - **Igbo-Ukwu:** 9th-C. bronzes, proved long-distance trade, non-centralized wealth.
 - **Ife:** Naturalistic art, spiritual "cradle" of Yoruba.
 - **Benin:** Royal art (plaques), massive walls, centralized *Oba*.
- **Week 2 (State Types):**
 - **Centralized:** One ruler, hierarchy, taxes, standing army (Oyo, Benin, Kano).
 - **Non-Centralized:** "Acephalous," power diffused, kin-based, decisions by consensus (Igbo, Tiv).
- **Weeks 3-6 (Centralized States):**
 - **Kanem-Borno:** *Mai* (divine king), *Magira* (Queen Mother), cavalry, Trans-Saharan trade (horses/salt/slaves), *Mai* Idris Alooma (muskets).
 - **Hausa States:** *Sarki* (king), rival *city-states* (Kano, Katsina, Zaria), specialized trade (textiles, slaves), Queen Amina.
 - **Oyo:** *Alaafin*, "checks & balances" (*Oyo Mesi* vs. *Ogboni*), cavalry.
 - **Benin:** *Oba*, 3 chief groups, art as state history.
 - **Efik:** *Ekpe* Society was the *real* government, controlled coastal trade.
- **Weeks 8-9 (Non-Centralized States):**
 - **Igbo:** Village-groups, *Oha-na-Eze* (council), *Age Grades*, *Umuada*.
 - **Ijaw:** Niger Delta, "Canoe House" system (trading corporations).
 - **Tiv:** Based on *genealogy* (*Jir* = council).
 - **Aro Confederacy:** A *commercial/religious network* (not a state) based on the *Ibini Ukpabi* oracle, dominated the slave trade.
- **Week 10 (Inter-group Relations):** Nigeria was a *web of connections*.
 - **Economic:** North-South (Kola vs. Horses), Rivers, Coastal.

- **Cultural:** Art (Ife-Benin), Language (loanwords, Hausa lingua franca), Religion (Islam, Oracles).

2. Evaluation (Week 11)

- **Practice Exam:**

1. (MCQ) Which of these was a "check" on the *Alaafin's* power? (a) *Oba* (b) *Oyo Mesi* (c) *Sarki* (d) *Mai*.
2. (MCQ) The *Ibini Ukpabi* oracle was used by the Aro to create what kind of network? (a) Military (b) Fishing (c) Commercial (d) Industrial.
3. (MCQ) The "Canoe House" was the political system of the: (a) Hausa (b) Ijaw (c) Tiv (d) Kanuri.
4. (MCQ) The main source of military power for the Oyo Empire was its: (a) Navy (b) Muskets (c) Cavalry (d) Bronze weapons.
5. (Theory) Define "centralized state" and "non-centralized state," giving one example of each.
6. (Theory) Explain the "checks and balances" system in the Old Oyo Empire.
7. (Theory) Describe the economic relationship (trade) between the forest zone and the savanna zone.

3. Assignment (Week 11)

- Create a "concept map" or "spider diagram" for the entire term.
 - **Center:** "Nigerian States"
 - **Main Branches:** "Centralized" and "Non-Centralized."
 - **Sub-Branches (Centralized):** Kanem-Borno, Hausa, Oyo, Benin, Efik. (Add 1-2 key features for each).
 - **Sub-Branches (Non-Centralized):** Igbo, Ijaw, Tiv. (Add 1-2 key features for each).
 - **Connecting Lines:** Draw lines *between* the branches and label them (e.g., a line from "Hausa" to "Oyo" labeled "Trade: Horses for Kola").

SS1 NIGERIAN HISTORY LESSON NOTES

THIRD TERM:

WEEK 1: INTER-GROUP RELATIONS II

Topic: The Impact of Migrations, Wars, and Politics

1. Content: Non-Economic Inter-group Relations

- **Introduction:** In Term 2 (Week 10), we established that pre-colonial Nigerian groups were deeply connected by *economic* (trade) and *cultural* links. This week, we examine the other powerful forces that shaped their relationships: politics, migration, and warfare.
- **A. Political and Diplomatic Relations**
 - **Diplomacy:** Centralized states did not live in a vacuum. They practiced sophisticated diplomacy:

1. **Embassies:** Kings sent ambassadors (*Ilaris* in Oyo) to other courts to negotiate treaties, deliver messages, and spy. The *Alaafin* of Oyo and the *Oba* of Benin had famous, long-standing (if rivalrous) diplomatic relations.
 2. **Royal Marriages:** A very common way to build political alliances. A king would marry his daughter to the ruler of another state to create a "family bond" and ensure peace (e.g., this was common among the Hausa *Sarkis* and between Oyo and other Yoruba kingdoms).
 - **Alliances:** States would form political and military alliances to fight a common enemy. For example, two Hausa city-states might temporarily ally to fight a third that was dominating a trade route.
- **B. The Impact of Migrations**
 - **Definition:** A large-scale movement of people from one area to another.
 - **"Push" and "Pull" Factors:**
 - **Push Factors (Why they left):** War, natural disasters (drought, famine), overpopulation, political disputes (e.g., a prince loses a power struggle and leaves with his followers).
 - **Pull Factors (Why they came):** Better farmland, new trade opportunities, safety in a new location (e.g., a hilltop).
 - **Consequences of Migration:**
 0. **Founding of New States:** Many oral traditions are migration stories (e.g., the Bayajidda legend, the Oduduwa-from-the-East legend). The founding of Onitsha by migrants from Benin is a classic example.
 1. **Cultural Mixing:** When migrants settle in a new area, they mix with the "host" population. This leads to the blending of languages, religions, and technologies.
 2. **Conflict:** Migration can also *cause* conflict, as newcomers compete with original inhabitants for land and resources (e.g., the long-term migration of Fulani pastoralists into Hausa lands, a key factor in the 1804 Jihad).
 - **C. The Impact of Warfare**

- **War as an "Engine of Change":** War was not just random violence; it was a major force that reshaped societies.
- **Common Causes:**
 0. **Economic:** To control trade routes (e.g., Oyo vs. Nupe), to raid for slaves (especially after 1600), or to control resources (farmland, salt).
 1. **Political:** To expand an empire and force neighbors to pay tribute (e.g., Benin's expansion), or to resist an empire (e.g., the Tiv resisting Jukun).
- **Consequences of Warfare:**
 0. **State Formation:** The *threat* of war often *caused* states to form, as scattered villages united under a single military leader for defense.
 1. **Rise of Military Elites:** Successful generals (like the *Are-Ona-Kakanfo* in Oyo) became extremely powerful, sometimes even challenging the king.
 2. **Destruction and Displacement:** Wars led to the destruction of towns and the creation of large numbers of refugees.
 3. **Founding of Refugee Towns:** Many modern cities were founded as refugee settlements. The most famous example is **Abeokuta**, which was founded in the 1830s by Egba refugees fleeing the wars that followed the collapse of the Oyo Empire.

2. Evaluation (Week 1)

- **Objective Questions:**

1. A common way to build a political alliance between two kingdoms was through: (a) Age Grades (b) Royal Marriage (c) The Aro Oracle (d) Iron Smelting.
2. Which of these is a "Push Factor" for migration? (a) Good farmland (b) War and Famine (c) Trade opportunities (d) Gold.
3. The city of Abeokuta was famously founded by: (a) Portuguese traders (b) Egba refugees (c) Hausa merchants (d) Jukun warriors.
4. The *Are-Ona-Kakanfo* was the famous military commander of: (a) Benin (b) Oyo (c) Kano (d) Kanem-Bornu.

- **Theory Questions:**

1. Explain two ways (one positive, one negative) that *migration* could impact inter-group relations.
2. Give one example of a war fought for *economic* reasons and one fought for *political* reasons.

3. Assignment (Week 1)

- Write a 300-word essay on the topic: "War caused more harm than good in pre-colonial Nigeria." Do you agree or disagree? Use at least two specific examples from your lessons to support your argument.

WEEK 2: INDIGENOUS TECHNOLOGY AND INDUSTRIES

Topic: Iron, Weaving, Pottery, Carving, and Blacksmithing

1. Content: Pre-colonial Technology

- **Introduction:** "Technology" is how a society uses its knowledge of tools and crafts to control and adapt to its environment. Pre-colonial Nigeria had highly advanced and specialized industries.
- **A. Iron Smelting and Blacksmithing**
 - **Significance:** This was the *most important* technology. It was the foundation of all other activities (farming, war, hunting).
 - **Recap:** The Nok culture (c. 1500 BC) provides the earliest evidence.

- **The Blacksmith (*Ogun*):**
 - The blacksmith was one of the most respected and often *feared* members of society.
 - They were seen as magical figures who could control the "dangerous" elements of fire and earth.
 - In Yorubaland, they had their own deity, *Ogun*, the god of iron and war.
- **Products:**
 - **Agriculture:** Hoes, machetes (cutlasses) – allowed for clearing the forest and growing more food.
 - **Warfare:** Spears, arrowheads, swords.
 - **Household:** Knives, needles.
 - **Currency:** Iron bars were a form of money in some areas.
- **B. Weaving (Textile Industry)**
 - **Materials:**
 - **Cotton:** Grown widely in the savanna (Hausaland, Yorubaland).
 - **Raffia:** From the raffia palm tree, used in the forest and delta regions.
 - **Centers of Excellence:**
 - **Kano:** Famous for its cloth, dyed with deep blue *indigo* in dye pits. Kano cloth was a major *export* on the Trans-Saharan trade.
 - **Yorubaland (*Aso-Oke*):** Woven on a horizontal loom (by men) into rich, heavy cloth for ceremonial wear.
 - **Akwete (Igbo):** Woven on a vertical loom (by women) into intricate patterns.
 - **Significance:** Clothing was a major sign of wealth and status.
- **C. Pottery**
 - **Significance:** Essential for storage and cooking. In most societies, this was an industry run by *women*.
 - **Products:**
 - **Domestic:** Pots for carrying water, cooking soup, storing grain, and palm oil.
 - **Artistic:** The Ife civilization produced world-class terracotta sculptures.

- **Architectural:** Used to create "potsherd" pavements in Ife.
- **D. Carving**
 - **Wood:** The most common material.
 - **Function:** Not just "art," but functional items with spiritual power.
 - **Products:** Masks (for masquerades), stools (for chiefs), doors (for palaces), figures of ancestors (*ikenga* in Igboland), canoes.
 - **Ivory:** A luxury good, carved by specialists for kings (e.g., in Benin).
 - **Calabash:** Decorating and carving gourds was a widespread art form.
- **E. Other Industries**
 - **Bronze/Brass Casting:** (Recap Week 1, Term 2) A highly specialized, royal industry in Ife, Benin, and Igbo-Ukwu.
 - **Leatherwork:** Centered in the Hausa states (Kano, Katsina), using goat skin ("Moroccan" leather) to make bags, cushions, and sandals, which were exported to North Africa.
 - **Glassmaking:** The Nupe kingdom (Bida) was famous for making glass beads and bangles.
 - **Salt Production:** A critical industry. Salt was extracted by evaporating brine (salty water) in the delta or from salt springs (e.g., in the Middle Belt).

2. Evaluation (Week 2)

- **Objective Questions:**
 1. The pre-colonial god of iron, worshipped by blacksmiths in Yorubaland, is: (a) *Sango* (b) *Ogun* (c) *Amadioha* (d) *Esu*.
 2. Which city was famous for its indigo dye pits and textile exports? (a) Benin (b) Ife (c) Kano (d) Onitsha.
 3. *Aso-Oke* is the famous traditional cloth of the: (a) Hausa (b) Igbo (c) Yoruba (d) Ijaw.
 4. In pre-colonial Nigeria, pottery was an industry dominated by: (a) Men (b) Kings (c) Women (d) Slaves.
- **Theory Questions:**
 1. Why was the blacksmith such an important person in pre-colonial society?

2. List three different materials used for carving and what was made from them.

3. Assignment (Week 2)

- Choose *one* indigenous industry (e.g., Iron Smelting, Weaving, or Bronze Casting). Write two paragraphs explaining (a) how it was done and (b) its impact on the economy or politics of the society.

WEEK 3: EARLY EXTERNAL INFLUENCES

Topic: Contact with North Africa and Introduction of Islam

1. Content: The "Northern Door"

- **Introduction:** For centuries, pre-colonial Nigeria had two "front doors" to the wider world:
 1. **The "Northern Door":** The Sahara Desert, connecting to North Africa and the Islamic world. This door opened *first*.
 2. **The "Southern Door":** The Atlantic Ocean, connecting to Europe and the Americas. This door opened *later* (c. 1472).
- This week focuses on the Northern Door.
- **A. Contact with North Africa**

- **The "Barrier" and the "Bridge":** The Sahara Desert is the world's largest hot desert. For millennia, it was a massive barrier.
- **The "Ship of the Desert":** The introduction of the **Camel** (c. 100 AD) revolutionized this. The camel could survive for days without water, allowing it to "bridge" the Sahara.
- **The Berbers and Tuaregs:** These were the nomadic peoples of the Sahara. They were the "truck drivers" of the desert—they owned the camels, knew the routes, and managed the oases (watering holes).
- **Initial Contact:** The first contacts between Nigeria (specifically the Kanem region and Hausaland) and North Africa were *purely for trade*.
- **B. The Introduction of Islam**
 - **The "Vehicle" of Islam:** Islam was *not* spread by war or conquest (like the 1804 Jihad, which came much later). It was carried *peacefully* by the Berber and Tuareg *traders* and by *scholars* (missionaries) who traveled with them.
 - **Order of Adoption (By Rulers):**
 1. **Kanem-Bornu (c. 11th Century):** The Sefawa dynasty (*Mai* Humai) was the first major royal court in the Nigerian area to adopt Islam.
 2. **Hausaland (c. 14th Century):** Rulers of Kano and Katsina adopted Islam, brought by missionaries from Mali and Kanem.
 - **Why did Rulers Adopt Islam? (The "State-Building Kit"):**
 - Rulers adopted Islam *less* for personal faith and *more* for its political and economic *advantages*. Islam provided a "kit" for building a more efficient state:
 - 2. **Diplomacy:** It made them part of the vast, wealthy, and powerful Islamic World. A *Mai* of Bornu could send an ambassador to the Sultan of Egypt as an "equal."
 - 3. **Literacy (Arabic):** It brought the Arabic language, which was used for record-keeping, taxes, and writing down laws (replacing memory).
 - 4. **Law (Sharia):** It provided a single, unified legal code (*Sharia*) to govern a large, diverse empire, replacing thousands of different village customs.

5. **Specialists:** It brought *Ulama* (scholars) who could serve as judges, administrators, and secretaries for the king.
- **Initial Impact:** For the first few centuries, Islam was an *urban* religion (of the king, his court, and the merchants). The common people in the countryside continued to practice their traditional religions (like Bori).

2. Evaluation (Week 3)

- **Objective Questions:**

1. The "ship of the desert" that made trans-Saharan contact possible was the: (a) Horse (b) Donkey (c) Camel (d) Canoe.
2. The nomadic people who controlled the Saharan trade routes were the: (a) Berbers/Tuaregs (b) Portuguese (c) Fulani (d) Jukun.
3. The first major dynasty in the Nigerian area to adopt Islam was the: (a) *Sarki* of Kano (b) Sefawa of Kanem (c) *Oba* of Benin (d) *Alaafin* of Oyo.
4. Which of these was *not* a reason rulers adopted Islam? (a) Literacy (b) Sharia Law (c) Diplomacy (d) To fight the Portuguese.

- **Theory Questions:**

1. Explain the difference between Nigeria's "Northern Door" and "Southern Door." Which one opened first?
2. List and explain three reasons why a pre-colonial king (like a *Mai* or *Sarki*) would find it useful to convert to Islam.

3. Assignment (Week 3)

- Write a 250-word journal entry from the perspective of a Hausa *Sarki* in 1450. Explain your decision to convert to Islam, focusing on the *political* and *economic* benefits for your kingdom.

WEEK 4: THE TRANS-SAHARAN TRADE

Topic: Routes, Goods Exchanged, and Impact

1. Content: The Great Desert Trade

- **A. Definition:** The Trans-Saharan Trade was a network of trade routes connecting Sub-Saharan West Africa (including Nigeria) to the Mediterranean coast of North Africa (and from there, to Europe and the Middle East).
- **B. Major Trade Routes**
 - The trade was *not* a single road. It was a web of routes connecting major oases.
 - **Major Terminals in Nigeria:**
 1. **Kano:** The most important. It was the southern terminal of the major route from *Tripoli* (in modern Libya).

2. **Katsina:** A major terminal, especially before Kano's rise.
 3. **Kukawa (in Bornu):** The capital of Bornu, it controlled the route from *Fezzan* (Libya).
- **C. Goods Exchanged (The Great Exchange)**
 - **From Nigeria (South to North):**
 - **Gold:** From sources further west (Ghana, Mali), but traded *through* Nigerian states.
 - **Slaves:** (A major item) Captives from raids on non-Muslim states (e.g., in the Middle Belt) were marched north.
 - **Kola Nuts:** (From the forest) Highly valued in the North as a stimulant.
 - **Ivory:** For carving.
 - **Ostrich Feathers:** For decoration in Europe.
 - **Leather Goods:** The famous "Moroccan Leather" sold in Europe was actually *Hausa* leather, exported from Kano.
 - **To Nigeria (North to South):**
 - **Salt:** The *most valuable* import. The savanna and forest had no local salt, making it as precious as gold.
 - **Horses:** The "tanks" of pre-colonial warfare. Essential for the cavalry of Oyo, Kanem-Bornu, and the Hausa states.
 - **Weapons:** Swords, daggers, and (by the 16th C.) firearms for states like Kanem-Bornu.
 - **Luxury Goods:** Fine cloth, paper, books (especially the Qur'an), and coral beads.
 - **D. Impact of the Trade**
 1. **Economic Impact:**
 - It created *enormous wealth* for the states that controlled the routes and terminals (Kano, Katsina, Kanem-Bornu).
 - This wealth (from taxes) funded the entire state.
 2. **Political Impact:**

- It allowed for the creation of *large, centralized empires* (recap Week 2, Term 2).
- The trade (especially in horses) created a powerful *military cavalry*, which was used to build and control these empires.

3. Cultural/Social Impact:

- **Islam:** It was the "vehicle" for the spread of Islam (recap Week 3).
- **Literacy & Education:** It brought Arabic, books, and Islamic scholars, leading to the rise of intellectual centers (like Katsina).
- **Urbanization:** It led to the growth of massive, wealthy, and cosmopolitan cities (Kano, Kukawa).

2. Evaluation (Week 4)

• Objective Questions:

1. The *most* valuable and important commodity imported from North Africa was: (a) Gold (b) Horses (c) Guns (d) Salt.
2. Which Hausa city was famous for exporting leather goods to North Africa? (a) Zaria (b) Gobir (c) Kano (d) Daura.
3. The Trans-Saharan trade directly funded the powerful *cavalries* of the: (a) Savanna empires (b) Forest kingdoms (c) Ijaw city-states (d) Igbo villages.
4. A major southern "export" used as a stimulant in the north was: (a) Palm oil (b) Yams (c) Kola nuts (d) Salt.

• Theory Questions:

1. List two items exported *from* Nigeria and two items imported *to* Nigeria during the Trans-Saharan trade.
2. Explain *one* political impact and *one* cultural impact of the Trans-Saharan trade.

3. Assignment (Week 4)

- Imagine you are a merchant in 15th-century Kano. Write a 250-word journal entry describing the arrival of a large camel caravan from the North. What goods are they bringing? What goods will you trade with them in return?

WEEK 6: ISLAM IN KANEM-BORNU AND HAUSA LAND

Topic: Spread, Influence, and Contributions

1. Content: Islam as a State Religion

- **A. Recap:**
 - **How it came:** Peacefully, via traders and scholars from North Africa.
 - **Who adopted it:** The *Mai* of Kanem-Bornu (11th C.) and the *Sarkis* of Hausaland (14th C.).
- **B. Influence on Governance (The "State-Building Kit" in action)**
 - **Kanem-Bornu:**
 - **Recap *Mai* Idris Alooma (16th C.):** He used Islam to its fullest political extent.

- He replaced traditional law with **Sharia Law**, enforced by *Qadis* (Islamic judges).
- He used Arabic as the language of diplomacy, sending letters to the Ottoman Sultan.
- He used Islamic funds to build mosques and hostels for Bornu pilgrims in Mecca.
- **Hausaland:**
 - **The Ulama:** The *Sarkis* (kings) began to rely on a new class of people: the *Ulama* (Islamic scholars).
 - **New Political Offices:** The *Ulama* were appointed as *Qadis* (judges), *Imams* (spiritual leaders), and *scribes* (for keeping records).
 - **Law:** Sharia law began to run *parallel* to traditional Hausa customary law, creating a dual legal system.
 - **Literacy:** The *Sarkis* could now issue written orders and have their histories recorded (e.g., the *Kano Chronicle*), giving them more power.
- **C. Contributions to Education and Scholarship**
 - **Qur'anic Schools:** The first formal schools were Qur'anic schools, where children learned to read and write Arabic and memorize the Qur'an.
 - **Centers of Higher Learning:** Cities like **Katsina** and **Kano** became famous "university towns." Scholars from all over West Africa (like Timbuktu) would come to study.
 - **Local Scholarship:** A class of local scholars emerged, writing their own books on theology, law, and history in Arabic.
- **D. Social Influence and The Problem of Syncretism**
 - **Syncretism (Mixing):** For centuries, Islam was *mixed* with traditional beliefs.
 - **Example:** A *Sarki* would go to the mosque on Friday, but he would *also* perform traditional Hausa rituals to ensure a good harvest. The common people continued to worship traditional spirits (the **Bori**).
 - **The Tension (The Seed of Jihad):**
 - By the 18th century, a new group of *Fulani* Islamic scholars (reformers) began to preach against this "impure" Islam.

- They felt the Hausa *Sarkis* were *not* true Muslims—that they were still "pagans" who used Islam only when it was convenient.
- This tension between the "reformers" (like Uthman dan Fodio) and the "syncretic" rulers (the Hausa *Sarkis*) would lead directly to the **1804 Fulani Jihad** (a key topic for SS2).

2. Evaluation (Week 6)

• Objective Questions:

1. The mixing of two or more religious beliefs (e.g., Islam and Bori) is called: (a) Jihad (b) Sharia (c) Syncretism (d) Ulama.
2. An Islamic judge is called a: (a) *Qadi* (b) *Sarki* (c) *Mai* (d) *Imam*.
3. Which Hausa city became a famous center for Islamic scholarship, like a university town? (a) Zaria (b) Gobir (c) Daura (d) Katsina.
4. The *Kano Chronicle* is a key example of the introduction of: (a) Literacy (b) Cavalry (c) Bori (d) Trade.

• Theory Questions:

1. What is "syncretism"? Give one example from Hausaland before 1800.
2. Explain two ways that adopting Islam strengthened the power of a *Sarki* or *Mai*.

3. Assignment (Week 6)

- Write a 250-word letter from the perspective of a Fulani scholar in 1790. Write the letter to the *Sarki* of Kano, complaining about the "impure" practice of Islam in his city. What specific things would you complain about? (e.g., Bori worship, unfair taxes, mixing of laws).

WEEK 8: EARLY EUROPEAN CONTACTS

Topic: Arrival of the Portuguese and other Europeans

1. Content: The "Southern Door" Opens

- **A. The "Age of Exploration" - Why they Came**
 - **Context:** In the 1400s, the Trans-Saharan trade was controlled by North African Muslims, who were rivals of Christian Europe.
 - **Primary Motives:**
 1. **Find a Sea Route to India:** To bypass the Muslim "middlemen" and get direct access to the spices of Asia.

2. **Find Gold:** They had heard legends of the West African gold empires (Ghana, Mali).
 3. **Find "Prester John":** A mythical Christian king they hoped to find in Africa to help them fight the Muslims.
- **B. The Portuguese (The First to Arrive)**
 - **Pioneers:** Led by Prince Henry the Navigator, they developed new ships (the *caravel*) that could sail against the wind.
 - **First Contact:** The Portuguese explorer **Ruy de Sequeira** was the first European to reach the Nigerian coast, arriving at the port of **Benin (Ughoton)** in **1472**.
 - **The First Trade (Goods, *not* Slaves):** The *Oba* of Benin welcomed them. They traded:
 - **Europeans brought:** Brass and copper bracelets (manillas), cloth, guns, coral beads.
 - **Benin offered:** Pepper (this was the main prize at first), ivory, and gum.
 - **Diplomacy Between Equals:** This was *not* a colonial conquest. The Oba of Benin was a powerful king, and the Portuguese treated him as such.
 - **c. 1486:** The *Oba* of Benin sent an ambassador *to Portugal* to establish formal relations.
 - **Missionary Activity:**
 - Catholic priests traveled with the traders to convert the *Oba* and his people.
 - They had very little success in Benin, as the *Oba's* power was tied to his own traditional religion.
 - They had more success in **Warri**, where they converted a prince (who became a local *Olu*) and established a small Catholic community.
 - **C. The Arrival of Other Europeans**
 - **Breaking the Monopoly:** For about 100 years, the Portuguese dominated the trade.
 - **The English:** Arrived in Benin in 1553 (Captain Thomas Wyndham). They were shocked by the power and wealth of the *Oba*.

- **The Dutch, French, etc.:** By the 1600s, all the major European maritime powers were competing for trade on the Nigerian coast.
- **The "Oil Rivers":** The Europeans gave this name to the Niger Delta, because it was a major source of palm oil (which they initially used for soap and lubrication, not slaves).

2. Evaluation (Week 8)

- **Objective Questions:**

1. The first European to reach the Nigerian coast (Benin) was: (a) English (b) French (c) Dutch (d) Portuguese.
2. The Portuguese explorer Ruy de Sequeira arrived in Benin in: (a) 1897 (b) 1472 (c) 1600 (d) 1804.
3. The *first* major item the Portuguese wanted to trade for in Benin was: (a) Slaves (b) Palm oil (c) Pepper (d) Gold.
4. The Europeans called the Niger Delta the: (a) Slave Coast (b) Oil Rivers (c) Gold Coast (d) Ivory Coast.

- **Theory Questions:**

1. List two main reasons why the Portuguese wanted to explore the coast of West Africa.
2. Describe the nature of the *initial* relationship between the *Oba* of Benin and the Portuguese traders. Was it a relationship of equals?

3. Assignment (Week 8)

- Imagine you are the *Oba* of Benin's ambassador who traveled to Portugal in 1486. Write a 250-word report back to the *Oba*. What did you see in this strange European country? What are their strengths and weaknesses?

WEEK 9: TRANS-ATLANTIC SLAVE TRADE I

Topic: Origin and Organization

1. Content: The "Triangular Trade"

- **A. Origin of the *Atlantic* Trade**

- **Pre-existing Slavery:** Slavery already *existed* in Nigeria (as war captives, debtors, or criminals) and in the Trans-Saharan trade (slaves were sent *north*).
- **The *New Demand*:** The "New World" (North & South America, Caribbean) was colonized by Europeans. They created huge *plantations* (sugar, tobacco, cotton).
- **Labor Force:** The native populations died from disease. Europeans wouldn't do the work. The plantations needed a massive, cheap, forced labor force.
- **The "Switch":** The trade on the "Southern Door" (Atlantic) *switched* from goods (pepper, ivory) to a massive, industrial-scale trade in *human beings*.

- **B. Organization: The "Triangular Trade"**

- This was the system that connected three continents: Europe, Africa, and the Americas.
- **Leg 1: Europe to Africa**
 - Ships left European ports (like Liverpool, UK) filled with *manufactured goods*.
 - **The "Slave-Guns Cycle":** The *most* important goods were **Guns, Gunpowder, Alcohol (Gin),** and textiles.
- **Leg 2: Africa to the Americas (The "Middle Passage")**
 - The European goods were *exchanged* on the Nigerian coast for captured Africans.
 - **The "Middle Passage":** This was the horrific 2-3 month voyage across the Atlantic. People were packed into ships, chained, and kept in unimaginable filth. Disease, suicide, and starvation were rampant. 15-20% died on the journey.
- **Leg 3: The Americas to Europe**
 - In the Americas (e.g., Brazil, Jamaica, USA), the surviving Africans were sold at auction for *plantation goods*.
 - The ships then loaded up with **Sugar, Cotton, and Tobacco** and sailed back to Europe to sell them for a huge profit. The cycle then began again.

- **C. The African Role (Middlemen)**

- **Fact:** Europeans did *not* go inland to capture slaves. They were afraid of disease (malaria) and African armies. They stayed on their ships or in coastal forts ("factories").
- **African Middlemen:** The trade was controlled by powerful African kings and merchants who acted as *middlemen*.

1. **Coastal States (The "Sellers"):** Rulers of Ijaw houses (*Amanyannabo*), Efik city-states (*Ekpe* society), and kingdoms like Benin and Oyo controlled the ports.

2. **Inland States (The "Suppliers"):** They captured people from the interior.

- **Oyo Empire:** Its cavalry raided villages to capture people to sell.

- **Aro Confederacy:** (Recap Week 9, Term 2) They used the *Ibini Ukpabi* oracle to condemn people, then sold them into the trade via their inland network.
- **The "Guns-for-Slaves" Cycle:** African states *had* to participate. If your rival (Oyo) bought guns, you (Nupe) *also* had to buy guns to defend yourself. And the only thing Europeans wanted in exchange for guns... was slaves. This created a terrible, unstoppable cycle of violence.

2. Evaluation (Week 9)

• Objective Questions:

1. The massive demand for slaves was created by: (a) Hausa traders (b) Plantations in the Americas (c) Kanem-Bornu (d) The *Oba* of Benin.
2. The voyage from Africa to the Americas was called the: (a) Triangular Trade (b) Middle Passage (c) Trans-Saharan Trade (d) Oil River Trade.
3. Which of these was *not* part of the "Triangular Trade"? (a) Guns from Europe (b) Slaves from Africa (c) Sugar from Americas (d) Gold from North Africa.
4. The "guns-for-slaves" cycle describes: (a) How guns were used to get slaves (b) How slaves made guns (c) How slaves were traded for guns (d) Both A and C.

• Theory Questions:

1. Draw a simple diagram of the "Triangular Trade," labeling the three continents and the main goods for each "leg."
2. Explain the role of "African Middlemen" in the Trans-Atlantic slave trade.

3. Assignment (Week 9)

- Write a 250-word journal entry from the perspective of an enslaved person on the "Middle Passage." Describe the conditions and your feelings. (This requires empathy and historical imagination).

WEEK 10: TRANS-ATLANTIC SLAVE TRADE II

Topic: Effects of the Slave Trade

1. Content: Consequences of the Trade

- **A. Political Effects**

1. **Rise of "Predator States":** The trade created new, powerful states whose entire existence was based on capturing and selling people.
 - **Oyo Empire:** Used its cavalry to become the dominant "slave-raiding" power in the interior.
 - **Coastal City-States:** Bonny, Opobo, Calabar (Efik), and Itsekiri (Warri) became rich and powerful by acting as the middlemen.

- **The "Canoe House" (Ijaw):** This system (recap Week 8, Term 2) was perfected for the slave trade, as "Houses" competed to capture and sell the most people.
- 2. **Increased Warfare and Instability:** The "guns-for-slaves" cycle (Week 9) led to constant, large-scale warfare. This was no longer about territory; it was about capturing human beings.
- 3. **Destruction and Collapse of States:** This constant warfare destroyed smaller villages and destabilized large empires. The eventual *collapse* of the Oyo Empire in the early 1800s was caused by internal conflicts, which were made *worse* by the pressures of the slave trade.
- **B. Economic Effects**
 1. **Distortion of the Economy:** All economic energy shifted to the *most profitable* activity: capturing and selling people.
 2. **Decline of "Legitimate" Industries:** Local industries like cloth weaving, iron smelting, and farming declined. Why make your own cloth or pots when it was cheaper to *buy* them from Europeans with slaves?
 3. **Introduction of New Crops:** This was one of the *few* positive effects. New food crops were brought from the Americas, including **Cassava** and **Maize (Corn)**. These crops grew well in African soil and are now staple foods.
- **C. Social and Demographic Effects**
 1. **Depopulation:** An estimated 10-12 million people were forcibly removed from Africa. The Nigerian coast was a major center. This was the loss of the *youngest* and *strongest* people (the main workforce).
 2. **Fear and Insecurity:** Raids were a constant threat. People could not travel, farm, or trade safely. This destroyed social trust.
 3. **Shift in Social Structures:** The trade created a new class of super-wealthy, powerful (and often very cruel) "merchant princes" (like King Jaja of Opobo, who was himself a former slave).
 4. **Creation of the African Diaspora:** The trade created vast, new African-descended cultures in Brazil, Cuba, Haiti, the USA, and the Caribbean. Many of

these (like the *Orisha* religion in Brazil/Cuba) preserved their Nigerian (Yoruba, Igbo) cultural roots.

- **D. Abolition (Why it Ended)**

- **Economic Reasons:** (By 1800s) The **Industrial Revolution** made slave labor seem *less profitable* than "legitimate" trade (e.g., selling palm oil to lubricate machines). Britain wanted Africa as a *market* to *sell* goods to, not a place to *get* slaves from.
- **Moral/Humanitarian Reasons:** The rise of Christian reformers (like William Wilberforce in Britain) who argued that the trade was a terrible sin.
- **The British (1807):** Britain abolished the slave trade in 1807 and used its powerful navy (the "Naval Squadron") to patrol the West African coast and *stop* slave ships. This *ended* the trade and began a new era of "legitimate trade" (in palm oil).

2. Evaluation (Week 10)

- **Objective Questions:**

1. A "predator state" was a state whose power was based on: (a) Farming (b) Weaving (c) Raiding for slaves (d) Trading for gold.
2. Which two major food crops were introduced from the Americas? (a) Yams and Rice (b) Cassava and Maize (c) Wheat and Millet (d) Kola and Sugar.
3. The African-descended populations in Brazil, Cuba, and the USA are known as the: (a) Diaspora (b) Middle Passage (c) Aro (d) Oil Rivers.
4. Britain abolished the slave trade in: (a) 1472 (b) 1600 (c) 1807 (d) 1960.

- **Theory Questions:**

1. What was the "guns-for-slaves" cycle, and what was its main *political* effect?
2. Explain *one* major economic effect and *one* major social effect of the trans-Atlantic slave trade.

3. Assignment (Week 10)

- Write a 300-word essay: "What was the single *worst* effect of the trans-Atlantic slave trade on Nigerian societies?" Justify your answer with clear examples.

WEEK 11: REVISION

Topic: Comprehensive Review of the Session's Work (Terms 1, 2, and 3)

1. Content: Summary of the Full Year (SS1)

- **TERM 1: FOUNDATIONS OF HISTORY**

- **What is History?** An interpretive study of the past, vital for identity and nation-building.
- **Historical Sources:** Primary (Oral Tradition, Archaeology, Written) vs. Secondary.
- **Dating:** Relative (Stratigraphy) vs. Absolute (Radiocarbon C-14).
- **Geography:** The "North-South" divide. **Savanna (North)** -> Horses, Cavalry, Centralized Empires. **Forest (South)** -> Tsetse fly, No Cavalry, Decentralized States or smaller Kingdoms.
- **Origin Myths:** Not literal facts, but "social charters" (Oduduwa/Yoruba, Bayajidda/Hausa, Benin-Ife link).

- **TERM 2: NIGERIAN STATES & CIVILIZATIONS**

- **Early Civilizations:** Nok (Iron, Terracotta), Igbo-Ukwu (Bronzes, Trade), Ife (Naturalistic Art), Benin (Royal Art, Walls).
- **State Types:**
 - **Centralized:** *Mai* of Kanem-Bornu, *Sarki* of Hausa States, *Alaafin* of Oyo (with checks/balances), *Oba* of Benin.
 - **Non-Centralized:** Igbo (Council, Age Grades), Tiv (Genealogy), Ijaw (Canoe House).
- **Inter-group Relations (Internal):** Constant trade (North-South), the Aro Confederacy (Oracle), war, and migration.

- **TERM 3: EXTERNAL INFLUENCES**

- **Indigenous Tech:** Iron (*Ogun*), Weaving (*Aso-Oke*), Carving, etc.
- **The "Northern Door": Trans-Saharan Trade**
 - **Vehicle:** Camel.
 - **Impact:** Brought **Islam, Horses, Salt, and Literacy (Arabic)**.

- **Result:** Funded and built the large Savanna Empires (Kano, Katsina, Kanem-Bornu).
- **The "Southern Door": Trans-Atlantic Trade**
 - **Vehicle:** European Ships (Portuguese, 1472).
 - **Impact (Phase 1):** Trade in goods (Pepper, Ivory).
 - **Impact (Phase 2): Trans-Atlantic Slave Trade.**
 - **Result:** The "Triangular Trade," rise of "Predator States" (Oyo, Benin, Ijaw), massive depopulation, and the "guns-for-slaves" cycle.
 - **Abolition (1807):** End of the slave trade, beginning of "legitimate trade."

2. Evaluation (Week 11)

- **Practice "Big Picture" Exam Questions:**
 1. (MCQ) The *first* external influence on Nigeria came from: (a) The Portuguese (b) The British (c) North Africa (d) The Americas.
 2. (MCQ) The Trans-Saharan trade strengthened the *savanna* states, while the Trans-Atlantic trade strengthened the *coastal* and: (a) Middle Belt states (b) Forest kingdoms (c) Saharan states (d) All of them.
 3. (MCQ) The "Middle Passage" refers to: (a) The route from Europe to Africa (b) The route from Africa to the Americas (c) The Trans-Saharan route (d) The Niger River.
 4. (Theory) Compare and contrast the *impact* of the Trans-Saharan Trade with the *impact* of the Trans-Atlantic Trade on Nigeria's political development.
 5. (Theory) How did geography (e.g., savanna vs. forest) influence the political and economic development of states like Kano and Benin?
 6. (Theory) Explain the difference between the political system of the Igbo and the political system of the Oyo Empire.

3. Assignment (Week 11)

- **Final Project:** Create a "timeline" poster of the entire SS1 History curriculum. The timeline should start at the left with "Nok Culture (c. 1500 BC)" and end at the right with

"Abolition of Slave Trade (1807)." You must place all the following key events and periods on the timeline in their correct chronological order:

- Nok Culture
- Igbo-Ukwu
- Kanem adopts Islam
- Ife "Golden Age"
- Hausa states adopt Islam
- Portuguese arrive in Benin (1472)
- *Mai* Idris Alooma's reign
- Height of Trans-Atlantic Slave Trade
- Abolition of Slave Trade (1807)
